CITY COUNCIL AGENDA
AFTON CITY COUNCIL CHAMBERS
3033 St. Croix Trail South
TUESDAY, October 17, 2017
7:00 P.M.

1. CALL TO ORDER

2. PLEDGE OF ALLEGIANCE

3. ROLL CALL

_____Mayor Bend
_____Council Member Nelson
_____Council Member Ross
_____Council Member Richter
_____Council Member Palmquist

4. APPROVAL OF AGENDA

A. Approval of the Agenda for the Regular City Council Meeting of October 17, 2017 -

5. APPROVAL OF MINUTES

A. Minutes of the September 19, 2017 Regular City Council Meeting-

6. PUBLIC INPUT

Citizens may share their comments or concerns on any issue that is a responsibility or function of the Afton City Council, whether or not the issue is on the Agenda. Persons who wish to address the Council must fill out a Comment Card before the meeting begins and give it to the City Administrator or Council Chair. The Council Chair will request you to come to the podium, state your full name and address and present your comments. You are encouraged to limit your presentation to no more than 3 minutes. The Council Chair reserves the right to limit an individual's presentation if it becomes redundant, repetitive, overly argumentative, or if it is not relevant to an issue that is part of the City of Afton's responsibilities. The Council Chair may also limit the number of individual presentations to accommodate the scheduled agenda items.

7. REPORTS/PRESENTATIONS

A. Sheriff's Monthly Report –
B. Tom Niedzwiecki, Budget Report -
C. Lower St. Croix Fire District Report –
D. Randy Kopesky, Yellow Ribbon Alliance

8. CONSENT AGENDA

All matters listed on the Consent Agenda are considered to be routine by City Council and will be enacted in one motion. If a member wishes to discuss an item, that item will be removed from the Consent Agenda and considered separately. (Roll Call for Consent Agenda approval if Resolutions included):

A. Just and Correct Claims
B. 4M Fund Transfer – SEPTEMBER – **Resolution 2017-47**

PROCEEDINGS OF THE AFTON CITY COUNCIL
CITY OF AFTON
WASHINGTON COUNTY, MINNESOTA

DRAFT City Council Regular Meeting Minutes
September 19, 2017
Afton City Hall
3033 St. Croix Trail
Afton, MN 55001
7:00 P.M.

---

1. **THE MEETING WAS CALLED TO ORDER** at 7:05 P.M. by Mayor Richard Bend

2. **THE PLEDGE OF ALLEGIANCE** – was recited.

3. **ROLL CALL:** Mayor Richard Bend, Council Members Nelson, Richter, Palmquist, Ross. **Quorum Present.**

   ALSO PRESENT: Nick Guilliams, Alison Harwood (City Engineers), City Administrator Ron Moorse, City Attorney Fritz Knaak, City Accountant Tom Niedzwiecki (for last portion of the meeting), City Clerk Julie Yoho, Planning Commission member Scott Patten.

4. **APPROVAL OF AGENDA** – [some agenda items were discussed out of sequence]
   A. Agenda for the Regular City Council Meeting of September 19, 2017
   Council member Richter suggested moving all of the pay requests to item 8. "Consent Agenda". Move Sherriff's report to top of agenda. Also pull the Blondo Consulting Invoices for discussion.
   Motion/Second: Bend/Ross To approve the agenda as amended for the September 19, 2017 Regular City Council Meeting. Motion passed 5-0-0.

5. **APPROVAL OF MINUTES**
   A. Minutes of the August 15, 2-17 Regular City Council meeting.
   Motion/Second: Nelson/Richter To approve the minutes of August 15, 2017 Regular City Council Meeting. Motion passed 5-0-0.

6. **PUBLIC INPUT** – none

7. **REPORTS/PRESENTATIONS -**
   A. Sheriff's Monthly Report (taken out of order)
   Council member Richter asked about the format for the monthly report as it seems to be missing page 2. The Deputy will check with people sending report. Council member Ross reminded everyone that Art in the Park is this coming weekend.

   B. Tom Niedzwiecki, Budget Report
   Tom provided information on the financial report and supplemental detail of expenses paid out in August. He also provided an updated balance sheet on the street improvements, pavement projects, and Downtown Improvement Project, as well as year-end estimates.

   C. Lower St. Croix Fire District Report
   Potential misbehavior by Dept. employee is being investigated.

8. **CONSENT AGENDA**
   Motion/Second: Richter / Palmquist To approve the consent agenda as presented including Resolution 2017-43. Roll call, all aye, passed 5-0-0.

A. Just and Correct Claims
B. 4M Fund Transfer – August – **Resolution 2017-43**

Council member Richter requested copies of the Blondo Consulting invoices and summary of costs-to-date for their archeological monitoring during excavation near the Rattlesnake Mound Group. The original estimate was for $12,000 assuming 3 weeks of monitoring time. Administrator Moorse explained extra monitoring time was needed throughout the summer. For the months of April through August the total cost has been $52,518.75. Mayor Bend asked Moorse to request supporting time sheets and to re-address at the next council meeting once we have supporting documentation.

9. CITY COUNCIL BUSINESS

A. Planning Commission Report –

1. Scott Patten, Planning Commission member provided an update on the comprehensive plan editing session held during the last meeting. There should be a draft available for council review by the end of the year.
The commission also held over a variance request in need of more information.

B. Engineering Report – (Engineer Staff Report & Council Update)

1. Change order No. 4 – 2017 Pavement Management Project

Motion/Second: Palmquist/Bend To approve change order No. 4 to Park Construction in the amount of $62,120.50. Motion passed 5-0-0.

2. Request for Scope Increase to WSB for Construction Services for the 2017 Pavement Management Project

WSB is requesting a budget amendment in the amount of $38,510 for construction services for the 2017 Pavement Management Project. The initial scope only included part-time inspection. Full-tie inspection has been provided throughout construction. In addiction numerous project changes have increased the duration and complexity of the project resulting in additional time.

During discussion the council noted that this is 15% of the total contract amount. Documentation on the two components of the request (change orders and full-time inspection rather than part-time) should be provided. Also an analysis on how this number was arrived at.

Motion/Second: Bend/Richter to continue discussion of item 9B2 pending receipt of additional documentation. Motion passed 5-0-0.

3. Cost Estimate to Replace Bridges as Culverts

WSB was asked to prepare a rough cost estimate to replace the 2 lowest ranked bridges as culverts. WSB would need to perform a Hydraulic and hydrologic analysis and work with the watershed district to determine if this is possible. A box culvert is classified as a bridge if it exceeds 10 feet in width. If it is feasible to classify these are culverts the cost would be approximately $200,000 each.
Council member Richter indicated he would like more information on water flow studies prior to making any decision.
City Engineer Guilliams indicated the hydrologic studies can be done next spring.

4. Downtown Improvement Project

a. Sidewalk from 36th to 37th street.
Sidewalk will cost $16,000 total with City cost 60%, remainder County. Administrator Moorse talked with the landowner about future liability for the trees and the fence on site which may need to be moved.

Motion/Second: Bend/Nelson To approve extension of the sidewalk with the City to pay no more than $10,000; with property owner agreeing to grant an easement and to receive no compensation in event that the fence needs to be moved; no compensation if damage is done to the trees.
Administrator Moorse will contact the owner and inform the concrete guys so that it's done now while they are working in town.
Motion Vote
Passed 5-0-0

C. Administration –

1. Request for Negative Declaration Regarding the Need for an Environmental Impact Statement for the Afton Creek Preserve subdivision (Carlson PLCD) at 60th Street and Trading Post Trail – **Resolution 2017-44**

Alison Harwood, WSB City Engineer. Alison explained that an Environmental Assessment Worksheet (EAW) was completed for the project and found that based on the Findings of Fact and Conclusions the project does not have the potential for significant environmental impacts. The impacts identified can be mitigated through mitigation and permitting.
Council member Richter asked about the timeframe needed for this resolution.
Administrator Moorse stated that a final plat cannot be approved until the need for an EIS has been determined and recorded.
Council member Richter stated he would like to wait until approval of the preliminary plat to do this to get as much feedback as possible.
Mayor Bend asked whether any more data is needed to make a determination.
City Engineer Harwood answered no.
Council member Palmquist stated that ordering an EIS for a project like this would be unusual.
Mayor Bend stated that if we have all of the data, the city needs to process in a timely manner.
Council member Richter asked Jo Bush, developer, how would a delay in this impact you?
Bush answered that if it was not meeting the requirements he would like to know.
City Engineer Harwood stated that the developer cannot move forward with permitting. There is a 60 day window for the RGU to make a determination from when comments are addressed.
Administrator Moorse stated that the city planner had made an informal comment that and EIS would not be needed based on his experience on similar developments
Mayor Bend asked if any changes between sketch and prelim that would warrant the need for and EIS.
City Engineer Harwood answered no. If significant changes are made, the city as the RGU could require more analysis.
Motion/Second Palmquist/Nelson To adopt Resolution 2017-44 issuing a negative declaration of need for an Environment Impact Statement for the Afton Creek Preserve project. Roll Call: Ross – Nay, Richter – Nay, Bend Nelson Palmquist – Aye. Passed 3-2-0.

2. 2018 Preliminary Budget and Tax Levy

Administrator Moorse stated that the city is required to submit the preliminary tax levy to the County by September 30. The preliminary tax levy cannot be increased, but can be reduced. The final budget and tax levy will be adopted in December, after the Council holds a budget and tax hearing.

Motion/Second Bend/Ross To adopt Resolution 2017-46 with the maximum levy of $2,133,786 which can be reduced in the future.
Discussion
Council member Palmquist noted that he prefers a smaller increase. Council member Richter agreed.
Council member Ross noted the current overages on the road projects. Ross noted overage on road projects. Nelson noted other items that are increased costs.
Motion vote
Roll Call: All aye, Passed 5-0-0

Motion /Second Bend/Nelson To approve Resolution 2017-45 approving the preliminary 2018 budget in the amount of $2,314,945.00. Roll call: all aye, Passed 5-0-0.

Motion/Second Bend/Nelson To approve holding the 2018 Budget and Tax hearing date on December 19, 2017. Motion passed 5-0-0

3. Motor Vehicle Noise and Speed Enforcement

Council member Ross explained that as the result of a work session it is recommended that the city purchase a noise meter for the Sherriff to use. It is a decibel meter on a tripod that would be set up in various locations to record. The Sheriff explained what they can and cannot do in regards to motorcycle noise. This device captures a single motorcycle at a location. Any ordinance the city passes has to meet the Sheriff's requirements for what they can and will enforce.

Motion/Second: Palmquist/Ross to approve purchase of a decibel meter at a cost of $273.94.

Council member Nelson stated that it needs to look at all vehicles.

Council member Richter asked if this would be used for actual enforcement.

Mayor Bend replied that it will be used to gather data to determine if an ordinance can be drafted that will be usable.

Motion Vote
Passed 5-0-0

4. DNR Flood Hazard Mitigation Grant Funding

Motion/Second: Richter/Bend to complete funding. Passed 5-0-0

5. Exterior Storage Uses in Industrial Zones

Administrator Moorse will put together a draft ordinance amendment to remove uses from the list of allowed uses in the Industrial zone. The council will discuss at a work session.

6. Kroeschel Noise Ordinance waiver Request at 15106 50th St

Motion/Second: Nelson/Richter To waive noise ordinance enforcement for a special event at 15106 50th St S. on October 14, 2017 until 11:00 pm. Passed 5-0-0.

Items C7, C8, C9 Pay requests handled under item 8.

10. Deputies Facility Change Order

Change order is proposed to install floor drains at a cost of $900.00 and a rough-in for a future restroom at a cost of $1750.00 for the garage facility.

Motion/Second Richter/Ross To approve the change order for the deputies' facility to include the restroom rough-in and the garage floor drains at a cost of $2,650.00. Motion passed 5-0-0.

Washington County will be meeting next week to approve the cost-sharing contract for the deputies' facility.

Motion /Second Palmquist/Ross To authorize contractor to commence construction. Passed 4-1-0.

11. Closed Session Assessment Appeals

Motion/Second Bend/Ross To go into closed session to discuss following assessment appeals: Afton House, Afton marina, Myers, Windmill Marina. Motion passed 5-0-0.

Closed session begin at 9:28 pm.

Full Year Estimate:

On Schedule E you can find a Full Year 2017 Estimate with comparison to the Annual Budget.

Revenues are estimated to have a favorable variance to budget of $92,041, primarily due to Building Permits being over budget by $85,750.

Expenses are estimated to be under budget by a total of $52,067, primarily due to favorable variances of $10,445 in Wages & Benefits, $11,637 in Other Administrative and $60,573 in Streets (mostly #5835 Surf maint). These are offset in part by an unfavorable variance of $35,183 in Professional Services, primarily due to Building Inspection Fees which are relative to Building Permits.

Overall the General Fund is estimated to end 2017 with a favorable variance of $144,108, summarized as follows:
$51,200 in Net Building Permits
$10,500 Wages & Benefits
$60,500 Streets
$21,908 All other (some revenue and some expenses)

Let's hope this forecast holds.

Council Action Memo

To: Mayor Bend and Members of the City Council

From: Ron Moorse, City Administrator

Date: October 11, 2017

Re: Kevin Murphy Minor Subdivision Application at 4969 Neal Avenue – **Resolution 2017-48**

Kevin Murphy has applied for a minor subdivision to divide a 5-acre parcel from the existing 40 acre parcel (quarter-quarter section). The property is currently farmed and does not have steep slopes. The proposed 5-acre parcel (Parcel 2) includes the homestead area of the larger parcel. A survey showing the proposed new lot is attached. The survey also shows a possible home site and driveway location in the southeast corner of the larger parcel (Parcel 1). The proposed parcels meet all requirements for a conforming lot, including the minimum 5-acre lot size, 2.5 acres of buildable area, 300 feet of frontage on a public road and access directly onto a public road. The existing house on the proposed Parcel 2 meets side and rear yard setbacks.

Minimum Requirements
The two proposed parcels meet all minimum requirements, including the following

1. 300 feet of width on a public road right-of-way
2. Five acre lot size
3. 2.5 acres of contiguous buildable area
4. Land suitable for driveway access

Septic System Sites
A septic system permit has been obtained for a new septic system on Parcel 2. Attached is a report verifying that suitable soils are available for primary and secondary septic system sites on Parcel 1 of the proposed subdivision.

Park Dedication. Recognizing that the new parcel will impact the City's park system, park dedication will be required. The 2012 Parks Plan does not appear to direct any land dedication to occur at or near the subject site. This being the case, a cash contribution in lieu of land dedication may be required (7.5 percent of the pre-development value with a minimum of $5,000 per lot and a maximum of $10,000 per lot). The Park Committee will address the question of land dedication vs. a cash contribution at its September 27 meeting, and the Committee's recommendation will be provided to the Planning Commission.

Dedication of Easements. The City Engineer has indicated drainage and utility easements at a width of 10 feet are required along the perimeter of each parcel. The dedication of drainage and utility easements as required by the City Engineer should be a condition of approval.

Natural Features. The Subdivision Ordinance (Section 12-1257) directs the preservation of natural site features including large trees. While it does not appear that the proposed subdivision will have any significant impacts in this regard; home, accessory building and driveway placement should give due consideration to the preservation of significant trees.

Findings

1. The subject property is located in the Agricultural zone, as is all property surrounding it

2. The Agricultural zone allows residential use with five–acre minimum lot size and a density of three lots per quarter-quarter section
3. The subdivision meets all subdivision and density requirements
4. The existing house on the proposed Parcel 2 meets side and rear yard setbacks

Conditions
If the Planning Commission recommends approval of the subdivision application, it is recommended that the following conditions be placed on the approval, as well as additional conditions the Planning Commission may include.

1. Easements as required by the City Engineer shall be granted
2. All drainage and utility easements shall be subject to the review and approval of the City Engineer.
3. All grading, drainage and erosion control issues shall be subject to review and approval by the City Engineer, and by the Valley Branch Watershed District if they meet permit thresholds.
4. Park dedication requirements shall be satisfied at the time of final subdivision approval in accordance with Section 12-1270 of the Subdivision Ordinance
5. The property owner shall demonstrate that there is a suitable site for a septic system in the area shown as a potential new home site on Parcel 1. If a new home is to be constructed on Parcel 1, a permit for an individual septic system to serve the new home shall be obtained from the Washington County Public Health Department at the time of application for building permit for the new home, and all requirements of the septic permit shall be met.
6. All driveways shall comply with Section 12-84 of the Zoning Ordinance and be subject to review and approval by the City Engineer.

Planning Commission Recommendation
The Planning Commission recommended, on a vote of 7-0-0, the approval of the Kevin Murphy Minor Subdivision application at 4969 Neal Avenue with the findings and conditions listed above.

Resolution
Attached is a resolution of approval reflecting the Planning Commission's recommendation for the Council's consideration.

Council Action Requested:
Motion regarding the Kevin Murphy Minor Subdivision application at 4969 Neal Avenue, including findings, and conditions if applicable.

RESOLUTION 2017-48

CITY OF AFTON
WASHINGTON COUNTY, MINNESOTA

A RESOLUTION APPROVING THE KEVIN MURPHY MINOR SUBDIVISION APPLICATION AT 4969 NEAL AVENUE

WHEREAS, the City of Afton is a municipal corporation organized and existing under the laws of the State of Minnesota; and

WHEREAS, the City Council of the City of Afton has adopted zoning, subdivision, and building regulations as part of the Afton Code of Ordinances, to promote the orderly, economic, and safe development and utilization of land within the City; and

WHEREAS, Kevin Murphy has applied for a Minor Subdivision at 4969 Neal Avenue, and

WHEREAS, the application proposes a subdivision to split off a five-acre parcel from the existing 40 acre parcel; and

WHEREAS, City staff reviewed the request and drafted a report for consideration; and

WHEREAS, the Planning Commission held a public hearing on the application at its regular meeting of October 2, 2017 and recommended APPROVAL of the minor subdivision on a vote of 7-0-0; and

WHEREAS, the City Council heard the request at its regular meeting on October 17, 2017, at which it considered all of the comments, concerns and recommendations of the Planning Commission and Zoning Administrator and the applicant;

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Afton does hereby APPROVE the Kevin Murphy application for a Minor Subdivision at 4969 Neal Avenue based on the findings listed below and subject to the conditions listed below:

Findings

1. The subject property is located in the Agricultural zone, as is all property surrounding it
2. The Agricultural zone allows residential use with five–acre minimum lot size and a density of three lots per quarter-quarter section
3. The subdivision meets all subdivision and density requirements
4. The existing house on the proposed Parcel 2 meets side and rear yard setbacks

Conditions

1. Easements as required by the City Engineer shall be granted
2. All drainage and utility easements shall be subject to the review and approval of the City Engineer.
3. All grading, drainage and erosion control issues shall be subject to review and approval by the City Engineer, and by the Valley Branch Watershed District if they meet permit thresholds.
4. Park dedication requirements shall be satisfied at the time of final subdivision approval in accordance with Section 12-1270 of the Subdivision Ordinance
5. The property owner shall demonstrate that there is a suitable site for a septic system in the area shown as a potential new home site on Parcel 1. If a new home is to be constructed on Parcel 1, a permit for an individual septic system to serve the new home shall be obtained from the Washington County Public Health Department at the time of application for building permit for the new home, and all requirements of the septic permit shall be met.

RESOLUTION 2017-48

6. All driveways shall comply with Section 12-84 of the Zoning Ordinance and be subject to review and approval by the City Engineer.

ADOPTED BY THE CITY COUNCIL OF THE CITY OF AFTON THIS 17TH DAY OF OCTOBER, 2017.

PERC TESTS & SEPTIC DESIGN FOR

Kevin Murphy 9969 - 170th Ave So. Afton

The Boring & Tests were performed on (9/27/17) Location (35 acre Lot S.E. Corner

Soil Size Factor (.75) Perc Rate (15/30) The perc tests were performed in accordance with the provision of WPC-40, Individual Sewage System Standards. Locations of perc tests and their readings are on the following pages.

The proposed design is based on water usage of a Type 1 4 bedroom house. Design specs are as follows.

Single Family Home ✓ Other (please indicate) Future - Lot Split

Proposed 600	Est. G.P.D.
4	Number of bedrooms
No	Garbage disposal (Yes No)
	Tank(s) Capacity
	Pump Tank(s) Capacity
	Depth to Restriction (Mottled, Water Table, Bedrock)
	Basement Lift - Type (Sewage or Effluent Pump)

System Type (Trench ____ Mound ✓ At Grade ____)

Distribution Gravity ____ Pressure ✓

Trench System

	Sq. Ft. of drainfield trench required
	Lin. Ft. of trench required
	Number of laterals proposed
	Rock required-Tons
	Max trench depth
	Trench Width

Mound System or At Grade System Proposed - Size May Vary

10'x60'	Dimensions of rock base
6"	Depth of rock
>1%	Mound site % of slope
	Upslope dike width
	Downslope dike width
	Sideslope dike width
	Overall dimensions of sand base

Pump Requirement (if needed)

	Pump G.P.M. & Total Head
	Cycles per day
	Gallons per cycle
	Laterals (Number, Diameter, Spacing)
	Perforations size & spacing

Additional information: Soils Done to Show there is a Septic site for Future Building. Full Design must be Done by Lic. Designer in Future and Re-Check Soils on that Site

This is a proposed design, it should be gone over with the local inspector to insure proper installation and to meet local code. The soil conditions and perc test have been established at the test hole locations only. There may be variations in soil, stratigraphy between and around borings, and interpolation or extrapolation of the results is not warranted.

Council Action Memo

To: Mayor Bend and Members of the City Council

From: Ron Moorse, City Administrator

Date: October 9, 2017

Re: Will Carlson Rezoning, Preliminary Plat and Conditional Use Permit Application (for a Preservation and Land Conservation Development - PLCD) on 219 acres of land at 14220 60th Street and parcels with PID Numbers 33.028.20.33.0005, 33.028.20.33.0004, 33.028.20.32.0001, 32.028.20.41.0002, 32.028.20.42.0004, and 32.028.20.43.0001.

Rezoning:	**Resolution 2017-49**
Preliminary Plat:	**Resolution 2017-50**
Conditional use Permit:	**Resolution 2017-51**

Will Carlson has applied for a Preservation and Land Conservation Development (PLCD) Subdivision on a 219 acre site north of 60th Street and West of Trading Post Trail. The proposed subdivision would preserve 113 acres of open space through a conservation easement, and would create nineteen 5-acre lots on the remainder of the site. The proposal involves the rezoning of the 5-acre parcel at 14220 60th Street from Rural Residential to Agricultural, a preliminary plat and a conditional use permit. Attached is a report regarding the rezoning application, the preliminary plat and the conditional use permit by Bob Kirmis, the City's Planning Consultant, along with a set of exhibits, as well as a separate set of exhibits from the developer.

Procedural and Legal Questions and Concerns

At the October 2 Planning Commission meeting, a number of procedural and legal questions and concerns were raised by the Planning Commission. These are addressed below.

Subdivision Entrance Sign.

The applicant had proposed a subdivision entrance sign located in the planned median of the entrance road. The zoning code prohibits subdivision entrance signs. The applicant has withdrawn the proposal for a subdivision entrance sign. The email from the applicant withdrawing the entrance sign proposal is attached.

Lot Combination and 80 Acre Requirement

A concern expressed at the Planning Commission meeting was that all of the individual parcels included in the proposed PLCD were required to be combined prior to the submittal of a PLCD subdivision application, because the PLCD ordinance allows only parcels of 80 acres or more to be included in a PLCD application. The actual language of the ordinance is as follows: "A PLCD is a **tract** of land that is developed as a unit under single or unified ownership or controls… The **tract** is a minimum of eighty (80) contiguous acres in size." The PLCD ordinance does not require individual parcels to be 80 acres or more. The current application meets the size requirement without the need to combine all individual parcels that are less than 80 acres.

Documents

As part of the application package, the applicant submitted a large number of documents, including several lengthy technical reports. To manage the size of the agenda packet for the Planning Commission, the technical reports were not included in the hard copy agenda packet mailed to the Planning Commission members. Instead they were posted on-line along with the remainder of the agenda packet. While this was noted in the Planner's Report to the Planning Commission, several members were not aware of this. To avoid this confusion, all technical reports have been included in the hardcopy agenda packet, which is also posted on-line.

Copies of Applications

The Planning Commission Chair had questioned whether the applicant had submitted applications for the rezoning, preliminary plat and conditional use permit, because the agenda packet did not include copies of the applications. Copies of the submitted applications are attached.

Preliminary Plat Lot Numbers

At the Planning Commission meeting, there was confusion about lot numbers, due to the plat including two lots designated as lot 1, and with confusion about a lot 18 vs. lot 19. This confusion arose due to a change in the layout of the plat that changed the lot numbers. In the sketch plan, the plat layout was shown as 20 lots within one block. In the preliminary plat, the lots are shown in two blocks. Block 1 is the area in the southwest corner of the plat, and includes lot 1 of Block 1. Block 2 includes the remainder of the lots, from lot 1 of Block 2 to lot 18 of Block 2.

Property Identification (PID) Numbers

At the Planning Commission meeting there was a question regarding whether the description of the property included the correct PID numbers. The description of the property as it appears in the subject line of the Planning Commission cover memo and as it appears in the subject line of this memo includes the correct address of the 5–acre parcel included in the PLCD application and the correct PID numbers of all other parcels included in the PLCD application. In reviewing the notice of public hearing, the notice included the correct address of the 5-acre parcel and the correct PID numbers of all other parcels, with the exception that it did not include the parcel with PID number 33.028.20.33.0004, which is located between two other parcels.

Setback of the New Public Road from an Adjacent Parcel.

The neighbors adjacent to the project have expressed a concern about the location of the proposed new public road to serve the subdivision in the southeast corner of the site where it is close to the property line of the adjacent parcel to the east. The concern is that the new public road would place a new setback requirement on the adjacent property based on the required setback being 105 feet from the centerline of the road. They believe that if the centerline of the road is located closer to the adjacent parcel's lot line than 105 feet, a portion of the adjacent parcel could become unbuildable due to a larger setback area. The developer has indicated the centerline of the road is 75 feet from the property line. This would extend the setback line 30 feet into the adjacent property. However, the adjacent parcel is already subject to a 50 foot setback in this area, so there would be no additional setback impact on the adjacent parcel.

Process and Timing of Application Review

It has been suggested that each of the applications should be processed and reviewed at separate meetings with separate public hearings. The structure of the Planning Consultant's report on the application reflects the structure and timing of the process of reviewing the three applications received. The first application is for the rezoning of the 5 acre parcel in the southeast corner of the property with address 14220 60th Street. The Planner's report indicates the rezoning application should be addressed prior to addressing the preliminary plat and CUP applications, and provides background information needed to assist in the consideration of the application. The Planning Commission Chair has indicated that the rezoning application needs to be addressed before the preliminary plat and CUP applications can be considered. The Planning Consultant agrees with the Planning Commission Chair that the rezoning action must precede action on the preliminary plat and conditional use permit. However, the Planning Consultant has indicated that, in his experience, these types of applications commonly are addressed through one public hearing, since the rezoning is commonly tied to the development proposal reflected in the preliminary plat. Because conditions cannot generally be placed on a rezoning, it is important that the Planning Commission and Council are familiar with the preliminary plat proposal at the time they are considering the rezoning proposal.

Shoreland Overlay District and Setbacks.

It has been stated by a member of the public that the site is in a watershed district that requires a 1,000 foot setback from the Trout Brook Creek. This is not correct. The site is in the South Washington Watershed District, which does not require a 1,000 foot setback from the creek. In the definition section of Article III. Shoreland Management, "Shoreland" means land located within the following distances from public waters: 1,000 feet from the ordinary high water level of a

lake, pond, or flowage; and 300 feet from a river or stream, or the landward extent of a floodplain designated by ordinance on a river or stream, whichever is greater. However, the definition of shoreland is not the same as the required setbacks within the shoreland. The Shoreland Overlay District requires a 200 foot setback from the creek for all structures.

Irregularly-shaped lot # 18.
Concerns have been expressed regarding the irregular shape of lot 18, particularly the southern portion which gets very narrow and then wider. This southerly portion of the lot is planned for a stormwater pond. A drainage easement will need to be placed over this portion of the lot. Because the lot significantly exceeds the 5 acre minimum lot size, this portion of the lot could also be separated from the lot and owned by the Home Owners Association for use as a stormwater pond.

Vote Needed for a Rezoning
The Planning Commission questioned whether a 4/5ths vote of the City Council is required for a rezoning. The City Attorney has indicated the statutory requirement is that a 3/5ths vote is required for all rezonings except where the rezoning is from residential to commercial or industrial.

Traffic Safety
The attached report from the City Engineer outlines the analysis regarding the proposed intersection and the Trading Post trail curve and the determination that there is no evidence or data that has been submitted that shows there are any safety issues associated with the access road or the approaches from Trading Post and 60th Street.

Number of Lots Allowed on a Cul De Sac
Both the subdivision ordinance and the PLCD ordinance allow a cul de sac to be longer than the allowed 1320 feet. While the subdivision ordinance indicates a variance shall not be granted to allow more than 9 lots on a cul de sac, the PLCD ordinance does not include the same prohibition. The PLCD ordinance indicates its purpose is *to encourage a more creative and efficient development of land and its improvements through the preservation of agricultural land, natural features and amenities* ***than is possible under the more restrictive application of zoning requirements***, The PLCD ordinance is a type of planned unit development ordinance that allows flexibility in zoning requirements to achieve a better land use solution. The Planning Consultant, based on his experience with these types of ordinances, has indicated he believes the language in the PLCD ordinance that allows a longer cul de sac also would by association, allow more than 9 lots on a cul de sac. Such interpretation is made within the context of the PLCD and its intention to allow certain "flexibilities" which will result in the preservation of natural features and minimize negative impacts upon adjacent properties.

To be noted is that an attempt was made by the applicant to meet the referenced 1,320 foot maximum cul-de-sac length requirement and maximum number of nine lots having access to such cul-de-sacs as part of the sketch plan review process. Specifically, a concept plan was submitted which included a "loop street" connection between 60th Street and Odell Avenue. Such concept however, received a significant amount of neighborhood opposition and the plan was subsequently modified to provide a single access point from 60th Street.

The City Attorney has advised that the PLCD ordinance can be used to provide flexibility in the application of zoning regulations, and the Council could provide a preliminary approval of a plan that includes more than 9 lots on a cul de sac, subject to approval of a variance application for more than 9 lots on a cul de sac. While the subdivision ordinance indicates such a variance shall not be granted, it is the City Attorney's opinion that the Council has the authority to grant such a variance if desired. The Planning Consultant understands this interpretation, as the PLCD provisions do not make a specific exception to allow more than nine lots on a cul-de-sac.

In reviewing past zoning ordinances, the language providing that a variance to allow more than 9 lots on a cul de sac was not allowed was in place in the subdivision regulations at least back to 2006. The PLCD ordinance was put in place after that time as an amendment to the former Planned Agricultural Unit Development (PAUD) ordinance. Although the cul de sac language was in place in the subdivision regulations, it was not added to the PLCD ordinance.

Definition of Cul de Sac

At the Planning Commission meeting, a question was raised as to the definition of a cul de sac. The City's zoning code does not have a definition of cul de sac. However, the Planning Consultant has provided the following definition from the glossary of land use planning terms as follows: ***Street, cul-de-sac.*** *A street with a single common ingress and egress with a vehicular turnaround at the closed end*

Conformance with the Comprehensive Plan

The Comprehensive Plan specifically allows the use of a Preservation and Land Conservation Development in the Agricultural Zone subject to setting aside an extensive portion of the property for continued farming or conservation.

Rezoning

The development proposal includes an application for the rezoning of the 5-acre parcel in the southeast corner of the site from Rural Residential to Agricultural. This parcel is bordered by Agricultural zoning on two sides, by Rural Residential zoning on one side, and by the Denmark Township boundary on one side which has zoning similar to Rural Residential. The boundary between the Rural Residential and Agricultural zones in the area of this parcel is a vertical line north of the eastern boundary of the parcel. The parcel is an anomaly in that it juts out from the Rural Residential zone into what is generally the Agricultural zone. The rezoning would result in a straight line boundary between the Rural Residential and Agricultural zones along the eastern boundary of the PLCD site. The Agricultural zone allows less intensive development than does the Rural Residential zone.

The property is currently zoned RR Rural Residential which allows agricultural land uses and single family residential uses at a density of one lot per five acres, or up to eight lots per 40 acres.

The proposed AG, Agricultural zone allows agricultural land uses, single family dwellings at a density of three lots per quarter-quarter section and single family dwellings at a density of four lots per 40 acres with a Preservation and Land Conservation Development (PLCD) subdivision.

The subject site is surrounded by the following existing and planned land uses:

Direction	Land Use Plan	Zoning Map	Existing Use
North	Agriculture	AG District	Agricultural
East	Rural Residential	RR District	Single family
South	Rural Residential	RR District	Single family
West	Agriculture	AG District	Agricultural and Single family

Because the parcel is at the minimum lot size of 5 acres, a rezoning from Rural Residential to Agricultural would not increase or decrease the density of development allowed on the parcel. However, the density generally allowed in the RR zone is twice the density allowed in the Ag zone. The rezoning from RR to Ag would not make it in conflict with the Comprehensive Plan in terms of the types and density of land use. For this reason, the Met Council staff have indicated it appears that a Comprehensive Plan amendment would not be required. The City's planning consultant has suggested that the zoning map in the Comprehensive Plan could be updated as part of the update process the City is currently working on.

Park Dedication

The park dedication requirement is based on the impact of new lots on the City's park system. The park dedication requirement can be met by a cash contribution or land dedication or a combination of the two. The PLCD is somewhat unique in that the applicant is required to set aside 50% of the land to be preserved as open space in perpetuity through a conservation easement. The open space area is not dedicated to the City. It continues to be owned by the developer or

the Homeowners Association, who continue to be responsible for the maintenance of the land and responsible for ensuring it is preserved according to the conservation easement. The PLCD does not require that the open space area be made available for access by the public. This open space area is independent of the park dedication requirement. However, the developer has proposed to provide public access to the open space area through a public parking area and two scenic overlooks and through a public access easement providing pedestrian access to a set of public trails running through the open space area.

The Parks Committee has recommended that, if the proposed public access is provided to the open space area, the park dedication requirement should be met by a cash contribution. The developer has suggested that, if public access is provided to the open space area, the open space area should be considered as meeting the park dedication requirement. The City Attorney has indicated that, while the set-aside of the open space area does not generally meet the park dedication requirements, if some level of public access to the open space area is provided and is required as part of an approval, it moves closer to the point where a portion of the open space area could be considered as meeting the park dedication requirement. As a determination is made regarding the extent of public access to the open space area is desired, it will help to inform a determination as to whether a portion of the open space area should be considered as meeting the park dedication requirement. To be noted is that the City is not "required" to accept the proposed public access to open space as fulfillment of park dedication requirements.

Planning Commission Recommendations

Rezoning

The Planning commission, on a vote of 7-0-0, recommended the denial of the rezoning application based on the rezoning not being addressed separately prior to the preliminary plat application and based on the criteria for the rezoning not being clearly laid out.

Preliminary Plat

The Planning commission, on a vote of 7-0-0, recommended denial of the preliminary plat application based on the rezoning not being addressed prior to the preliminary plat application and based on questions regarding the safety of the proposed intersection and the number of lots allowed on a cul de sac, as well as the irregular shape of lot 19.

Conditional Use Permit

The Planning Commission, on a vote of 7-0-0, recommended denial of the Conditional Use Permit application until the parcel at 14220 60th Street is rezoned.

Resolutions

Attached are resolutions of denial reflecting the Planning Commission recommendations as well as resolutions of approval for the Council's consideration.

Council Action Requested:

- **Motion regarding the adoption of a resolution regarding the rezoning of the parcel at 14220 60th Street from Rural Residential to Agricultural**
- **Motion regarding the adoption of a resolution regarding the preliminary plat application**
- **Motion regarding the adoption of a resolution regarding the conditional use permit application**

PLANNING REPORT

TO:	Afton Mayor and City Council Afton Planning Commission
FROM:	Bob Kirmis
DATE:	October 10, 2017
SUBJECT:	Afton - Afton Creek Preserve - Rezoning, Preliminary Plat and Conditional Use Permit (for PLCD)
CASE NO:	280.02 - 17.03

Date Application Determined Complete:	August 14, 2017
Planning Commission Meeting Date:	October 2, 2017
City Council Meeting Date:	October 17, 2017
60-day Review Deadline:	October 13, 2017
120-day Review Deadline:	December 12, 2017

Note: Extensions to the 60-day review deadline for the rezoning and conditional use permit applications have taken place

BACKGROUND

Joe Bush, on behalf of J.P Bush Homes, has requested preliminary plat approval of a 19 lot, preservation and land conservation development (PLCD) entitled "Afton Creek Preserve." The subject site overlays 219 acres of land located north of 60th Street South (along the City's southern boundary) and west of Trading Post Trail South.

All proposed single family residential lots measure a minimum of 5 acres in size and are located primarily on the eastern half of the site. Of the 219 acres which comprise the subject site, 113 acres are proposed to lie within a conservation easement (intended to protect a trout stream and protect open space).

The subject site overlays seven individual parcels of land. With the exception of a 5-acre parcel located in the extreme southeast corner of the site (14220 60th Street), all parcels which comprise the subject site are zoned Ag, Agricultural. The 5-acre parcel in the southeast corner is zoned RR, Rural Residential.

That portion of the site which overlays the trout stream and adjacent flowage lie within the City's Shoreland Management Area, the boundaries of which measure 1,000 feet from each side of stream banks.

Also, to be noted is that the trout stream, as well as an adjacent flowage, lies within the City's Conservancy Overlay District, the intent of which is to manage areas with unique natural and biological characteristics.

To accommodate the proposed subdivision, the following approvals are necessary:

1. The rezoning of the 5-acre parcel located in the extreme southeast corner of the site (14220 60th Street) from RR, Rural Residential to Ag, Agricultural.

2. Preliminary Plat.

3. A conditional use permit to allow a PLCD in an Ag, Agricultural zoning district.

ISSUES AND ANALYSIS

Environmental Assessment Worksheet (EAW)

According to both Minnesota Statutes (Rules 4410.4300 Subpart 36) and the Afton City Code, an Environmental Assessment Worksheet (EAW) must be prepared for projects which result in the permanent conversion of 80 or more acres of agricultural, native prairie, forest, or naturally vegetated land to a more intensive developed land use.

As a qualifying project, an EAW was prepared for the proposed subdivision and such document was subject to review and comment by various agencies.

The purpose of the EAW process is to disclose information about potential environmental impacts of a project. Information disclosed in the EAW process is intended to determine whether a more detailed Environmental Impact Statement (EIS) is needed and to indicate how the project can be modified to lessen its environmental impacts.

Based upon a detailed review of the EAW and consideration of received comments from various agencies, the Afton City Council made a negative declaration regarding the need for an EIS at their September 19, 2017 Council meeting based on the following findings:

1. The City of Afton finds that the environmental effects of the project can be adequately anticipated, controlled and mitigated as a result of the environmental review, planning and permitting processes.

2. Environmental impact mitigation measures include the seeding of nearly all unwooded areas on the site to prevent erosion and create wildlife habitat, the establishment of conservation easements and scenic easements to protect wooded areas, steep slopes and the Trout Brook stream, and stormwater management facilities to control stormwater, protect water quality and prevent erosion.

To be noted is that the City Council's negative declaration for an EIS was made with an understanding that the following minimum conditions will be imposed to address environmental impacts:

1. Pre-development seeding will be provided on nearly all unwooded areas on the site
2. Conservation easements and scenic easements will be established to protect wooded areas, steep slopes and the trout Brook Stream.
3. Storm water management facilities will be provided to control storm water, protect water quality and prevent erosion.

Rezoning

To ensure that all property within the subdivision is afforded the same development rights (via zoning and CUP for the PLCD), a rezoning of the 14220 60th Street parcel located in the extreme southeast corner of the site from RR, Rural Residential to A, Agricultural is necessary.

The location of 5-acre site in question is illustrated on attached Exhibit C. As shown, the site is bordered by A, Agricultural zoned property to the north and west, by RR, Rural Residential zoned property to the east and Denmark Township to the south.

The majority of the 219-acre subject site (six of the seven included parcels) is guided for "agricultural" use by the City's Land Use Plan. Such land use designation directs a maximum density of one dwelling unit per 10 acres of land. Unlike all other parcels which comprise the subject site, the Land Use Plan directs "Rural Residential" use of the five-acre parcel located in the extreme southeast corner of the site. Such land use designation imposes a minimum 5-acre lot size requirement with a minimum of 2.5 acres of contiguous buildable area.

While minimum lot area standards in the A, Agricultural District for PLCD subdivisions are the same as those imposed within the RR, Rural Residential District (5 acres), it should be recognized that the zoning of the existing RR parcel is tied to its current legal description. The submitted preliminary plat calls for the reconfiguration of the RR parcel such that it will include public right-of-way and a portion of abutting Lot 2 to the west and Lot 19 to the north. Also, to be noted is that the RR District does not make an allowance for PLCDs.

The City Code does not establish a specific set of evaluation criteria for rezoning requests. It is believed however, that the following considerations justify the proposed zoning change:

1. PLCDs are not listed as a permitted use in the RR zoning district.

2. The 5-acre parcel is part of the proposed PLDC and its land area has been used in the calculation of allowed development density.

3. The City's Land Use Plan (map) designates the parcel in question for "Rural

Residential" use, with minimum 5-acre lot sizes. No change to the existing use is proposed. Thus, the physical use of the land is consistent with its Land Use Plan designation.

4. The parcel in question lies between lands guided "Rural Residential" and "Agricultural" uses. An original intention of the Land Use Plan related to the desired separation of these uses would not change as a result of the rezoning.

5. The configuration of the RR parcel in question will change as a result of the proposed subdivision. Without the zoning change, Lots 2 and 19 would hold two zoning designations (an undesirable condition).

In consideration of the preceding, Planning Staff recommends approval of the rezoning with a condition that such action not take effect until such time as the conditional use permit for the PLCD and the final plat are approved.

Preliminary Plat

Streets

Access. As shown on Exhibit B, access to most of the lots (18) within the subdivision is proposed via two cul-de-sacs which intersect 60th Street at a single point near Trading Post Trail. In review of the preliminary plat application materials, the City Engineer has found the proposed street intersection location and associated sight distances to be acceptable.

Aside from the 18 lots to be accessed via the 60th Street cul-de-sac, an additional lot is proposed in the extreme southwest corner of the site along 60th Street. Direct driveway access for such lot is proposed via 60th Street.

Access-related issues are also subject to comment and recommendation by the City Engineer.

Cul-de-Sac Length. As mentioned, 18 lots within the subdivision are proposed to be accessed via two cul-de-sacs. The proposed 60th Street roadway access technically splits into two cul-de-sacs. The longest of the two cul-de-sacs measures approximately 3,400 feet in length which significantly exceeds the maximum cul-de-sac requirement of 1,320 feet imposed in the City's Subdivision Ordinance.

In previous review of the sketch plan, feedback was requested from City Officials related to the acceptability of the proposed cul-de-sac length. As part of such consideration, Planning Staff noted that the Ordinance makes an allowance for cul-de-sac lengths within PLCD subdivisions which exceed the referenced cul-de-sac length requirement (provided that the preservation of the rural character and natural resources will result). The allowance for cul de sac length also allows for a proportional increase in the number of lots served by the cul de sac.

Planning Staff highlighted pros and cons associated with excessive cul-de-sac lengths. Ultimately, City Officials expressed general support for the cul-de-sac lengths as illustrated on the preliminary plat.

Right-of-Way Width. Consistent with City Code requirements, right-of way widths of 60 feet are illustrated for the two internal cul-de-sacs. Such right-of-way widths are consistent with local street classification requirements as outlined in the Subdivision Ordinance.

To be noted however, is that a right-of-way width of 66 feet is proposed along 60th Street. While it is assumed such dedication is intended to "match" the existing right-of-way width, this issue should be subject to further comment by the City Engineer.

Construction Requirements. Details related to street construction and any necessary improvements, including but not limited to 60th Street and/or Trading Post Trail, should be subject to comment and recommendation by the City Engineer, and may be included in the conditions placed on an approval of the proposed project.

Lots

Lot Area. The Ag, Agricultural District imposes a minimum lot size requirement of five acres. In addition, a minimum width and depth requirement of 300 feet is imposed. All proposed lots meet minimum area, width and depth requirements of the Ag, Agricultural District and Shoreland Management District.

The Zoning Ordinance states that each proposed single-family lot must have a buildable area of at least 2.5 acres. The Zoning Ordinance defines "buildable area" as land having a slope of 13 percent or less and having enough suitable soil for the installation of two on-site sewage treatment systems. The Ordinance also notes that "buildable area" may include required building setbacks. The submitted preliminary plat identifies the buildable area contained in each proposed lot. The buildable area within all lots has been found to exceed the minimum 2.5-acre requirement.

Lot Configuration. In regard to the proposed lot configuration, two design-related issues are considered worthy of notation.

Lot 1 of Block 1. As shown on the preliminary plat, proposed Lot 1 of Block 1, located in the southwest area of the subject site, is segregated from the balance of the lots in the subdivision. Unlike Lots 1-18 of Block 2, Lot 1of Block 1 is provided direct access to 60th Street and is surrounded on three sides by a conservation easement. While the appeal of Lot 1 is appreciated (in terms of isolation from neighbors, scenic views etc.), its location in the western one-third of the site isolates it from the balance of the subdivision lots and encroaches upon an area of the site primarily devoted to undisturbed open space.

Also, to be noted is that the placement of Lot 1 appears to contradict a general theme conveyed in the City Comprehensive Plan. Specifically, the City's Land Use Plan promotes a transition from "rural residential" uses east of the site to "agricultural" uses to the west.

An option that could be considered to address this issue, is that the "developable" land area devoted to Lot 1 be relocated north of Lots 9 through 12 and a "replacement" lot be provided along the proposed cul-de-sac.

Lot 19. While Lot 18, located in the southeast corner of the site, meets applicable lot area and width requirements of the Ordinance, it is oddly configured. Of specific issue

is the southernmost area of the lot (triangular-shaped) which is provided frontage on 60th Street. As shown on the preliminary plat, such area of the lot is segregated from the buildable portion of the lot to the north. Also, to be noted is that a stormwater pond is proposed in such area.

Considering that the lot exceeds the minimum lot area requirements of the Ordinance (the lot measures 5.6 acres in size), it is recommended that the area of Lot 18 which is devoted to stormwater storage be placed within an outlot to be owned by the Homeowners Association, and should be overlaid with a drainage and utility easement. An assurance should be made however, that the area of Lot 18 is not less than five acres in size as a result of such change. This issue should be subject to further comment and recommendation by the City Engineer.

Setbacks. Within the Ag, Agricultural District and the Shoreland Management District, the following minimum setbacks apply:

Side Yard:	50 feet
Front Yard:	105 feet (from roadway centerline)
Rear Yard:	50 feet
From OHWL of Trout Stream:	300 feet

It appears that all proposed lots illustrate an ability to meet the aforementioned setbacks (via illustrated building pads).

Landscaping. The submitted landscape plan calls for a total of 80 trees to be planted within the subdivision. Such trees are proposed to be dispersed in the front yards of Lots 4-18. No trees are proposed in the front yards of Lots 1, 2 and 3. It is assumed that existing vegetation on such lots does not lend themselves to additional front yard tree plantings. This should however, be confirmed by the applicant.

Proposed tree varieties (per the landscape plan) include the following:

- River Birch
- American Linden
- Blue Spruce
- White Pine
- Norway Spruce
- Sugar Maple
- Autumn Blaze maple
- Hackberry
- Red Oak
- Newport Flowering Plum
- Japanese Lilac
- Red Bud

To be noted is that the City Code does not impose minimum size requirements for proposed landscaping (including trees).

As noted previously, the City Council made a negative declaration regarding the need for an EIS with an understanding that pre-development seeding with a prairie grass/wildflower mix will be

provided on all lots and on the open space parcels. The applicant has provided a pre-development seeding plan in addition to the landscape plan.

Wetlands. According to the EAW, wetlands comprise 13 acres of the 219-acre subject site. Such wetlands lie along the trout stream and presently lie within conservation easements. In this regard, the proposed lot layout is not expected to impact any existing wetlands.

Wetland-related issues should be subject to further comment and recommendation by the City Engineer.

Easements

Conservation Easements. According to the Subdivision Ordinance, conservation easements must be established over designated open space within PLCDs. Attached Exhibit F illustrates two proposed conservation easement locations. In total, the two easement areas are proposed which overlay a total of 112.5 acres of land. Specifically, the proposed westerly easement measures 102.8 acres in size while the smaller easement located on the eastern half of the site measures 9.7 acres in size.

As a condition of PLCD (conditional use permit) approval, proposed conservation easements must run with the land in perpetuity to the following:

- The City of Afton
- All owners of the lots within the PLCD
- Landowners within Afton which abut the PLCD
- Minnesota Land Trust

Scenic Easements. In addition to the referenced conservation easements, Exhibit F also illustrates a number of scenic easements which overlay portions of proposed lots. Such easements correspond to existing woodland areas and will ensure that such areas will be protected from development.

Access Easements. Also proposed within the subdivision are two access easements. Such easements provide an area within which pedestrian connections can be made between the proposed cul-de-sac and designated open spaces. To be noted is that the width of the proposed access easements is not specified on the preliminary plat. Desired access easement widths should be subject to recommendation by the City Engineer and/or Fire Chief.

Drainage and Utility Easements. According to Section 12-1384 of the Subdivision Ordinance, easements at least 20 feet wide, centered on rear and other lot lines, must be provided where necessary as recommended by the City Engineer. Further, the Ordinance states that easements for drainage must be provided of a sufficient width to provide for stormwater runoff.

Easements for drainage and utilities should be provided over individual lots as recommended by the City Engineer.

Septic Systems. The preliminary plat and related engineering plans illustrate "septic system testing area" locations upon individual lots. To be noted however, is that Section 12-413 of the

Zoning Ordinance stipulates that primary and secondary septic sites must be illustrated on preliminary plat drawings. This issue should be subject to comment and recommendation by the City Engineer and/or Washington County Department of Public Health. The applicant has provided a soil boring report that shows suitable soils for septic systems for each lot, except lot 1 of block 1, which was relocated to the east after the soil borings were done. Additional soil borings will be completed for lot 1. Permits for individual sewage treatment systems will be issued by the Washington County Department of Public Health. In this regard, review of proposed septic designs and final septic permits must be received from Washington County prior to building permit approval.

Park Dedication. According to Section 12-1270 of the Subdivision Ordinance, subdividers must dedicate to the City a reasonable portion of the land being subdivided for park purposes or in lieu thereof, a cash equivalent. The form of dedication, land or cash, (or any combination) must be decided by the City and dedicated or paid prior to the City signing the final plat.

While it is recognized that the applicant wishes to allow public access to designated open spaces, it is City Staff's position that the granting of a conservation easement over the permanent open space parcels within the plat is not considered fulfillment of the City's parkland dedication requirements. Rather, the granting of a conservation easement over the permanent open space provides the means to subdivide the subject property (agriculturally zoned) in the manner proposed.

The City's 2012 Park Plan does not illustrate any future parks or trails within the subject site. With this in mind, a calculation of a possible cash contribution (as opposed to land dedication) is considered worthwhile. According to the Ordinance, a cash park dedication fee, in lieu of land dedication, shall be equivalent to 7.5 percent of the predevelopment value of the land to be subdivided, subject to a minimum fee of $5,000 per dwelling unit and a maximum fee of $10,000 per dwelling unit.

The City's Parks Committee is scheduled to consider the preliminary plat at their September 27, 2017 meeting and provide a recommendation related to park dedication. Because such meeting date follows the date of the Planning Commission meeting packet distribution, conveyance of the Park Commission's recommendations will be provided at the October 2, 2017 Planning Commission meeting.

Planning Staff supports the dedication of land rather than a cash contribution. In this regard, it is suggested that the current Lot 1of block 1location be considered as a possible park land dedication for the following reasons:

- Permanent and highly desirable views to the north, east and west would be provided which extend well beyond the boundaries of the suggested park site. As a public park, such views would be available for all citizens of Afton to enjoy.

- The suggested park location would be provided suitable public access (along 60th Street) which would not require park patron encroachment into the proposed residential neighborhood.

- Such a park location may result in the relocation of a single family residential lot which would otherwise be isolated from the proposed neighborhood to the east.

Based in part upon the recommendations of the Parks Committee and City Staff, the Planning

Commission should recommend, and the City Council determine, desired park land dedication and/or equivalent cash contribution requirements.

Development Agreement. As part of future final plat approval, the applicants will be required to enter into a development agreement with the City and post any financial securities required by it. This issue should be subject to further comment by the City Attorney.

Conditional Use Permit

Purpose of PLCD. Within the A, Agricultural zoning district, PLCD's are listed as a conditional use. As a result, the approval of a conditional use permit is required.

According to the City Code (Section 12-2373), preservation and land conservation developments (PLCD), are intended to:

A. *Permit subdivisions in the Agricultural Zoning District which require the construction of a new public street.*

B. *Encourage a more creative and efficient development of land and its improvements through the preservation of agricultural land, natural features and amenities than is possible under the more restrictive application of zoning requirements, while at the same time, meeting the standards and purposes of the comprehensive plan and preserving the health, safety, and welfare of the citizens of the City.*

C. *Preserve open space, to preserve the natural resources of the site and to preserve wildlife habitat and corridors.*

D. *Facilitate the economical provision of streets and public utilities.*

E. *Allow the transfer of development rights (density) within a subdivision in order to preserve agricultural land, open space, natural features and amenities.*

Provided certain conditions are satisfied, Staff believes that the proposed subdivision will fulfill the preceding PLCD objectives.

Development Density. Within PLCD developments, specific density requirements are imposed. Specifically, at least 50 percent of the total site must be preserved as an undeveloped parcel. Further, the maximum density of the underlying zoning district must not be exceeded.

As shown on the preliminary plat, a total of 19 lots are proposed upon the 218.6 acres subject site. The A, Agricultural District imposes a minimum density requirement of one dwelling unit per 10 acres of land. The development density requirements of the Ordinance have been satisfied (218.6 acres / 19 units = 11.5 acres per unit).

Use of Open Space. As part of formal subdivision processing, the intended use of the designated open space should be conveyed by the applicant. Of specific interest are any intended recreational purposes and the future construction of facilities intended to accompany such uses.

According to the PLCD requirements of the Ordinance (Section 12-2383), buildings, structures and improvements located upon the undeveloped parcel (conservation easement areas) must

be designed in a manner which conserve and enhance the amenities of the parcel about its topography and its unimproved condition.

Also, to be noted is that Section 12-2381 of the Ordinance stipulates that construction of recreational facilities shown on the PLCD development plan must proceed at the same time as the construction of the dwelling units.

Homeowner's Association Requirements. Section 12-2382 of the Ordinance states that, if a homeowner's association is to be created, its various requirements (ownership requirements, bylaws, etc.) must be submitted as part of the PLCD for City review.

The applicant has provided a copy of proposed covenants, restrictions and conditions which would apply to property owners within the subdivision. Requirements include, but are not limited to, the following:

- Association duties
- Assessments
- Architectural controls
- Use of common properties
- Prohibited uses
- Water maintenance/management

Homeowner's association-related issues should be subject to further comment by the City Attorney.

RECOMMENDATION

Based on the preceding review, Planning Staff recommends the following:

A. Approval of the **rezoning** of five-acre site located in the extreme southeast corner of the subject property (14220 60th Street and PID # 3302820330002) from RR, Rural Residential to A, Agriculture subject to the following condition:

   1. The rezoning action not take effect until such time as the Afton Creek Preserve final plat and conditional use permit for the PLCD have been approved.

B. Approval of the Afton Creek Preserve **preliminary plat** subject to the following conditions:

   1. The City approve the rezoning of 14220 60th Street (PID # 3302820330002) from RR, Rural Residential to Ag, Agriculture.

   2. Access-related issues shall be subject to further comment and recommendation by the City Engineer.

   3. The City Engineer provide comment and recommendation regarding 60th Street right-of-way width requirements.

   4. Details related to street construction and any necessary street improvements,

including but not limited to 60th Street and/or Trading Post Trail, shall be subject to comment and recommendation by the City Engineer.

6. The southernmost area of Lot 19 which is devoted to stormwater storage be placed within an outlot and overlaid with a drainage and utility easement. In no case however, shall the area of Lot 19 be less than 5 acres in size. This issue shall be subject to further comment and recommendation by the City Engineer.

7. The applicant provide explanation (acceptable to the City) regarding the lack of proposed front yard tree plantings for Lots 1, 2 and 3.

8. Note predevelopment seeding plan.

9. Wetland-related issues shall be subject to further comment and recommendation by the City Engineer.

10. Desired access easement widths shall be subject to recommendation by the City Engineer and/or Fire Chief.

11. Easements for drainage and utilities shall be provided over individual lots as recommended by the City Engineer.

12. The City Engineer and/or Washington County Department of Public Health provide comment and recommendation regarding the need to illustrate primary and secondary septic sites upon the preliminary plat.

13. Review of proposed septic designs and final septic permits shall be received from Washington County prior to building permit approval.

14. City Officials determine desired park land dedication and/or equivalent cash contribution requirements.

15. Comments of other City Staff.

C. Approval of the **conditional use permit** to allow a PLCD within an AG, Agriculture zoning District subject to the following conditions:

1. The City approve the Afton Creek Preserve final plat.

2. Proposed conservation easements shall run with the land in perpetuity to the following:

   - The City of Afton
   - All owners of the lots within the PLCD
   - Landowners within Afton which abut the PLCD
   - Minnesota Land Trust

3. Intended use (or uses) of conservation easement areas shall be described by the

applicant, approved by the City and made conditions of conditional use permit approval.

3. Buildings, structures and improvements located within conservation easement areas shall be designed in a manner which conserve and enhance the amenities of the parcel about its topography and its unimproved condition.

4. Construction of recreational facilities within conservation easement areas shall proceed at the same time as the construction of the dwelling units.

5. Homeowner's association-related issues shall be subject to further comment by the City Attorney.

6. Comments of other City Staff.

pc. Ron Moorse, City Administrator

RESOLUTION 2017 - 49

CITY OF AFTON
WASHINGTON COUNTY, MINNESOTA

A RESOLUTION DENYING THE WILL CARLSON APPLICATION FOR A REZONING OF THE PARCEL AT 14220 60TH STREET FROM RR RURAL RESIDENTIAL TO AG AGRICULTURAL

WHEREAS, the City of Afton is a municipal corporation organized and existing under the laws of the State of Minnesota; and

WHEREAS, the City Council of the City of Afton has adopted zoning, subdivision, and building regulations as part of the Afton Code of Ordinances, to promote the orderly, economic, and safe development and utilization of land within the City; and

WHEREAS, Will Carlson has made an application to the City for approval of a rezoning of the parcel at 14220 60th Street from RR Rural Residential to Ag e; and

WHEREAS, the Planning Commission of the City of Afton held a Public Hearing regarding the rezoning application at their meeting on October 2, 2017, and recommended denial of the rezoning application on a vote of 7-0-0; and

WHEREAS, the City Council reviewed the rezoning application at their meeting on October 17, 2017.

NOW, THEREFORE BE IT RESOLVED that the City Council of the City of Afton does hereby DENY the Will Carlson rezoning application at 14220 60th Street with the following Findings of Fact:

FINDINGS: Based upon review of the application and evidence received, the Afton City Council now makes the following findings of fact:

A. There is not an agricultural use proposed as the end result of the rezoning
B. The criteria for the approval of a rezoning have not been clearly laid out
C. The parcel is directly adjacent to a large area zoned Rural Residential
D. The parcel is a five-acre parcel, with an existing house, which meets the minimum lot requirement of the Rural Residential zone.
E. The rezoning application was not addressed separately prior to the submittal of the preliminary plat application and was not addressed in a separate public hearing
F. The information provided with the application did not demonstrate that the proposal meets the high standards of the City regarding rezoning.

ADOPTED BY THE CITY COUNCIL OF THE CITY OF AFTON THIS 17th DAY OF OCTOBER, 2017.

RESOLUTION 2017 - XX

CITY OF AFTON
WASHINGTON COUNTY, MINNESOTA

A RESOLUTION APPROVING THE WILL CARLSON APPLICATION FOR A REZONING OF THE PARCEL AT 14220 60TH STREET FROM RR RURAL RESIDENTIAL TO AG AGRICULTURAL

WHEREAS, the City of Afton is a municipal corporation organized and existing under the laws of the State of Minnesota; and

WHEREAS, the City Council of the City of Afton has adopted zoning, subdivision, and building regulations as part of the Afton Code of Ordinances, to promote the orderly, economic, and safe development and utilization of land within the City; and

WHEREAS, Will Carlson has made an application to the City for approval of a rezoning of the parcel at 14220 60th Street from RR Rural Residential to Ag Agricultural; and

WHEREAS, the Planning Commission of the City of Afton held a Public Hearing regarding the rezoning application at their meeting on October 2, 2017, and recommended denial of the rezoning application on a vote of 7-0-0; and

WHEREAS, the City Council reviewed the rezoning application at their meeting on October 17, 2017.

NOW, THEREFORE BE IT RESOLVED that the City Council of the City of Afton does hereby APPROVE the Will Carlson rezoning application at 14220 60th Street with the following Findings of Fact:

FINDINGS: Based upon review of the application and evidence received, the Afton City Council now makes the following findings of fact:

A. The legal description of the property is attached as Exhibit A.

B. The property is guided for agricultural land uses and single family residential uses by the 2008 Afton Comprehensive Plan, as amended.

C. The property is currently zoned RR Rural Residential which allows agricultural land uses and single family residential uses at a density of one lot per five acres, or up to eight lots per 40 acres.

D. The proposed AG, Agricultural zone allows agricultural land uses, single family dwellings at a density of three lots per quarter-quarter section and single family dwellings at a density of four lots per 40 acres with a Preservation and Land Conservation Development (PLCD) subdivision.

D. The subject site is surrounded by the following existing and planned land uses:

Direction	Land Use Plan	Zoning Map	Existing Use
North	Agriculture	AG District	Agricultural
East	Rural Residential	RR District	Single family
South	Rural Residential	RR District	Single family
West	Agriculture	AG District	Agricultural and Single family

E. The boundary of the AG zone runs north/south parallel to the east boundary of the subject parcel proposed to be rezoned. The parcel jogs westerly into an area that is zoned AG, so that it is surrounded on two sides by AG zone, on one side by the Denmark township boundary and on one side by the RR zone.

F. The City's Land Use Plan (map) designates the parcel in question for "Rural Residential" use, with minimum 5-acre lot sizes. No change to the existing use is proposed. Thus, the physical use of the land is consistent with its Land Use Plan designation.

G. The parcel in question lies between lands guided "Rural Residential" and "Agricultural" uses. An original intention of the Land Use Plan related to the desired separation of these uses would not change as a result of the rezoning.

Conditions of Approval:

1. The rezoning action not take effect until such time as the Afton Creek Preserve final plat and conditional use permit for the PLCD have been approved.

ADOPTED BY THE CITY COUNCIL OF THE CITY OF AFTON THIS 17th DAY OF OCTOBER, 2017.

RESOLUTION 2017 - 50

CITY OF AFTON
WASHINGTON COUNTY, MINNESOTA

A RESOLUTION DENYING A PRELIMINARY PLAT FOR THE AFTON CREEK PRESERVE SUBDIVISION NORTH OF 60TH STREET AND WEST OF TRADING POST TRAIL IN THE CITY OF AFTON

WHEREAS, the City of Afton is a municipal corporation organized and existing under the laws of the State of Minnesota; and

WHEREAS, the City Council of the City of Afton has adopted zoning, subdivision, and building regulations as part of the Afton Code of Ordinances, to promote the orderly, economic, and safe development and utilization of land within the City; and

WHEREAS, Will Carlson has made an application to the City for approval of a Preliminary Plat to subdivide a 219 acre site into a 19 -lot single-family Preservation and Land Conservation subdivision called Afton Creek Preserve; and

WHEREAS, the Planning Commission of the City of Afton held a Public Hearing for the Afton Creek Preserve Preliminary Plat at their meeting on October 2, 2017, and recommended denial of the Preliminary Plat application on a vote of 7-0-0; and

WHEREAS, the City Council reviewed the Preliminary Plat at their meeting on October 17, 2017.

NOW, THEREFORE BE IT RESOLVED that the City Council of the City of Afton does hereby DENY the Afton Creek Preserve Preliminary Plat, with the following Findings of Fact:

FINDINGS: Based upon review of the application and evidence received, the Afton City Council now makes the following findings of fact:

A. The five acre parcel at 14220 60th Street, which is an integral part of the preliminary plat, and which is zoned Rural Residential, needs to be rezoned to Agricultural prior to considering the approval of the preliminary plat.
B. Questions and concerns regarding the safety of the access intersection for the proposed subdivision have not been adequately addressed.
C. Lot 19 is irregularly shaped and needs to be eliminated.
D. Questions and concerns regarding the number of lots on the proposed cul de sac have not been adequately addressed.

A RESOLUTION APPROVING A PRELIMINARY PLAT FOR THE AFTON CREEK PRESERVE SUBDIVISION NORTH OF 60TH STREET AND WEST OF TRADING POST TRAIL IN THE CITY OF AFTON

WHEREAS, the City of Afton is a municipal corporation organized and existing under the laws of the State of Minnesota; and

WHEREAS, the City Council of the City of Afton has adopted zoning, subdivision, and building regulations as part of the Afton Code of Ordinances, to promote the orderly, economic, and safe development and utilization of land within the City; and

WHEREAS, Will Carlson has made an application to the City for approval of a Preliminary Plat to subdivide a 219 acre site into a 19 -lot single-family Preservation and Land Conservation subdivision called Afton Creek Preserve; and

WHEREAS, the Planning Commission of the City of Afton held a Public Hearing for the Afton Creek Preserve Preliminary Plat at their meeting on October 2, 2017, and recommended denial of the Preliminary Plat application on a vote of 7-0-0; and

WHEREAS, the City Council reviewed the Preliminary Plat at their meeting on October 17, 2017.

NOW, THEREFORE BE IT RESOLVED that the City Council of the City of Afton does hereby approve the Afton Creek Preserve Preliminary Plat, with the following Conditions and Findings of Fact:

FINDINGS: Based upon review of the application and evidence received, the Afton City Council now makes the following findings of fact:

A. The legal description of the property is attached as Exhibit A.

B. The property is guided for agricultural land uses by the 2008 Afton Comprehensive Plan, as amended.

C. The property is zoned Ag, Agricultural, which allows single family dwellings as a permitted use and a Preservation and Land Conservation Development (PLCD) subdivision as a conditional use.

D. The subject site is surrounded by the following existing and planned land uses:

Direction	Land Use Plan	Zoning Map	Existing Use
North	Agriculture	AG District RR District	Agriculture Single family
East	Rural Residential	RR District	Single family
South	Rural Residential	RR District	Single family
West	Rural Residential	RR District	Single family

E. The applicant is requesting approval of a preliminary plat to allow for subdivision of 19 single family lots, including one lot with an existing single family dwelling and accessory structure, processed in accordance with Section 12-1329 of the Subdivision Ordinance and Section 12-XX-

the PLCD ordinance.

Conditions of Approval:

1. The City approve the rezoning of 14220 60th Street (PID # 3302820330002) from RR, Rural Residential to Ag, Agriculture.

2.Access-related issues shall be subject to further comment and recommendation by the City Engineer.

3.The City Engineer provide comment and recommendation regarding 60th Street right-of-way width requirements.

4.Details related to street construction and any necessary street improvements, including but not limited to 60th Street and/or Trading Post Trail, shall be subject to comment and recommendation by the City Engineer.

5.The southernmost area of Lot 19 which is devoted to stormwater storage be placed within an outlot and overlaid with a drainage and utility easement. In no case however, shall the area of Lot 19 be less than 5 acres in size. This issue shall be subject to further comment and recommendation by the City Engineer.

6.The applicant provide explanation (acceptable to the City) regarding the lack of proposed front yard tree plantings for Lots 1, 2 and 3.

7.Implementation of the predevelopment seeding plan.

8Wetland-related issues shall be subject to further comment and recommendation by the City Engineer.

9.Desired access easement widths shall be subject to recommendation by the City Engineer and/or Fire Chief.

10.Easements for drainage and utilities shall be provided over individual lots as recommended by the City Engineer.

11.The City Engineer and/or Washington County Department of Public Health provide comment and recommendation regarding the need to illustrate primary and secondary septic sites upon the preliminary plat.

12.Review of proposed septic designs and final septic permits shall be received from Washington County prior to building permit approval.

13.City Officials determine desired park land dedication and/or equivalent cash contribution requirements.

J.P. Bush
HOMES

August 14, 2017

City of Afton Preliminary Plat Application Narrative.

Property: 14220 60th St S Afton MN 55001
Will Carlson owned 218.6 Acres

Usage: Previously operated under Agriculture Zoning.
Request to Use Ordinance Article XII Sec. 12-2371
PRESERVATION AND LAND CONSERVATION DEVELOPMENTS

Proposer: Will Carlson, Land Owner.
JP Bush Homes, Developer.

The proposed subdivision called "Afton Creek Preserve" describes this PRESERVATION AND LAND CONSERVATION DEVELOPMENT (PLCD) in its own title. Afton Minnesota and its residence have kept their community and developments well preserved for its rural character and Preservation of open space and parks.

Per the 2008 Comprehensive Plan, later Adopted **2012 Afton Parks Plan.** A priority for the acceptance of land in lieu of Park Dedication funds should be to obtain designated open spaces to provide for wildlife corridors, as well as to protect locally important water resources and scenic and natural features. Open space is defined as public land for use by the public.

Article XII. Sec 12-2371 PRESERVATION AND LAND CONSERVATION DEVELOPMENTS (PLCD) States **Sec. 12-2373. Purpose.** A. To permit subdivisions in the Agricultural Zoning District which require the construction of a new public street. B. To encourage a more creative and efficient development of land and its improvements through the preservation of agricultural land, natural features and amenities than is possible under the more restrictive application of zoning requirements, while at the same time, meeting the standards and purposes of the comprehensive plan and preserving the health, safety, and welfare of the citizens of the City. C. To preserve open space, to preserve the natural resources of the site and to preserve wildlife habitat and corridors. D. To facilitate the economical provision of streets and public utilities. E. To allow the transfer of development rights (density) within a subdivision to preserve agricultural land, open space, natural features and amenities.

EXHIBIT A

Will Carlson and the Developer, JP Bush Homes desire to keep **The Afton City Code** and **2012 Parks Plan** by creating an allowed **PLCD** development at the location located at 14220 60th St S. Named **Afton Creek Preserve,** a well-planned model of this Code provision and Parks Plan. The developer has followed the proper steps and guidelines with the City of Afton City Administration in preparation for a PLCD platting. The developer has followed, organized and done the items listed to allow for Preliminary Plat application.

1. On site meeting in the fall of 2016 with, Members of the City of Afton administration, The Minnesota land Trust, Minnesota DNR, South Washington County watershed, The Developer, and Owner Will and Sandra Carlson.

2. Attended meetings and noted recommendations by both the Afton City Parks Committee and the NRGC Committee.

3. Scheduled informal work session meetings and noted recommendations by neighbors, City administration and City Engineering.

4. Scheduled additional on site walks with Neighbors, City Administration, City Engineers, DNR, South Washington Watershed, Minnesota Land Trust, Planning and Council members to discuss concerns, procedures, and vital input.

5. Completed EAW report by a licensed Environmentalist along with proper Public notifications and all required copies to governing agencies for proper feedback. Replied to all written comments from Metropolitan Council, MPCA, Water Shed, DNR, City Council and Neighbors.

6. Completed comprehensive Road Study. The City Administration and City Engineer worked closely to ensure our traffic study was performed with techniques that WSB thought appropriate. The traffic study results submitted to City and WSB on 8-1-2017 for Review. The results show The designed entrance location meets MINDOT and AASHTO for a safe entry and exit for the Afton Creek Preserve Development. Traffic Study Provided by Spack Consulting. A company with five engineers that have the credentials of Authoring two industry manuals which are used by traffic engineers around the world.

7. Coordinated submissions to Minnesota land Trust for the acceptance and subsequent acknowledgment to hold Afton Creek Preserve in trust. This acknowledgment meets requirements of the PLCD.

8. Coordinated support, design, and regulations in support of the PLCD from Minnesota DNR, South Washington County Watershed, Department of Agriculture, MPCA, Lakeland Fire Department.

9. Performed legal Survey work and documents to show site plan that outlines the intended purpose,

EXHIBIT A

Boundaries, Conservation open space, Roads, Lot configuration, Public access and usage, trails and overlooks. In addition: all the requirements listed for CUP and major Subdivisions with the Afton City Code.

10. Performed required soil borings from engineer a stated in the City Code for Platting.

11. Completed a full Septic testing and report for all 19 lots. Results and report are currently being reviewed by the Department of Health at Washington County.

12. Completed Grading and Storm Water management plan. This Engineered Plan shows a significant positive performance between the current AG land and the new PLCD Open Space. Our engineers Used software approved and used by the LGU (South Washington Watershed) called Hydro CAD, Win Slam, Rules2 etc. Our Proposed Prairie grass planting schedule thru out the entire development reverses the damages currently under AG usage. This eliminates concerns previously discussed by neighbors, DNR, Watershed and Wild Life Management officials.

13. Completed a planting design and contract from the Prairie Restoration Company to install, Manage And maintain the entire conservation area. This includes the developer installing Plantings on the entire open space and areas for lots 1-19. Immediately upon development Construction, all areas including conservation space and all lots 1-19 will be fully planted. Not until such time a lot is sold and construction of a Home begins will the individual lots be disturbed from the wild flower plantings. At which time the individual lot owners must submit to the Architectural Committee a full landscape plan that does not allow more than 50% of the wild Flower plantings to be disturbed.

14. Written and attached a "AFTON CREEK PRESERVE HOMEOWNERS ASSOCIATION DRAFT AND RESTRICTIVE COVENANTS" dated AUGUST 10, 2017. This document Outlines the restrictions, and Homeowners Association control of the land as required in the PLCD City Code and meets the requirements of connection with base acknowledgment provided by Minnesota Land Trust.

15. Developer completed the Site Plan of the development in accordance With recommendations noted from all meetings formal and informal. The provided Site Plan Is Attached Exhibit "A"

EXHIBIT A

The documents listed below are required and include added support information for the PLCD Preliminary plat Application.

1. All required copies of Maps, size and count. Site Plan, Grading plan, Septic Designs, Landscape Plan, Scenic Easement Plan, plan for 50% lot restrictions for wildflower plantings.
2. Soil Borings report.
3. Traffic Study Report.
4. EAW Final Report.
5. AFTON CREEK PRESERVE HOMEOWNERS ASSOCIATION DRAFT AND RESTRICTIVE COVENANTS.
6. Minnesota land Trust Acknowledgement.
7. Prairie Restoration contract outline.
8. Supporting Documents, Emails, Letters, from Metropolitan Council. DNR, Watershed, MPCA, Department of Agriculture, Lakeland Fire Dept., City of Afton Committee reports, recommendations NRGC and Parks,
9. Mailing labels from Washington County of all Neighbors within 500 feet.
10. Completed applications along with required fees for CUP, PLCD, Major Subdivision, Rezoning of 5-acre parcel existing Homestead.

(ATTACHED SEPERATLY IS AN EXHIBIT SCHEDULE OF DOCUMENTS ABOVE)

Brief property description: PLCD Preservation and Land Conservation Development

Afton Creek Preserve project is currently AG land and abutting Rural Residential and AG land. Our 19-lot single-family development on 218.6 acres with 109.7 acres of conservation easement to protect the Trout Brook. Each lot is 5 acres and has a minimum of 2.5 acres of buildable area on each lot. The development will have individual wells and septic systems. 50% of the area will remain in open space. Grading activities scheduled to begin after City of Afton and Developer sign and agree to developer's agreement. The project will be carried out using an array of best management practices including special native grass, wildflower, and shrub vegetative buffer strips to protect steep slopes. The main stream on the south is Trout Brook. Trout Brook is Protected with a Land Trust conservation and Scenic Easements on both sides of the stream, as are all wetlands along the stream. The above description along with all the required documents and planning that have been performed is the best use of the land using the allowed PLCD code. Lastly, it is our goal to decrease the amount of agricultural land in the Trout Brook Watershed. This will reduce erosion and stream contamination from animal waste, large number of herbicides and pesticides used in the current agricultural land which has resulted in higher than normal Escherichia coli and unwanted chemical levels.

EXHIBIT A

DEDICATION:

With this entire design and land development called AFTON CREEK PRESERVE Protects the Trout Brook and Surrounding natural features. Albert **Wilmer Carlson hereby grants a Conservation Easement which shall run with the land in perpetuity to the City of Afton,** All of the owners of the lots and parcels to be created in the PLCD, all land owners of property within Afton abutting the PLCD and the Minnesota Land Trust which restricts the lots and parcels, as well as the development rights on the undeveloped parcel, within the PLCD to the number of dwelling units approved for the PLCD and the land cover and use approved by the City of Afton as a part of this PLCD. All land shown on the final development plan as an undeveloped parcel must be conveyed to a homeowner's association provided in an indenture for the maintenance of the planned development. The undeveloped parcel must be conveyed to the homeowner's association subject to covenants to be approved by the City Council which restrict the undeveloped parcel to the uses specified on the final development plan and which provide for the maintenance of the undeveloped parcel in a manner which assures it continuing use for its intended purpose.

Please accept our PLCD Preliminary Plat Application to the City of Afton Planning Commission and City Council.

Drainage and utility easements are proposed thus:

Being ten feet in width and adjoining public ways and all lot lines unless otherwise indicated on this plat.

The following minimum setbacks were observed:

Buildings - 200 feet from the stream bank.
Septic Areas - 150 feet from the stream bank.
Buildings and Septic Areas - 40 feet from a bluff line.

Note:

The 1 rod strip of land located along the north line of the Southeast Quarter of the Southwest Quarter of Section 33 contains approximately 0.40 acres of land and this area was not included in overall area or density calculations for this PLCD.

Note: Easements for stormwater facility access and inspections will be conveyed along the lot lines (10 feet either side) common between Lot 4 and Lot 5, Lot 14 and Lot 15, Lot 16 and Lot 17, all in Block 2. All other currently proposed stormwater facilities have direct access from a public street via the proposed drainage or drainage and utility easements.

REVISED: SEPTEMBER 22, 2017

OFFICIAL COPIES OF THIS MAP ARE CRIMP SEALED

I hereby certify that this survey, plan or report was prepared by me or under my direct supervision and that I am a duly Licensed Land Surveyor under the laws of the State of Minnesota.

EXHIBIT E

PRELIMINARY PLAT - AFTON CREEK PRESERVE

Part of the Southeast Quarter of Section 32 and part of the Southwest Quarter of Section 33,
all in Township 28 North, Range 20 West, City of Afton, Washington County, Minnesota

59.0 acres ± to be seeded in Conservation Easement areas.

75.0 acres ± to be seeded in Residential area.

Final calculations will be determined at or or above those shown hereon by the South Washington Watershed District at the time of installation.

SEEDING PLAN

Developer:

J.P. Bush HOMES

Property Owner: Will Carlson

Seed mixes, species and amounts

Grass Seed lbs / acre

PRI Mixed Height Mesic Grass Mix:
35% Big bluestem, 23% Little bluestem, 22% Indian grass, 12% Side oats grama, 5% Canada wild rye, 2% June grass, 1% Switch grass all by PLS weight 10

Note: A cover crop will be sown along with the native grasses at a rate of approximately 25 lbs./acre. Cover crop is an annual grass species that germinates quickly and will reduce the risk of soil erosion on the site. Oats will be used for a spring or summer seeding, and winter wheat will be used for a fall seeding.

Wildflower Seed oz / acre

Butterfly weed (*Asclepias tuberosa*) 1/4
Partridge pea (*Chamaecrista fasciculata*) 1/2
Wild lupine (*Lupinus perennis*) 1
Yellow coneflower (*Ratibida pinnata*) 1/2

PRI Mixed Height Mesic Wildflower Mix:
15% Purple prairie clover, 15% Heavy vervain, 15% Black-eyed Susan, 10% Leadplant, 8% Common ox-eye, 6% Golden Alexander, 3% Canada milk vetch, 3% White prairie clover, 3% Canada tick trefoil, 3% Wild bergamot, 3% Stiff goldenrod, 3% Blue vervain, 2% Common milkweed, 1% Yarrow, 1% Prairie rose, 1% Gray goldenrod, 1% Western spiderwort, .25 by PLS weight 24

Legend

Memorandum

To: ***Ron Moorse, City Administrator***

From: ***Nick Guilliams, Project Manager***
Andrew Plowman, Project Manager
Maia Harold, Project Engineer

Date: ***October 12, 2017***

Re: ***Afton Creek Preserve Preliminary Plat***
Stormwater and Traffic Technical Review
WSB Project No. 010641-000

This memo is being provided to review the stormwater and traffic related plans for the proposed Afton Creek Preserve Project discussed at the October 2, 2017 Planning Commission, and to clarify roles and expectations and to correct miscommunication between the Afton Planning Commission, City of Afton, consultants, and developer stemming from this meeting.

At the preliminary plat stage, our task as engineers is to review the documents that the applicant submitted for technical feasibility. We have reviewed all plans and have provided comments to the developer to ensure the plans meet all requirements.

This review is not a final approval; the developer is only required to show that the project is technically feasible. Final construction plans will be provided at the final plat stage if the project is approved by the City Council to move forward. The developer will be required to address all preliminary plat comments before approval. The City's consultant planner and engineer will review all final plat documents and provide additional comments at that stage.

Approval of the preliminary plat does not give the developer permission to start grading or begin any construction activities. The Afton City Council must approve the final plat, all comments from planning and engineering must be addressed, and all permit approvals must be received before construction can start.

Traffic and Access Review

JP Bush is proposing a 19-lot residential development along Trading Post Trail and 60th Street. WSB provided a technical memo on July 10, 2017 related to access concerns *prior* to the preliminary plat submittal that provided recommendations to improve intersection sight distance for the access into the proposed development. At that time, WSB reviewed the sight distance based on preliminary drawings and information known at the time about the speed of the roadway. At the time of the memo, WSB was not aware of the posted speed limit of 30 mph and indicated in absence of any other information a rural speed limit of 55 mph. Clearly, the roadway is not designed nor do the existing speeds indicate a 55-mph speed. The sight distance measured for that preliminary sketch did not even meet 25 mph based on Minnesota Department of Transportation (MnDOT) and American Association of State and Highway and Transportation Officials (AASHTO). The primary recommendation of the July 10, 2017 memo was to move the access far enough west to gain appropriate sight distance. Afterwards, WSB recommended that the developer's engineer conduct a traffic study to measure existing speeds on the corridor. The anticipated design speed on the curve located to the east of the entrance was less than 25 mph based on MnDOT Road Design Manual Guidance. This speed will be posted.

Upon review of the preliminary plat documents, WSB has determined that the project is technically feasible from a traffic engineering standpoint. This conclusion was based on Minnesota Department of Transportation (MnDOT) guidelines which follows the American Association of State and Highway and Transportation Officials (AASHTO).

This conclusion was based on the following criteria, as well as information provided by the applicant as part of the preliminary plat submittal:

- The access driveway was shifted significantly further west per our recommendations.

- A 30 MPH design speed was used. Trading Post Trail is posted for 30 mph for southbound traffic approaching 60th Street. A 30 MPH sign is located just south of Odell Ave for southbound traffic.

- A review of the technical memorandum provided by SPACK Consulting dated July 26, 2017, provided data showing speeds less than 30 mph after the curve. This memo was prepared by a registered traffic engineer in the State of Minnesota. During the dates that field work was performed for the study (6/29 – 7/5), we have verified there was no active construction taking place as part of the City's pavement management project. Trading Post Trail received the first course of bituminous pavement to just north of Odell Avenue on 6/26/17. The remaining piece of Trading Post Trail from just north of Odell Ave to 59th Ave was paved on 7/7/17. No construction activities were taking place on Trading Post Trail from 6/26/17 to 7/7/17.

  Although a small piece of Trading Post Trail was in a reclaimed condition (gravel) we don't believe this condition impacted volumes or speeds approaching the curve. In addition, although the study was performed over a holiday weekend, there is data provided on dates both before and after the weekend that represent normal conditions. We have no reason to challenge the integrity of the study or data provided.

  The report indicated the speed data was collected using speed tubes. This is an acceptable way of measuring the speed of a corridor and there is no reason to believe the data was not acceptable. Additional speed data can be collected if the City requests the data to be confirmed.

  We believe the data compiled is also accurate due to the sharpness of the existing curve. The existing curve has a radius of approximately 125 feet. This curve, assuming normal crown, meets a design speed of approximately 22 mph based on Figure A(3) 5-892.211 of the MnDOT State Aid Manual for Low Speed Urban Horizontal Curve Design. The chart for a rural condition does not provide data for constructing a curve like the one in question.

- Based on a 30 MPH design speed, the intersection sight distance is acceptable at the proposed access driveway. The required site distance is 290 feet to the east and 335 feet to the west. We have determined, based on the preliminary drawings provided, that the applicant has exceeded this requirement.

- There is no recorded accident history at this location that signifies any deficiencies in traffic operations.

- The proposed development will increase traffic volumes by approximately 200 cars a day or 20 cars in the peak hour. From a traffic engineering standpoint, this is a very minor increase in traffic volume that does not impact traffic operations or warrant modifications to the roadway alignment.

- As a condition of the development, the applicant will be required to pave the existing gravel section on 60th Street from the end of the pavement near Trading Post Trail west to Neal Avenue. This will limit the traffic volumes at Trading Post and 60th, as anyone traveling ***to*** the west toward St. Paul would head west on 60th and anyone coming ***from*** the west would travel east on 60th, avoiding Trading Post Trail altogether. Although there is no guarantee how motorists will travel, traffic studies have shown that motorists will nearly always to take the shortest and quickest route to their destination.

- Upon the City's request, WSB has performed a separate study at this intersection to determine if additional signage is necessary for the Trading Post/60th intersection. Based on this study, WSB determined that this curve should be posted as a 20-mph curve based on MnDOT guidelines for curve warning signs. A memo detailing the results of this study and recommendations is attached.

Based on the information provided, analyses completed by the applicant and WSB, and the reasons stated above, we believe the project is technically feasible. There is no evidence or data that has been submitted that shows there are any safety issues associated with the access road or the approaches from Trading Post and 60th Street.

Stormwater Review

Applicants must follow stormwater requirements for all jurisdictions. WSB provided technical memos on September 14th, September 20th, and September 26th related to meeting jurisdictional requirements prior to the preliminary plat submittal. In the case of Afton Creek Preserve, rules of South Washington Watershed District (SWWD), the City of Afton, and the Minnesota Pollution Control Agency (MPCA) Permit No. MN R100001 (General Permit) must be followed for permanent stormwater design. From a preliminary plat standpoint, the developer must demonstrate that they have sited stormwater management facilities and have incorporated the required easements for all proposed stormwater facilities. Once the preliminary plat is approved, the developer will begin submitting their models and reports through a series of reviews until jurisdictional compliance is achieved.

Upon review of the preliminary plat documents, WSB determined that the project is technically feasible from a water resources engineering standpoint.

Permanent stormwater design incorporates several requirements for each of these entities including rate control, volume, and water quality. The City's consultants have and will continue to comment on the developer's design submittals until all jurisdictional requirements have been met as stated in the Planning Commission meeting on October 2nd. These requirements include but are not limited to the following:

Rate Control:

- No land shall be developed or altered and no use shall be permitted that results in surface or stormwater run-off causing or with the potential to cause unreasonable flooding, erosion or deposit of materials on adjacent properties or water bodies. Such run-off shall be properly channeled into a stormwater management facility that is consistent with the stormwater management and erosion and sediment control requirements of Article 13. Any increase in run-off rate or volume as a result of the developed portion of a property shall achieve at least the minimum requirements of Article 13 (Afton Code Sec. 12-217).
- On-site treatment during construction and post-construction must be provided to ensure no increase from existing conditions in offsite peak discharge for the 1-year, 2-year, 10-year, and 100-year, 24-hour storm events (Afton Code Sec. 13-162).
- Existing natural drainageways, wetlands, and vegetated soil surfaces used to convey, store, filter, and retain stormwater runoff before discharge to public waters shall not be eliminated by construction or land disturbance (Afton Code Sec. 12-409).
- The post-development 2-year, 10-year, and 100-year peak rate of runoff at the pre-development level for the critical duration precipitation event must be maintained, both on-site and at key regional locations identified by the District (SWWD Policy 7.1.1).
- Per the MPCA, a Stormwater Pollution Prevention Plan (SWPPP) is required. The SWPPP has many requirements, one of them being that if any stormwater flow will be channelized at the site, the Permittee(s) must design Best Management Practices (BMPs) to control both peak flow rates and total stormwater volume to minimize erosion at outlets and to minimize downstream channel and streambank erosion (General Permit Part III.A.5.i.iii).

Volume:

- For new, nonlinear developments on sites without restrictions, stormwater runoff volumes will be controlled and the post-construction runoff volume shall be retained on site for 1.1 inches of runoff from all impervious surfaces on the site (Afton Code Sec. 13-160.A).
- All projects must maintain the annual average existing conditions infiltration capacity of the site. This standard is applied to entire site, expressed as total annual runoff volume resulting from typical climatic conditions. Best Management Practices (BMPs) should be designed following guidance provided in the SWWD Standards Manual or MN Stormwater Manual (SWWD Policy 7.3.2).

Water Quality:

- All projects must provide treatment necessary to meet applicable annual total phosphorus loading rates per the table located in the SWWD Rules or maintain existing loading rates, whichever is less (SWWD Policy 7.3.3).
- All projects must provide treatment necessary to provide a net reduction of off-site Total Suspended Solids (TSS) discharge rates from existing conditions on an average annual basis (SWWD Policy 7.3.3.C).

Overland Sheet Flow onto Adjacent Property to the East:
Sheet flow in the area of the Carlson farm access road is already occurring in the existing condition, and there are prescriptive rights to allow water to drain where it always has per Section 12-409. The preliminary plat is indicating many ponds throughout the site that are intercepting both existing and proposed sheet flow and discharging it at a slower rate compared to existing. Per the requirements previously stated, the development must maintain or reduce the existing flow rate from all discharge points, including the two on the eastern property line for specified storm events. The City and developer are aware of the sensitivity of the properties that have existing drainage problems and will ensure that the rates will either be maintained or reduced per jurisdictional requirements. As the modeling currently shows, flow rates specifically off the eastern properties will be greatly reduced in typical storm events because there are no existing stormwater controls.

As Afton Code Section 12-217 states, any increase in run-off rate or volume as a result of the developed portion of a property shall achieve at least the minimum requirements of Article 13. The ordinance does not state that the developer must contain all stormwater on their property.

WSB's role was to determine if the project is technically feasible, and based on the information provided, WSB feels this project will likely improve the drainage. WSB will be reviewing future submittals carefully to ensure discharge rates and volumes are reduced for the various rainfall events. In addition, we will verify that the flow continues to be sheet flow and not concentrated when it leaves the stormwater basins.

Please let us know if you have any questions.

Sincerely,

WSB & Associates, Inc.

Re: ***Curve Warning Evaluation at Trading Post Trail and 60th Street and Speed Limit Sign on Eastbound 60th Street, Afton, Minnesota WSB Project No. 1856-560***

Introduction

WSB was contracted to evaluate the curve located at the intersection of Trading Post Trail/60th Street. WSB will provide recommendations for the location of advisory speed and warning signs for the curve, and a speed limit sign on eastbound 60th Street approaching Trading Post Trail based on the methodology below. See **Figure 1** and **Figure 2** for field pictures of the curve. **Figure 3** illustrates the project location and recommended speed and signage.

Trading Post Trail is currently a paved unmarked two-lane roadway with posted speed limit of 30 mph heading westbound towards 60th Street. Pavement ends at the western tangent of the curve where the road turns into 60th Street. 60th Street is currently an unpaved two-lane roadway with no posted speed limit. Two short reverse curves and two private driveway accesses are located on 60th Street within 400 feet of the curve with Trading Post Trail. The curve at Trading Post Trail and 60th Street is currently signed with chevrons, which appeared to be in poor condition. A housing development is being considered in the vicinity that proposes to pave a portion of 60th Street starting at the curve and heading westward towards Oakgreen Avenue.

Advisory Speed and Warning Signs for Curve at Trading Post Trail and 60th Street

In accordance with the 2015 Minnesota Manual on Uniform Traffic Control Devices (MNUTCD) 2C.8, the advisory speed was established by conducting field measurements with an accelerometer. The Curverite Model 1200 Advisory Speed Meter was the accelerometer used for this study, and the device was installed and calibrated according to manufacturer specifications. Several runs with the accelerometer were conducted at various speeds to determine the appropriate advisory speed. A g-force measurement range between 0.230 and 0.329 G-ft/s^2 is considered generally acceptable for establishing the advisory speed. Based on the results of the runs shown in **Table 1** below, the advisory speed for this curve is 20 mph, which is 10 mph below the speed limit of 30 mph.

Table 1 – Accelerometer Measurements

Speed (mph)	25.3	24.4	24.5	22.4	19.8	19.2	15.7	14.3
Direction	W	E	W	E	W	E	W	E
G-Force (G-ft/s^2)	0.463	0.419	0.399	0.383	0.295	0.29	0.191	0.185

Other site condition considerations include poor sight distance due to an embankment and vegetation, presence of a private driveway at the tangent of the curve, and reverse curves within 600 feet. As the driveway was private and the reverse curves were very short signage was not deemed necessary to address those considerations. Based on Table 2C-5 of the 2015 MNMUTCD, the recommended signage would be Turn (W1-1) Signs with 20 mph speed advisory plaques (W13-1P) placed at the beginning of the curve in each direction and replacement of the existing Chevrons (W1-8). See **Figure 3** for recommended sign placement.

Posted Speed Limit for Eastbound 60th Street

A 30 mph Speed Limit Sign (W2-1) for eastbound 60th Street could be placed approximately 500 feet east of the intersection of 60th Street/Oakgreen Avenue near the jurisdictional boundary of the City of Afton. See **Figure 3** for recommended placement.

Subject: Call

1 of 3

Joe:

I received your voicemail, and will respond here. We are in the midst of intensive grant proposal week, with 8 of them due by next Wednesday. I have one done.

I ran your questions past Ann Thies, our Stewardship Director, and will provide our joint thoughts.

1. Trails in open space west of development. Mowed trails should not be a problem as long as they are not too wide and there are not too many of them. We can work with you to define what that system looks like and where it is placed.

2: Overlook. This is probably also OK. Is the parking lot still part of the plan? You mentioned that this might be for bicyclists. As long as we keep the footprint small (not too obtrusive), the amenity is a good idea for general public use. Again, we can discuss details.

We should discuss at some point the costs associated with the Land Trust managing this easement over time so that you are aware of that and can have that fully integrated into discussions. You mentioned the planting of flowers in the open space area - is this intended to be native prairie or savanna - what is the plan?

Thanks again. Please feel free to touch base if I have not addressed all of your questions. Thursday next week would be ideal! :-)

Wayne

MINNESOTA LAND TRUST

August 11, 2017

To:
City of Afton, City Administrator, 3033 St. Croix Trail S., Afton, MN 55001
J.P. Bush Homes, Developer, 1980 Quasar Avenue South, Lakeland, MN 55043
Will Carlson, Landowner

Re: Afton Creek Preserve Conservation Easement- Letter of Acknowledgement

Dear Sirs:

The Minnesota Land Trust (Land Trust) has reviewed the design of the Preliminary Plat (dated August 7, 2017) of Afton Creek Preserve, a proposed Preservation and Land Conservation Development (PLCD) within the City of Afton designed by J.P. Bush Homes (Developer) for Albert Wilmer Carlson (Landowner). In addition, the Land Trust has had various discussions with the City of Afton and Developer.

At this time, the Land Trust acknowledges that it is willing and able to accept a conservation easement over Open Space granted by the Landowner, as identified on the attached Preliminary Plat of Afton Creek Preserve contingent upon the following:

- approval of the proposed Preservation and Land Conservation Development by the City of Afton,
- approval of the conservation easement project by the Land Trust Board,
- execution of an engagement letter between the Developer and Land Trust that governs the conservation easement project and process and establishes the funding and costs necessary to both complete the easement project and funds the long-term stewardship of the conservation easement,
- agreement between the Developer, City of Afton and Land Trust on the terms of the easement,
- approval by the Land Trust of final Homeowner's Association Bylaws, Restrictive Covenants, title work and other documents and due diligence regarding the development and the easement,
- receipt of required funding prior to closing and successful closing on the easement.

Sincerely,

Kris Larson
Executive Director

RE: Afton Creek Preserve

Dear Mr. Bush:

Thank you for the opportunity to work with you during the design stage of the proposed Afton Creek Preserve to craft open space that both meets the requirements set forth by the City of Afton and maximizes the benefits to wildlife and offers protection to Trout Brook. Over time, this open space will become an important asset to the residents of the community.

As you know, the Minnesota Land Trust works with municipalities to position proposed developments to elevate the ecological attributes of open space. As such, our recommendations are firmly grounded in this perspective. To that end, it is the Land Trust's opinion that the current open space design for the proposed Afton Creek Preserve best offers protection to Trout Brook and creates open space in the manner that will afford greatest habitat value to wildlife. Our previous recommendations at the time were:

- Make protection of Trout Brook the focus of the open space.
- Acquire additional land along (south of) Trout Brook and reconfigure the initial layout of lots to provide for greater protection of the brook and efficacy in monitoring the easement. This additional land would, in turn, provide for greater flexibility in the design to further enhance open space values.
- Retain, as designed, a large block of open space on the west edge of the property to provide maximum wildlife benefits.
- Eliminate development of the north portion of the proposed easement area to protect the integrity of the intermittent stream valley that feeds Trout Brook from the north.

We believe that the current proposed design of Afton Creek Preserve fully meets our recommendations and best positions the project ecologically. Access along the west edge of the property, crossing Trout Brook, and crossing the block of open space north of the brook would have significant ecological impacts to the brook and wildlife habitat on the property.

That said, we acknowledge that the City must consider a variety of factors when determining if and under what circumstances a proposed development should move forward. Whatever the outcome of this project, the Minnesota Land Trust will work with the City to best position such projects ecologically as it considers them going forward.

Sincerely,

Wayne R. Ostlie
Director of Land Protection

Proposal to Create a Native Landscape at the Afton Creek Park Reserve Afton, MN

Prepared for:
Joe Bush – Developer

Site Address:
14220 60th St
Afton, MN

Prepared by:
Jeff West
Site Manager
jwest@prairieresto.com

Project Area:
Conservation Easement Area: Approx 60 acres
Future Residential Area: Approx 75 acres

Prairie Restorations, Inc.

Two Oaks Office
PO Box 95
Scandia MN 55073
www.prairieresto.com

A. Company Background: http://www.prairieresto.com/mission.shtml **(Follow the blue links to learn more)**

Prairie Restorations, Inc. (PRI) has been dedicated to the restoration and management of native plant communities for over 40 years. We are fortunate to have worked with thousands of clients on a wide variety of projects in both the public and private sectors throughout the Upper Midwest.

The PRI staff currently consists of 54 full-time professionals and about an equal number of seasonal employees which operate out of six Minnesota locations. Most of the staff has B.S. degrees in natural resource related fields such as biology, forestry, horticulture or wildlife. As a full service restoration company, PRI is able to provide our clients expertise and service in all facets of native landscape restoration. Along with consulting, design, installation and land management services, we also produce our own local ecotype seed and plant materials which are used on all of our projects.

The PRI Team is committed to and passionate about protecting and enhancing our valuable natural resources. It is this dedication that is brought to each and every one of our projects. We are proud to offer the best expertise, services and products available in the industry and appreciate the opportunity to provide you with this proposal.

B. Project Overview:

1. Establishing a native landscape (http://www.prairieresto.com/establish_landscape.shtml) in this area will provide a long term, ecologically sound landscape that is adapted to the existing conditions of the site. This native landscape will not require irrigation, black dirt or other soil amendments. It will add a distinctive look to the property as well as provide valuable habitat for songbirds, butterflies, bees and other pollinators.

2. To establish this planting, the site will be seeded using a drill seeder after the row crops are removed. Only areas currently in row crops will be seeded at this time. If additional weedy or fallow areas need to be seeded a different process may be required.

3. An estimate for 3 years of Establishment Period Vegetation Management is included in this proposal.

C. Project Dimensions and Planting Zones:

1. For purposes of vegetation restoration, the project area is separated into two zones, the **Conservation Easement Area** and the **Residential Lots Area**.

2. **The Conservation Easement Area** in total is 109.7 acres. Approximately 60 of these acres are currently in row crops and will be seeded.

3. **The Residential Lots Area** in total is 100.6 acres. Approximately 75 of these acres are currently in row crops and will be seeded as a part of this plan. As the lots are developed the construction disturbance will be limited to less than 50% of the prairie area leaving the remaining in prairie. Areas beyond the 50% can and will be reseeded as necessary after construction of each house/property.

D. Site preparation: http://www.prairieresto.com/installation_preparation.shtml

1. The project area will be harvested for crops before seeding. In addition it should be stalk chopped (especially the corn) to allow for easier seeding. If possible the corn field areas could be baled to remove crop residue as the corn leaves much more debris behind than the bean fields and this can cause issues with the seeding.

E. Seed and Seeding: http://www.prairieresto.com/installation_seeding.shtml

1. Acceptable seeding dates for native species are in the spring or summer before August 10th or in the fall between September 20th and freeze-up.

2. All grass seed will be applied with a seed drill designed for native seeding (Truax® or equivalent).

3. All flower seed will be broadcast with a tractor broadcast seeder designed for native seeding (Vicon® or equivalent).

4. The seed mixes will consist of the following species and amounts:

Grass Seed	lbs / acre
PRI Mixed Height Mesic Grass Mix: 35% Big bluestem, 23% Little bluestem, 22% Indian grass, 12% Side oats grama, 5% Canada wild rye, 2% June grass, 1% Switch grass all by PLS weight	10

http://www.prairieresto.com/CategoryList.php?cID=12

Note: A cover crop will be sown along with the native grasses at a rate of approximately 25 lbs./acre. Cover crop is an annual grass species that germinates quickly and will reduce the risk of soil erosion on the site. Oats will be used for a spring or summer seeding, and winter wheat will be used for a fall seeding.

Wildflower Seed	oz / acre
Butterfly weed (*Asclepias tuberosa*)	1/4
Partridge pea (*Chamaecrista fasciculata*)	1/2
Wild lupine (*Lupinus perennis*)	1
Yellow coneflower (*Ratibida pinnata*)	1/2
PRI Mixed Height Mesic Wildflower Mix: 19% Purple prairie clover, 18% Hoary vervain, 15% Black-eyed Susan, 10% Leadplant, 8% Common ox-eye, 6% Golden Alexander, 3% Canada milk vetch, 3% White prairie clover, 3% Canada tick trefoil, 3% Wild bergamot, 3% Stiff goldenrod, 3% Blue vervain, 2% Common milkweed, 1% Yarrow, 1% Prairie rose, 1% Gray goldenrod, 1% Western spiderwort, all by PLS weight	24

http://www.prairieresto.com/CategoryList.php?cID=13

F. Erosion Control: http://www.prairieresto.com/installation_erosion.shtml

1. Cover crop will be sown along with the native grasses.

G. Management: http://www.prairieresto.com/management_overview.shtml

1. Management (maintenance) plays a vital role in the eventual success of any native landscape installation, especially during the establishment period. Active management of your native landscape is highly recommended to give the project the best opportunity for long term success.

2. During the germination year, the project area may need to be mowed to control annual weed development. If a "closed" canopy of weed cover develops, it should be mowed to aid in the growth of the prairie seedlings by reducing competition. Mowing may also be necessary if the weeds are about to set seed. Optimum cutting height, depending on the wildflower species present, is typically 4 to 6 inches. It is important that the clippings are finely mulched in order to prevent smothering. PRI can provide the mowing services if desired. Please refer to the cost section of this proposal for a mowing quote.

3. In years following the first growing season, Integrated Plant Management (IPM) services are utilized to control annual, biennial and perennial weed species within the developing native landscape. Typical IPM services include spot herbicide spraying, spot mowing, herbicide wicking or hand weeding. These services are billed on a per trip cost agreed upon prior to the growing season. Rough estimates are provided in the cost section of this proposal for these future management activities.

4. Prescribed burning is a highly effective management tool and may be recommended for your project as it matures. Burning stimulates native species to grow more robustly and also help to deter the presence of many non-native and/or woody species. Prescribed burning, when recommended, will be provided as a separate lump sum cost.

5. In lieu of burning, or during years when the site is not burned, a Spring Dormant Mowing can be used to "clean up" previous year's growth and set the table for the new growing season. This mowing would occur early in the spring, as soon as conditions permit. Spring Dormant Mowing, when recommended, will be provided as a separate lump sum cost.

H. Anticipated Management:

The following table conveys the anticipated management procedures for your project during the first 4 growing seasons. Estimates for these procedures are provided in the cost section of this proposal.

Year	Projected Management Procedures
2018	Complete site mowings to control annual weed canopy (2 or 3 mowings as needed). Project monitoring
2019	Complete site mowing Integrated Plant Management (IPM) – includes spot spraying, spot mowing, wicking, hand weeding, and other techniques to control weeds and invasive species (3 visits are typical) Project monitoring
2020	Integrated Plant Management (IPM) – includes spot spraying, spot mowing, wicking, hand weeding, and other techniques to control weeds and invasive species (3 visits are typical) Project monitoring
2021	Spring burn to encourage native plant growth and to help deter the presence of non-native and woody species. Integrated Plant Management (IPM) – 3 visits are typical Project monitoring

I. Costs:

Project Installation:

Unit Pricing

Seeding..... $175 / acre
Seed as specified..... $625 / acre
Erosion blanket (if necessary)..... $1.25 / sq yd
Straw Mulching (if necessary)..... $850 / acre

Conservation Easement Area (est 60 acres)

Seeding 60 acres @ $175/acre..... $10,500
Seed as specified 60 acres @ $625/acre..... $37,500

Conservation Easement Installation Total.....$48,000

Residential Lots Area (est 75 acres)

Seeding 75 acres @ $175/acre..... $13,125
Seed as specified 75 acres @ $625/acre..... $46,875

Residential Lots Installation Total..... $60,000

Conservation Easement Vegetation Management:

Germination year management quote (2018):

Complete site mowings as needed (**1-3** is typical)..... $100/acre
Full site mow (60 acres @ $90/acre)..... $6,000

Future Management Estimates:

Growing season 2019 *(assumes 3 IPM visits)*..... **$30,000**
Growing season 2020 *(assumes 3 IPM visits)*..... **$30,000**
Growing season 2021 *(assumes 3 IPM visits and a prescribed burn)*..... **$36,000**

Please note: The ***Future Management Estimates*** are meant to convey typical management costs for projects of similar size and characteristics. Prior to each growing season, you will receive a specified quote from your project manager detailing the recommended management strategies and associated costs for your project.

PRI will provide a follow-up consultation approximately 1 month after the completion of the project (if the project was seeded in the fall, the consultation will occur the following spring). The Restorationist (or salesperson) will meet with the project owner to assess the status of the project, answer any questions, and provide any necessary recommendations. This follow-up consultation will be provided at no additional cost.

J. **Guarantee:** Prairie Restorations, Inc. (PRI) has a great tradition of successfully installing native landscapes throughout the Upper Midwest. We feel our expertise in this industry is second to none and we stand behind every one of our projects. Because we are confident in our abilities to provide you with the best possible materials and services, we are proud to offer the following guarantee:

On projects installed by PRI crews within the specified dates, we will guarantee successful establishment within three full growing seasons, given the following conditions:

1. *That PRI materials and PRI installation services are used on the project.*
2. *That the failure of the project is not due to the actions of others.*
3. *That PRI staff has been consistently involved with the maintenance of the project (consultation with the client or direct utilization of PRI management services) from the time of germination until the end of the third growing season (i.e. mowing, spot spraying, and controlled burning).*

This outline provides a step-by-step plan for accomplishing the restoration of this site. If successful establishment does not occur within three full growing seasons, all necessary steps will be taken to ensure the eventual success of the project, at no additional charge. For purposes of this guarantee, successful establishment is defined as follows: That the presence of at least 75% of the original seeded or planted species can be found on site, and that the overall density of vegetation is comprised of no less than 75% native species.

K. Contract:

If you accept the proposal as written and want to proceed with the project, please sign the contract below.

Owner (print): _____ **Date:**_____

Signed: _____ **Title:**_____

RE: Former Schuster Property Project Recap

To whom it may concern,

This letter is a summary of the work that has been completed at the former Schuster property at 14220 60th St., Afton MN. The project was proposed, approved and contracted in late summer of 2015 in coordination with Washington conservation district. Site prep, seeding, and 2 years of maintenance were included in the contract. One additional maintenance visit in 2017 is planned. After this final visit our contracted work is complete. We would however recommend continued maintenance in 2018 and beyond to ensure successful establishment of the native planting area.

2015:

9/14 Site Prep Spray
9/22 Touch up of site prep spray
10/27 Soil prep, seeding and straw mulching.

2016:

Monthly site visits for monitoring
6/22 Complete site mow

2017:

Monthly site visits for monitoring
7/26 Complete site mow
1 additional visit schedule for 2017

Please let me know if you need any additional information.

Thank you,

Jeff West

DEPARTMENT NATURAL RESOURCES

1 of 2

Minnesota Department of Natural Resources
Ecological and Water Resource
1200 Warner Road
St. Paul, MN 55106

May 24, 2017

Transmitted Electronically

Ronald Moorse
City Administrator
3033 St. Croix Trail S
Afton, MN 55001

Re: Afton Creek Preserve EAW

Dear Ronald Moorse,

The Minnesota Department of Natural Resources (DNR) has reviewed the Environmental Assessment Worksheet (EAW) for the Afton Creek Preserve residential development located in Afton, MN. We offer the following comments for your consideration.

Land Use - Page 6 (Question 9.b.):

- The current placement of the access road into the development is located at the southeast corner of the property, which avoids the need to construct a crossing over Trout Brook. If the road into the development were located elsewhere along 60th Street South, construction of a road crossing over Trout Brook would be required, potentially impacting the stream itself and associated adjacent wetland areas, including areas where groundwater recharges the stream. Groundwater is an important source of cold water to streams like Trout Brook that support coldwater fish species (i.e. trout).
- Provide a narrative to justify the statement made that this development is in concert with Afton's comprehensive plan and growth plan.

Water Resources - Page 8 (Question 11.a.ii.):

- In this section, note whether the woodland area located adjacent to Trout Brook in the open space conservation easement and Lots 3 and 4 was examined for springs and if any springs were identified. Include a narrative in this section describing the potential for increased groundwater flow at this location due to topography and proximity to the water table. Wood land areas like this, with steeper topography draining toward a stream, may have springs where groundwater is coming to the surface. Even if there is not surface water in the form of springs, the likelihood is high that this area has shallow groundwater that is migrating toward Trout Brook and which provides groundwater recharge to the stream.
- In agricultural areas that have been farmed for 160 years, old wells are often found that no one knew existed. If any unknown wells are found on site, these must be sealed in accordance with the regulations of the Minnesota Department of Health.

Water Resources – Page 8 (Question 11.b.ii.)

- Show on a map where the vegetative buffer strips will be located on Lots 1 – 10 and Lots 16 – 17.

Water Resources – Page 9 (Question 11.b.iii.)

"J"

2 of 2

- Please note that any dewatering of volumes that exceed 10,000 gallons per day, or one million gallons per year need to be approved by a DNR Water Appropriation Permit. This includes dewatering for grading, installing footings for structures, and to install pipes for sanitary systems. The use of more than 10,000 gallons of water per day for watering trees, grass, and landscaping using watering trucks needs approval under a DNR Water Appropriation Permit as well. A Water Appropriation Permit may be applied for online using the following website: http://www.dnr.state.mn.us/mpars/
- Lot sizes in this development are approximately 5 acres. During drought, the irrigation of 1.5 acres of landscaping will use more than 1 million gallons of water per year. The new homes should be designed to minimize irrigated landscaping to avoid the need to obtain a DNR Water Appropriation Permit.

Fish, Wildlife, Plant Communities, and Sensitive Ecological Resources (Rare Features) – Page 13 (Question 13.c):

- Provide a more detailed explanation of how the buffer plan will assist with onsite erosion and sedimentation created by development. Describe how the buffer will enhance wildlife habitat. Explain what types of invasive species management will be done on disturbed areas and what plant communities will be located in these disturbed areas post-development. Explain what specific habitat enhancement will be done to protect state listed species during construction.

Figure 3 – Site Sketch - Page 21:

- The shoreland district boundary shown on the concept plan should be 300 feet wide on both sides of Trout Brook (the width of shoreland districts for rivers and streams), not 1,000 feet wide.
- The conservancy overlay boundary, which designates sensitive areas within Afton, is shown as approximate. Adjust this boundary to reflect the terrain and resources on this specific site.
- There are sensitive areas covering much of Lots 3 and 4 (wooded areas and steep slopes). This woodland area is directly adjacent to Trout Brook and likely contains springs that supply cold groundwater to the stream. DNR recommends inclusion of these sensitive areas into the open space conservation easement to protect this habitat and source of groundwater to the stream.

Appendix B – Lot Buffer Plan

- The buffer plan is not complete and needs to include a narrative and maps that explain the details of the plan. Why are individual landowners responsible for planting buffers rather than the developer? Wouldn't it make more sense to get the buffers established early rather than at an unknown point in the future when lots are sold? How will the buffers be monitored over time to ensure that they become established? Will there be a buffer easement that keeps the buffers in place long-term and prevents encroachment into the buffer areas?

Thank you for the consideration of our comments.

Sincerely,

/s/ Rebecca Horton

Subject: Efforts to date on conservation projects on former Schuster Property
Attachments: Former Schuster Property_Cost-share Projects.pdf

Hello Joe –

I am writing to provide a status update on the two conservation projects implemented on the former Schuster property. Maintenance of the turf conversion is ongoing through 2017. Buckthorn resprout management is scheduled for week of September 18th using the Minnesota Conservation Corp.

See attached document for more information.

Thanks,

Andy

Project Location (if different)

Address	City/State	Zip code

Contract Information

I (we), the undersigned, do hereby request cost-share assistance to help defray the cost of installing the following practice(s) listed on the second page of this contract. It is understood that:

1. **SWWD's Water Quality Cost Share Program is a Reimbursement Program.** Applicants will be reimbursed for the contract amount upon successful completion of the project and submission of all required documentation.
2. The land occupier is responsible for full establishment, operation, and maintenance of all practices and upland treatment criteria applied under this program to ensure that the conservation objective of the practice is met and the effective life, a minimum of **10** years, is achieved. The specific operation and maintenance requirements for the conservation practice listed are described in the operation and maintenance plan prepared for this contract by the organization technical representative.
3. Should the land occupier fail to maintain the practice during its effective life, the land occupier is liable to the South Washington Watershed District for the amount up to 100% of the amount of financial assistance received to install and establish the practice unless the failure was caused by reasons beyond the land occupier's control, or if conservation practices are applied at the land occupier's expense that provide equivalent protection of the soil and water resources.
4. Practice(s) must be planned and installed in accordance with technical standards and specifications of the Technical Representative.
5. Increases in the practice units or cost must be approved by the organization board through amendment of this contract as a condition to increase the cost share payments.
6. This contract, when approved by the SWWD board, will remain in effect unless canceled by mutual agreement, except where installations of practices covered by this contract have not been started within **1 year following Board approval of this contract**, this contract will be automatically terminated on that date. Practices will be installed by **2 years following Board approval of this contract** unless this contract is amended by mutual consent to reschedule the work and funding.
7. Items of cost for which reimbursement is claimed are to be supported by invoices/receipts for payments and will be verified by the organization board as practical and reasonable. The organization board has the authority to make adjustments to the costs submitted for reimbursement.

Applicant Signatures

The land occupier's signature indicates agreement to:

1. Grant the organization's representative(s) access to the parcel where the conservation practice will be located.
2. Obtain all permits required in conjunction with the installation and establishment of the practice prior to starting construction of the practice.
3. Be responsible for the operation and maintenance of conservation practices applied under this program in accordance with an operation and maintenance plan prepared by the organization technical representative.
4. Not accept cost-share funds, from state and federal sources combined, that are in excess of **100%** percent of the total cost to establish the conservation practice and provide copies of all forms and contracts pertinent to any other state or federal programs that are contributing funds toward this project.

Andrew

Thank you for the feedback about the restoration project on the ravine and bluff. After reading comments back from you and Jen I understand that a meeting may not be needed.
The answer I was trying to obtain is; during the restoration project did any on site reports show fresh water springs?
If not I will proceed without additional concern. Is that a question you can answer?

Jenifer, Rick, John, Andy
I found the document I was looking for. Attached is a copy of the information.
Do you think that the work performed and the agreement helps the concerned comments in the DNR report to the EAW?
I have also attached a copy of the DNR report that is highlighted to show my reference.
The attached site plan shows lot 4 has a portion of the improved areas on the improved areas.
It is my opinion; our proposed restrictive covenants (attached and highlighted on page 8) will enhance the Bluff stabilization program and actually help improve The program. I am interested in your opinion and or comments to that affect. I am meeting with The city planning Commission tonight
In addition, would appreciate anything you could add to what I am referencing.
Sincerely
Joe Bush

Subject: Trout Brook overlook at Afton Preserve

Joe,

Got your message. I have no problem with an overlook within the easement. I will just want to make sure it meets bluff setback rules—ours is 60 feet from edge of bluff—and doesn't concentrate runoff anywhere running toward the bluff. Shouldn't be a problem.

Joe,

We have no requirements for streams to be delineated in the field for a preliminary plat (or final). Nor do we have any requirements for wetland to be delineated at this stage of development. SWWD and the State do have requirements protecting streams and wetlands from disturbance activities. From that standpoint, you may be best served by having your environmental consultant write a letter stating that the stream and any associated wetlands are within the proposed easement area and not in the proposed lots.

RE: Afton Creek Preserve EAW

Dear Mr. Moorse:

I am writing in regards to the Environmental Assessment Worksheet prepared for the Afton Creek Preserve project. The EAW as prepared is generally accurate and complete. Further, we would agree that there is low likelihood for adverse environmental impact resulting from the project and that further investigation through an Environmental Impact Statement is not necessary..

It is our hope that this effort serves as a model for future developments in Afton and the surrounding communities in southern Washington County. The proposed project will protect and improve not only the water quality of Trout Brook, but the surrounding terrestrial habitat as well. The City of Afton is to be commended for the development and promotion of its Preservation and Land Conservation Development ordinance. We greatly appreciate the efforts of the developer and City to protect Trout Brook by locating the easement in the areas most critical for protection of the stream. To maintain the habitat and protection benefits of the proposed easement, we strongly discourage development of any infrastructure within its currently identified boundaries.

If you have questions or need additional information please contact me at 651-714-3714 or jloomis@ci.woodbury.mn.us.

Sincerely,
South Washington Watershed District

Re: Afton Creek Preserve Environmental Assessment Worksheet

Dear Mr. Moorse:

Thank you for the opportunity to review and comment on the Environmental Assessment Worksheet (EAW) for the Afton Creek Preserve project (Project) located in the city of Afton, Washington County, Minnesota. The Project consists of an approximately 100-acre residential development. Regarding matters for which the Minnesota Pollution Control Agency (MPCA) has regulatory responsibility and other interests, the MPCA staff has the following comments for your consideration.

Low Impact Design

The MPCA advocates the use of Low Impact Design (LID) practices to aid in the minimization of stormwater impacts. LID is a stormwater management approach and site-design technique that emphasizes water infiltration, values water as a resource, and promotes the use of natural systems to treat water runoff. Examples include:

- Special ditches, arranged in a series, that soak up more water
- Vegetated filter strips at the edges of paved surfaces
- Trees or swales between rows of cars
- Residential or commercial rain gardens designed to capture and soak in stormwater
- Porous pavers, concrete, and asphalt for sidewalks and parking lots
- Narrower streets
- Rain barrels and cisterns
- Green roofs

LID concepts may be found in the State of Minnesota Stormwater Manual dated November 2005 located on the MPCA website at: http://www.pca.state.mn.us/water/stormwater/stormwater-manual.html.

In addition, the MPCA LID webpage provides a description and examples of LID features such as permeable pavement, rain gardens, and green roofs. Links to other resources on LID are available as well. The website is located at: https://www.pca.state.mn.us/water/stormwater-management-low-impact-development-and-green-infrastructure.

We appreciate the opportunity to review this Project. Please provide your specific responses to our comments and notice of decision on the need for an Environmental Impact Statement. Please be aware that this letter does not constitute approval by the MPCA of any or all elements of the Project for the purpose of pending or future permit action(s) by the MPCA. Ultimately, it is the responsibility of the Project proposer to secure any required permits and to comply with any requisite permit conditions. If you have any questions concerning our review of this EAW, please contact me at 651-757-2508.

Sincerely,

Karen Kromar

2 of 2

It was a pleasure speaking with you yesterday. Per your request, I will summarize the information I presented you with yesterday.

About 3 weeks ago the MDA received a report alleging that sometime around the year 2000, the complainant noted a chemical smell in the air around their residence. The complainant observed an application being made to a nearby corn field located west of Odell Ave S and north of Trading post road. The complainant stated he spoke with the applicator who said they accidentally applied 50 gallons of atrazine to 40 acres of corn thus the strong odor. The complainant stated that you are now in possession of the field and intend to develop it soon.

If what the complainant is saying is true, the application would have been 2-3 times the intended rate. While this would have been excessive and should have been reported to the state at the time, there is no reason to suspect that this product could still be found in the subject field these 17 years later.

If you have further concerns or questions feel free to contact me.

Sincerely,

Paul Haiker

To: Mayor Bend and Members of the City Council

From: Ron Moorse, City Administrator

Date: June 8, 2017

Re: Will Carlson Afton Creek Preserve Sketch Plan for a Preservation and Land Conservation Development Subdivision North of 60th Street and West of Trading Post Trail – **Resolution 2017-XX**

Will Carlson has applied for a Preservation and Land Conservation Development (PLCD) Subdivision on a 219 acre site north of 60th Street and West of Trading Post Trail. The proposed subdivision would preserve 110 acres of open space through a conservation easement, and would create twenty 5-acre lots on the remainder of the site. Attached is a report regarding the PLCD proposal by Bob Kirmis, the City's Planning Consultant, as well as a number of related materials. The list of materials is as follows:

- Letter from the Neighborhood Group adjacent to the PLCD dated 2/3/2017
- Letter from the Neighborhood Group dated 2/14/2017
- Letter from the Neighborhood Group dated 3/29/2017
- Letter from the Neighborhood Group dated 5/23/2017
- Agency comment letters regarding the Environmental Assessment Worksheet (EAW)
- Minutes of the April 4, 2017 Natural Resources and Groundwater Committee (NRGC) meeting, at which the Committee approved recommendations regarding the PLCD sketch plan
- Meeting notes from the May 24 Park Committee meeting at which the Carlson PLCD was discussed.
- Memo from Kathy and Randy Graham regarding a possible easement to provide adequate sight distance for the proposed access to the subdivision off 60th Street in the southeast corner of the subdivision site
- Materials related to proposed park and trail amenities to be provided by the developer
- Letter from the adjacent Neighborhood Group to the Park Committee regarding the proposed bike trail plan
- Email from Paul Haiker of the Minnesota Department of Agriculture regarding an atrazine over-application in the year 2,000.
- Emails from John Loomis and Andrew Schilling of the South Washington Watershed District indicating no evidence of springs along the bluff on lots 3 and 4.
- Technical Memorandum from Bryant Ficek, with Spack Consulting, a traffic consultant for the developer, regarding a review of the access for the subdivision.
- Proposed covenants to be placed on each lot in the subdivision.

Environmental Assessment Worksheet (EAW)
An Environmental Assessment Worksheet (EAW) was prepared for the proposed subdivision. Rather than providing a hard copy of the EAW in the Council's meeting packet, the following is a link to the EAW on the City's website.
http://www.ci.afton.mn.us/vertical/sites/%7B255148F5-88B9-45F6-9726-DD95D24AA11D%7D/uploads/Afton_Creek_Preserve_Environmental_Assessment_Worksheet.pdf

The EAW was published in the EQB Monitor and a notice of this publication and the opportunity and timing for providing comments regarding the EAW was published in the City's Official Newspaper. The period for providing comments expires on May 24. Comment letters received from agencies responsible for commenting on the EAW are attached.

Recommendations from the NRGC
The NRGC recommendations are set out in the minutes of the April 4, 2017 NRGC meeting, which are attached.

Recommendations from the Park Committee
The Park Committee discussed the PLCD Sketch Plan at its May 24 meeting, and its recommendations are as follows: *"Based on the current development plan presented, the Committee recommends dedication of limited land to the City as a park for the purpose of future use and the balance as a park dedication fee. This assumes the developer will provide public access at the end of the cul-de-sac and along 60th street to the open space areas. Access points will have infrastructure, such as benches, off street parking off 60th and natural informational signage."* Approved Unanimously by the Committee

Public Hearing
A public hearing was held at the June 5 Planning Commission meeting. The minutes of the Planning Commission meeting, which are included in the Council meeting packet, include an outline of the public comments regarding the proposal. A summary of the public comments is as follows.

Public Comments

- Does the proposed street access require grading in an area of 18% slope to meet sightline requirements?
- Is the bridge on 60th and Trading Post adequate for the additional traffic that would be generated by the proposal?
- Concerns were expressed regarding the safety of the access intersection
- It was suggested that the City obtain land vs. a cash contribution for the park dedication requirement
- The length of cul de sac streets proposed to serve the development is substantially longer than is generally allowed by ordinance, although the PLCD allows flexibility in cul de sac length.
- The five-acre lots will have a negative effect on the rural character of the area.
- The proposal does not match the purpose of the PLCD ordinance, which includes preserving the health, safety and welfare of adjacent residents.
- Much of the land included in the PLCD is environmentally sensitive
- Neighbors to the east of the proposed development have an erosion issue due to drainage coming from the PLCD site. There is no indication on the sketch plan regarding a solution to this problem
- The proposal undermines the Comprehensive Plan in regard to the preservation of rural character and open space

Planning Commission Review of the PLCD Sketch Plan
As indicated in the planning consultant's report, the Planning Commission was not asked to provide a recommendation regarding the PLCD proposal at this time, but was asked to provide comments to guide the applicant in preparing the Preliminary Plat application, which is the next step in the PLCD application process.

Planning Commission Comments
The Planning Commission raised a number of questions regarding the proposal. These are outlined in the Planning Commission meeting minutes, and are also summarized below.

- Vegetative Buffers should be installed by the developer, not by the owners of the individual lots. [The developer indicated vegetative buffers would be installed on all vacant lots by the developer]
- Can the City limit the amount of trees that can be removed? (The City's Shoreland Management regulations allow trees to be removed to construct a house, septic system and driveway. [Other cities have more strict tree preservation regulations, or place conditions on subdivisions, that minimize the amount of tree removals for homes and driveways, and that require driveways to be located in a way that screens the houses from the street.]
- Atrazine spill (over-application). [Please see the attached email from Paul Haiker, Agricultural Chemical Advisor with the State Department of Agriculture indicating that if the atrazine over-application occurred about 17 years ago, it would no longer be in the soil.]

- What is the planned use of the 16.5 foot wide strip owned by the developer that runs from the PLCD property to Trading Post Trail? [The developer has indicated the use has not been determined. The developer has suggested it could be a public bike trail or an emergency access for public safety vehicles. The City Attorney has indicated the strip is owned in fee by the developer and could be used for a number of uses, including a pedestrian and/or bike trail. It cannot be used as a public road. The use of this strip should be determined as part of the preliminary plat process, so that any special conditions deemed necessary for the use can be addressed as part of the preliminary plat review process.
- How will the accelerated run-off from the increased impervious surface be managed? [The developer will be required to manage the drainage from all new impervious surfaces through a grading and drainage plan. The developer has been provided with the City's Stormwater Management Ordinance which incorporates Minimal Impact Design Standards.]
- Who will own and maintain the open space area? [The Home Owners Association will own and maintain the open space area.]
- Do all changes to architectural controls in the covenants require city approval? The conditions of approval of the plat and the CUP, as well as the development agreement, could require city approval of changes to architectural controls and particularly the items of most interest to the City.]
- Who will enforce the maintenance of plantings? [The Home Owners Association will be responsible for the maintenance of plantings. The City would also enforce the maintenance of plantings through conditions placed on the plat and the CUP.
- Any public access to the open space area needs to be clearly and strongly set out in the conservation easement and in any approval documents
- Lots 3 and 4 have steep slopes and potential springs that feed the trout stream. The DNR expressed the same concern. [Please see the attached emails from John Loomis and Andrew Schilling of the South Washington Watershed District (SWWD) indicating the SWWD completed a ravine stabilization project in this area and did not find any evidence of springs.
- Is the Home Owners Association (HOA) responsible for the maintenance of trails, etc? [Yes.]
- It is important to ensure the safety of the intersection that provides the access to the development. [Please see the attached technical memorandum from Bryant Ficek of Spack Consulting. The City Engineer is reviewing this memorandum and will provide comments for the Council meeting.]
- The 5-acre RR-zoned parcel in the southeast corner of the sketch plan needs to be rezoned prior to action regarding the preliminary plat
- Much more detail needs to be provided regarding the buffer zones as part of the preliminary plat
- How are unbuilt lots going to be vegetated? [The developer will seed all lots with a seed mix based on the seed mix used by the DNR and the South Washington Watershed District (SWWD). This seeding will be included in the development agreement, which includes an escrow deposit to ensure it is completed.]
- Lot 20 has a very irregular shape. [The City code, in 12-1387 Lot requirements, provides that "Side lot lines shall be substantially at right angles to straight street lines or radial to curved street lines or radial to lake or stream shores unless topographic conditions necessitate a different arrangement.]
- Do the covenants require 50% of the buildable area to be vegetated or only 50% of the total lot? [The developer indicated 50% of the total lot needs to be vegetated]
- Do the covenants allow barns, farm animals (chickens, etc.) and similar rural/agricultural items? [The developer indicated these would be restricted]

Council Direction Requested

The Council is not being asked to take action regarding the PLCD proposal at this time, but is being asked to provide comments to guide the applicant in preparing the Preliminary Plat application, which is the next step in the PLCD application process. It is important that, if the Council has significant questions, concerns or objections regarding the proposal, they should be communicated to the applicant at this time, so that they can be considered by the applicant in the preparation of a preliminary plat.

Subject: RE: Joe bush Afton creek

Wayne and Joe,
Regarding who is to have an interest in the conservation easement , here is the language from our PLCD ordinance.

"The applicant(s) shall grant a Conservation Easement which shall run with the land in perpetuity to the City of Afton, all of the owners of the lots and parcels to be created in the PLCD, all land owners of property within Afton abutting the PLCD and the Minnesota Land Trust (or similar independent third party approved by the City of Afton), which restricts the lots and parcels, as well as the development rights on the undeveloped parcel(s), within the PLCD to the number of dwelling units approved for the PLCD and the land cover and use approved by the City of Afton as a part of this PLCD."

Regarding who will own and maintain the area in the conservation easement, this will be the Homeowners Association. The ordinance language is as follows:
"All land shown on the final development plan as an undeveloped parcel must be conveyed to a homeowners association or similar organization provided in an indenture establishing an association or similar organization for the maintenance of the planned development. The undeveloped parcel must be conveyed to the homeowners association or similar organization subject to covenants to be approved by the City Council which restrict the undeveloped parcel to the uses specified on the final development plan and which provide for the maintenance of the undeveloped parcel in a manner which assures it continuing use for its intended purpose."

Thanks Joe.

And Ron, one additional question as well. Is the City of Afton intending to co-hold the easement with the Minnesota Land Trust, or would the Land Trust be sole holders?

Thanks much!

Wayne

Subject: 60th Street paving

Joe,
I talked to our Public Works Supervisor about the segment of 60th Street that was removed from the 2017 paving project. The segment is from the end of the pavement on Trading Post Trail to the "Y" at Oakgreen in Denmark Township. The segment was removed from the project for two reasons. One was that we found that a portion of that segment was saturated with groundwater and we didn't have time to resolve that problem in time to be ready for the paving project. The second reason is that some or all of 60th street is located in Denmark Township. Particularly, the segment near the "Y" is located 100% in Denmark Township.

SUPPLIMENTARY NARRATIVE FOR PARK DEDICATIO, LAND TRUST, AND CITY CODE

Property: 14220 60th St S Afton MN 55001
Will Carlson owned 218.6 Acres

Usage: Previously operated under Agriculture Zoning.
Request to Use Ordinance Article XII Sec. 12-2371
PRESERVATION AND LAND CONSERVATION DEVELOPMENTS

Proposer: Will Carlson, Land Owner.
JP Bush Homes, Developer.

Afton Creek Preserve Owner Will Carlson Dedicated Land, Open Space, and Conservation Easements to The City of Afton, Minnesota Land Trust, and HOA. The Site Plan and Development Plan include "Open Space" "Public Access in Three Locations" "Conservancy" "Waterway Protection" "Wildlife Protection" "Scenic Easements" "Trails" "Benches" "Wild Flower Buffers" "Walking Trails" "Permanent Protection and HOA funded maintenance" "Elimination of Lot #1. To Protect the Scenic views per the NRGC"
Per the City code and Parks Plan. The following documents are evidence That the Dedicated land in the Afton Creek Preserve Meets the requirements of City Code for Park Dedication Fees and or Land acquisition for Park or open Space.

Afton Creek Preserve dedication of, Conservancy, Land Trust, Open Space are by "definition" listed in the **2012 Afton Parks Plan.**

Highlighted pages and Language. From 2012 Parks Plan

1. (Page 6) Due to this fact, the committee feels that most parcels the city owns are not suitable for development as parks, either active or passive, and as a whole do not meet the intention of the Park Dedication requirement. The exceptions to these findings are noted below. For this reason the committee recommends the city very carefully consider accepting land donations in the future, and have a clear and defined use for any land received in lieu of park dedication funds.

2. (Page 6) Per the 2008 Comprehensive Plan, a priority for the acceptance of land in lieu of Park Dedication funds should be to obtain designated open spaces to provide for wildlife corridors, as well as to protect locally important water resources and scenic and natural features.

3. (Page 7) In all areas, and as resources permit, the city should work to reduce the negative impact of invasive species, most notably buckthorn in our parks

4. (Page 8) The preservation of appropriate recreational and scenic areas, natural resources, wildlife habitat and unique landforms is a vital responsibility for all sectors of government. This obligation becomes increasingly apparent as the Twin Cities Metropolitan Area expands outwards and reduces open space.

5. (Page 8) Open space is defined as public land owned by the city and/or private land leased by the city for use by the general public. Open space can be used as a buffer between uses, a connector of recreational facilities or simply a natural area, which is preserved for its resources, landforms, wildlife habitat or aesthetic value. Open space can be a visual entity as well as a physical entity. Such an area need not be a vast expanse of land to be considered open space. A narrow strip of land, in some cases, can afford the visual effect of openness, while acting as a physical connector. Scenic roadways, trails and bicycle paths, although not extremely wide, can supply visual open space and act as linkage between recreational areas, thus providing the active aspect of recreation, while at the same time providing the passive form - open space. Afton's approach toward building a parks, recreation and open space system is to evaluate open space for its recreational and scenic values, natural resources, wildlife habitat and unique landforms, and to coordinate acquisition and development. The plan is intended to chart a course and provide a framework for developing and maintaining the Afton Park system. The Plan will also serve as a guide for city commissioners, the City Council and the citizens of Afton. Afton will coordinate its planning efforts with other governmental units, foundations, agencies and individuals that plan or provide recreational or open space affecting Afton.

6. (Page 9) C. Conservancy Park - Park that has unusual topography, flood plain, shore line, fragile soils, wetland, unique soil or rock formations, ravines. Serves limited passive use, trails, plant and animal viewing, interpretation, areas, canoe landings, swimming areas, picnicking

7. (Page 9) E. Open Space Park - Open space can be thought of as a divider of uses, a connector to active or passive recreation or simply a natural area that is preserved for its aesthetic, natural or scenic value. It also may be parkland the city has acquired in the past and elected not to develop

8. (Page 22) **FUTURE CONSERVANCY PARK**
The 2008 Afton Comprehensive Plan Highlights several areas for preservation and protection. These are Creeks, coulees and Mounds.

9. (Page 24-25) **SUMMARY OF RECOMMENDATIONS**

Secs. 12-2356 – 12-2370. Reserved.[452]

ARTICLE XII. PRESERVATION AND LAND CONSERVATION DEVELOPMENTS.[453]

Sec. 12-2371. Scope.

This article applies to Preservation and Land Conservation Developments (PLCD) in the Agricultural (AG) zoning district.

Sec. 12-2372. General provisions.

A PLCD is a tract of land that is developed as a unit under single or unified ownership or controls. A Preservation and Land Conservation Development may be allowed in the AG zoning district to preserve prime agricultural land, woodland, wildlife habitat, vistas, groundwater recharge areas, areas with sensitive soils or geological limitations and areas identified in the Comprehensive Plan. Uses not otherwise allowed in the zoning district are prohibited within a planned development unless specifically permitted by provisions of this ordinance.

Sec. 12-2373. Purpose.

The purposes of this article are:

A. To permit subdivisions in the Agricultural Zoning District which require the construction of a new public street.

B. To encourage a more creative and efficient development of land and its improvements through the preservation of agricultural land, natural features and amenities than is possible under the more restrictive application of zoning requirements, while at the same time, meeting the standards and purposes of the comprehensive plan and preserving the health, safety, and welfare of the citizens of the City.

C. To preserve open space, to preserve the natural resources of the site and to preserve wildlife habitat and corridors.

D. To facilitate the economical provision of streets and public utilities.

E. To allow the transfer of development rights (density) within a subdivision in order to preserve agricultural land, open space, natural features and amenities.

Sec. 12-2374. Permitted uses.

The Permitted Uses are:

A. Those uses that are permitted in the underlying zoning district;

B. Subdivisions that require the construction of a new public street in the AG zoning district;

Sec. 12-2375. General standards for approval.

A. A Conditional Use Permit shall be required for all preservation and land conservation developments. The City may approve the preservation and land conservation development only if it finds that the development satisfies all of the following standards:
   1. The preservation and land conservation development is consistent with the comprehensive plan of the City.

---

[452] Ord. 97-55, 6/18/02, Ord 04-2009, 5/19/2009

[453] Ord 06-2008, 4/15/2008; Ord 02-2014, 5/20/2014

2. The preservation and land conservation development is an effective and unified treatment of the development possibilities on the project site and the development plan provides for the preservation of unique natural amenities.
3. The preservation and land conservation development can be planned and developed to harmonize with any existing or proposed development in the areas surrounding the project site.

B. The tract is a minimum of eighty (80) contiguous acres in size and that all of the following conditions exist:
1. The proposal better adapts itself to the physical and aesthetic setting of the site and with the surrounding land uses than could be developed using strict standards and land uses allowed within the underlying zoning district.
2. The proposal would benefit the area surrounding the project to a greater degree than development allowed within the underlying zoning district.
3. The proposal would provide land use and/or site design flexibility while enhancing site or building aesthetics to achieve an overall higher quality of development than would otherwise occur in the underlying zoning district.
4. The proposal would ensure the concentration of open space into more workable or usable areas and would preserve the natural resources of the site more effectively than would otherwise occur in the underlying zoning district.

C. At least fifty (50) percent of the total tract is preserved as an undeveloped parcel.

Sec. 12-2376. Density, Frontage on a Public Street and Length of Cul-de-sac requirements.[454]

A. The average density over the proposed PLCD shall not exceed the maximum density permitted in the underlying zoning district.

B. The maximum length of cul-de-sacs may be exceeded to accommodate curvilinear streets and other design elements that tend to preserve the rural character or other resources within the PLCD.

Sec. 12-2377. Coordination with subdivision regulations.

A. It is the intent of this article that subdivision review under Chapter 12 be carried out simultaneously with the review of a planned development under this article.

B. The plans required under this article must be submitted in a form that will satisfy the requirements of Chapter 12 for the preliminary and final plats.

C. Parcels which contain their maximum permitted density or have been previously subdivided to their permitted density may not be joined to a PLCD.

Sec. 12-2378. Pre-application meeting.

Prior to the submission of any plan to the Planning Commission, the potential applicant is encouraged to meet with the City Administrator to discuss the contemplated project relative to community development objectives for the area in question and to learn the procedural steps and exhibits required. This includes the procedural steps for an Administrative Permit and a preliminary plat. The potential applicant may submit a simple sketch plan at this stage for informal review and discussion. The potential applicant is urged to seek the advice and assistance of the City staff to facilitate the informal review of the simple sketch plan. The pre-application meeting process is entirely optional for the potential applicant and does not constitute an application within the meaning of this section.

Sec. 12-2379. General development plan.

A. An applicant shall make an application for an Administrative Permit following the procedural steps as set forth in Section 12-78.

B. In addition to the criteria and standards set forth in Sec. 12-78 of this article for the granting of Administrative Permits, the following additional findings shall be made before the approval of the outline development plan:

---

[454] Ord 02-2014, 5/20/2014

D. The City Council shall review the final development plan and final plat. If the final development plan is approved by the City Council, the City Administrator shall issue a Conditional Use Permit to the applicant.

E. The applicant(s) shall grant a Conservation Easement which shall run with the land in perpetuity to the City of Afton, all of the owners of the lots and parcels to be created in the PLCD, all land owners of property within Afton abutting the PLCD and the Minnesota Land Trust (or similar independent third party approved by the City of Afton), which restricts the lots and parcels, as well as the development rights on the undeveloped parcel(s), within the PLCD to the number of dwelling units approved for the PLCD and the land cover and use approved by the City of Afton as a part of this PLCD. If neither Minnesota Land Trust nor any comparable organization will accept the Conservation Easement the City of Afton, in its sole discretion, may upon a specific finding that no conservation organization will accept a Conservation Easement, waive such requirement. In the case of such waiver, the applicant(s) shall be required to extend the grant of a Conservation Easement to the owners of property that abuts all abutting property to the PLCD.

Sec. 12-2381. *Enforcement of development schedule.*

The construction and provisions of all of the common open spaces and public and recreational facilities that are shown on the final development plan must proceed at the same phase as the construction of dwelling units. At least once every six (6) months following the approval of the final development plan, the City Administrator shall review all of the building permits issued for the planned development and examine the construction which has taken place on the site. If he shall find that the rate of construction of dwelling units is greater than the rate at which common open space and public and recreational facilities have been constructed and provided, he shall forward this information to the City Council, which may revoke the PLCD permit.

Sec. 12-2382. Conveyance and maintenance of undeveloped parcel.

A. All land shown on the final development plan as an undeveloped parcel must be conveyed to a homeowners association or similar organization provided in an indenture establishing an association or similar organization for the maintenance of the planned development. The undeveloped parcel must be conveyed to the homeowners association or similar organization subject to covenants to be approved by the City Council which restrict the undeveloped parcel to the uses specified on the final development plan and which provide for the maintenance of the undeveloped parcel in a manner which assures it continuing use for its intended purpose.

B. If a homeowners association is created, the applicant shall submit plans at the time of final plan of development and documents which explain:

1. Ownership and membership requirements.
2. Articles of incorporation and bylaws.
3. Time at which the developer turns the association over to the homeowners.
4. Specific listing of items owned in common including such items as roads, recreation facilities, parking, common open space grounds, and utilities.

Sec. 12-2383. Standards for undeveloped parcel.

No open area may be approved as common undeveloped parcel under the provisions of this article unless it meets the following standards:

A. The location, shape, size, and character of the undeveloped parcel must be suitable for the planned development.

B. The undeveloped parcel must be used for amenity or recreational purposes. The uses authorized for the undeveloped parcel must be appropriate to the scale and character of the planned development, considering its size, density, expected population, topography, and the number and type of dwellings to be provided.

C. The undeveloped parcel must be suitably improved for its intended use but common space containing natural features worthy of preservation may be left unimproved. The buildings, structures and improvements which are permitted in the undeveloped parcel must be appropriate to the uses which are authorized for the

B. Economic considerations alone shall not constitute a practical difficulty if reasonable use for the property exists under the terms of this article.

C. Applications for any such variance shall be made in writing by the subdivider at the time when the plat is filed for consideration. Such application shall state fully all facts relied upon by the subdivider, and shall be supplemented with maps, plans or other additional data which may aid the Planning Commission and the City Council in the analysis of the proposed project. Such variances shall be considered at the next regular meeting held by the Planning Commission. The plans for such development shall include any covenants, restrictions, or other legal provisions necessary to guarantee the full achievement of the proposed plat. Any variance or modifications thus granted shall be recorded and entered in the minutes setting forth the reasons for granting the variance.

Sec. 12-1267. Security interest.[346]

Creation of a security interest in a portion of a parcel less than the entire parcel does not entitle the property to subdivision even upon foreclosure of the security interest, unless otherwise approved by the City Council and the parcel is in conformance with this article and the zoning ordinance, article II of this chapter.

Sec. 12-1268. Building permits.[347]

No building permit shall be issued for any construction, enlargement, alteration, or repair, demolition or moving of any building or structure on any lot or parcel until all the requirements of this article have been fully met.

Sec. 12-1269. Violation and penalties.[348]

Any person who violated any of the provisions of this article, or who sells, or offers for sale any lot, block or tract of land herewith regulated before all the requirements of this article have been complied with shall be guilty of a misdemeanor, and upon conviction thereof be subject to fine and/or imprisonment. Each day that a violation is permitted to exist shall constitute a separate offense.

Sec. 12-1270. Park and open space dedication.[349]

A. *Purpose.* The City Council recognizes that it is essential to the health, safety, and the welfare of the residents of this City to provide for the preservation of land for parks, playgrounds, public open space, and trails. The City Council also finds that it is appropriate that each subdivision within the City contribute toward the City's parks, playgrounds, open spaces, and trails in proportion to the burden it will place upon the City's park and open space system. Therefore, this park and open space dedication requirement is established to require new developments at the time of subdivision to contribute toward the City's park and open space system in rough proportion to the relative burden they will place upon that system, and:

1. To develop a limited number of major public green spaces which shall retain the natural and scenic features of the land and serve as a wilderness environment for City residents to enjoy; and
2. To create multiple use, non-motorized trails along roads or as a link between various points of interest and public facilities where such trails would enhance the recreational opportunities for residents and provide a safe alternative means of travel within the City; and
3. If future development creates a need for a neighborhood park, land may be acquired for that purpose pursuant to this article.

B. *Requirements.* Subdividers, as a prerequisite to approval of a subdivision, shall dedicate to the City for park or playground purposes or for public open space or trail systems a reasonable portion of the land being subdivided or in lieu thereof a cash equivalent. The form of dedication, land or cash, (or any combination) shall be decided by the City and dedicated or paid prior to City signing the final plat, or prior to final City Council approval of minor subdivisions.

---

[346] Code 1982, § 305.1011

[347] Code 1982, § 305.1100, **Cross reference(s)**--Building permits, inspections and fees, § 12-1804.

[348] Code 1982, § 305.1102

[349] Ord 47-2004, 8/17/2004

1. Reasonable portion of land shall be that portion of land which could be purchased with the amount of park dedication fee payment owed by the subject subdivision on a per dwelling unit basis.
2. Land to be dedicated shall be reasonably adaptable to use for active park and recreation purposes, shall be at a location convenient to the people to be served, and shall be consistent with the general locations as indicated in the official parks map and/or comprehensive parks plan. Factors used in evaluating the adequacy of proposed park and recreation areas shall include size, shape, topography, geology, hydrology, tree cover, access and location.
3. Where a proposed park, playground, recreational area, or open space that has been indicated in the official park map and/or comprehensive park plan is located in whole, or in part, within a proposed subdivision the site must be dedicated to the City. If the subdivider chooses not to dedicate an area in excess of the land required hereunder for such proposed public site, the City shall not be required to act to approve or disapprove the preliminary plat of the subdivision for a period of sixty (60) days after the subdivider meets all the provisions of the Subdivision Ordinance in order to permit the Council to consider the proposed plat and to consider taking steps to acquire, through purchase or condemnation, all or part of the public site proposed under the official park map in the comprehensive parks plan.
4. Land area conveyed or dedicated hereunder may not be included by a subdivider as an allowance for purposes of calculating the density requirements of the subdivision as set out in the City Zoning Ordinance and shall be in addition to and not in lieu of scenic easement, conservation easements, and open space requirements pursuant to the City Zoning Ordinance.
5. The City may determine that land not distinguished in its official parks map and/or comprehensive parks plan is needed as a neighborhood park. Should this determination be made, an amendment to the official parks map and/or comprehensive parks plan shall be made identifying the neighborhood park. Should the City determine that land in excess of what can be obtained via Section 12-1270 (B) (1) is required, the remaining area shall be purchased from the applicant by the City via its park and trail fund at a fair market value.
6. When a cash park dedication fee is paid in lieu of a dedication of land, the subdivider shall pay a per dwelling unit fee as described in Section 12-1270 (C) (3) and (D).
7. The City shall maintain a separate fund into which all cash park dedication fees received from owners or subdividers in lieu of conveyance or dedication of land for park or playground, public open space or trail purposes shall be deposited and shall make, from time to time, appropriations from such fund for acquisition of land for park and playground purposes, for developing existing park and playground sites, for public open space and trails, or for debt retirement in connection with land previously acquired for parks and playgrounds, which will benefit the residents of the City.

C. *Administrative Procedure.* When an application for subdivision is submitted, the City Administrator and City Planner shall evaluate its location with that of the official parks map and the comprehensive parks plan to determine whether land is to be recommended for dedication.

1. Should the subject site be located within an area designated for future parkland, open space, or trail corridor, as designated in the official parks map and comprehensive parks plan, the City Administrator and City Planner shall submit the proposed subdivision to the Park Committee for its review and recommendation.
2. The Park Committee shall make a determination as to what portion or portions of the site may be dedicated to the City for parkland, open space, or trail use as described in the official park map in the City's Comprehensive Park plan. The subdivider shall be made aware of this recommendation which will be forwarded to the Planning Commission for their review and recommendation to the City Council.
3. Should the subject site be outside of any future proposed parkland, open space, trail or wildlife corridors, or wildlife habitat areas as defined in the official park map and the comprehensive park plan, the City Administrator shall inform the subdivider and the process will continue with the recommendation for a cash park dedication fee in lieu of land dedication in a per dwelling unit amount as defined in Section 12-1270 (D).
4. Though the subject site may not be located in an area identified for future parkland, open space, trail or wildlife corridor, or wildlife habitat area in the official park map and comprehensive park plan, the Planning Commission may recommend and the City Council may require that a reasonable portion of the land be dedicated to the City, at which time the subdivision will be sent to the Parks Committee for their review and recommendation as to the sites location. Reasonable portion of the land shall be defined as that portion of land in which could be purchased with the amount of park dedication fee payment owed by the subject subdivision per dwelling unit being proposed.

B. The annual probability of increased rate of surface runoff due to new construction shall not exceed one percent.

1. Annual probability shall not exceed one percent means that a 100-year storm of appropriate duration should be used for design but that storms of lesser magnitude (e.g., two-year or ten-year storms) should be examined as well.
2. Surface runoff is the water leaving the property on or very near the surface (e.g., including the gravel subgrade of a parking lot).
3. Surface runoff rate is the peak discharge as calculated by the S.C.S. T R 20 for a storm of critical duration.

Sec. 12-1384. Easements.[372]

A. *Provided for utilities.* Easements of at least 20 feet wide, centered on rear and other lot lines as required, shall be provided for utilities where necessary as recommended by the City Engineer. Where underground utilities are being installed, a ten-foot wide front or side yard easement may be required.

B. *Provided for drainage.* Easements shall be provided along each side of the centerline of any watercourse or drainage channel, whether or not shown on the comprehensive plan, to a sufficient width to provide proper maintenance and protection and to provide for stormwater runoff and installation and maintenance of storm sewers.

C. *Dedication.* Utility and drainage easements shall be dedicated for the required use.

D. *Trails.* Trail easements shall be provided as required by the City Council in compliance with the comprehensive plan.

E. *Scenic easements.* Scenic easements shall be required on slopes of 18 percent and greater, wetlands, drainageways, and other lands and soils judged to be fragile by the soil conservation service. Scenic easements also shall be required on slopes greater than 12 percent if the land is unbuildable or heavily wooded and would be affected adversely by development. Such easements shall be required as a condition of subdivision approval, and shall prohibit the following activities: Dumping, burning, grading, grazing of domesticated farm animals, vegetative cutting in excess of prudent forestry practices as approved by the Forestry Division of the Minnesota Department of Natural Resources, motorized vehicles, construction of any structure including driveways. Such scenic easements shall be recorded against the affected lots in the subdivision.

1. The City shall have the right to reasonable access to easement areas to verify compliance with the restrictions, and to cross adjacent lands in common ownership with the easement area to obtain such access.
2. A scenic easement prohibits the owner from engaging in harmful activities in the area subject to the easement, but does not grant the general public any right of access to the land.

Sec. 12-1385. Street names.[373]

Names of new streets shall not duplicate existing or platted street names unless a new street is a continuation of or in alignment with the existing or platted street, if it shall bear the same name of the existing or platted street so in alignment. Street names shall conform to the county uniform street naming and property numbering system as applicable.

Sec. 12-1386. Block design.[374]

A. Block length and width or acreage within bounding streets shall be such as to accommodate the size of residential lots required in the area by the zoning ordinance, article II of this chapter, and to provide for convenient access, circulation control, and safety of street traffic.

Joe To answer your question about roads and FD response. We have worked withy city of Afton to develope there road specs with our response in mind. They developed these specifications with our vehicle size, weight, and turning radius. So as far as the fire deptment is concerned if you follow the road specs from the city of Afton there should be no issues with our response.

RE: City of Afton Environmental Assessment Worksheet (EAW) – Afton Creek Preserve
Metropolitan Council Review No. 21714-1
Metropolitan Council District 12

Dear Mr. Morse:

The Metropolitan Council received an EAW for a proposed residential project on April 17, 2017. The EAW is for a proposed residential cluster (20) lot single-family development on 218.6 acres with 109.7 acres of conservation easement protection for Trout Brook. The development will have individual wells and septic systems, and special vegetative buffers protecting steep slopes. The development site was previously used for farming, pasture, hay land and forest land.

The proposed project area is zoned Agriculture, along with Shoreland Management areas and a Conservancy Overlay. The City's 2030 Comprehensive Plan Current Land Use Map identifies this area as including existing land uses such as deciduous tree cover, cultivated, pasture, grassland, residential, bluff areas, streams and wetlands. The City's 2030 Future Land Use Map guides this area as Agriculture which allows a maximum density of 4 units per 40 acres.

Council staff has conducted a review of this EAW to determine its adequacy and accuracy in addressing regional concerns and the potential for significant environmental impact. The staff review finds that the EAW is complete and accurate with respect to regional concerns and does not raise issues of consistency with Council policies. The following section offers advisory comments for the City's consideration.

Item 13 – Fish, wildlife, plant communities, and sensitive ecological resources (rare features) (Jim Larsen, 651-602-1159)
The EAW states that the proposed 60-foot vegetative "backyard" lot buffers will protect steep slope areas (identified as "bluff areas of over 18% slopes" on page 12, and "steep slope areas" of unspecified slope elsewhere in the document) against erosion, and increase wooded/forest and brush/grassland areas on lots within the development. Appendix B is referenced for plans of the buffer program, but it is not clear from the information provided, if all lots or only a portion will contain 60-foot buffer protection areas, precisely where the boundaries of the buffer will begin, and what level of preservation will be extended to site amenities "behind" the buffer. It appears from the Council's GIS database slope overlay information, that the only proposed lots containing existing mapped slopes in excess of 18% are lots 3 and 4 in the southeast corner (lot 3 contains an existing home which is to remain), the very north edge of lots 15 and 16 in the northeast portion of the site, and a few isolated areas within the proposed 100-acre open space conservation easement area in the northwest corner of the site.

2 of 2

While we agree that avoiding impacts to steep slope areas on the site by application of a protection buffer to those areas will be beneficial, Council staff is also concerned about protection of areas within proposed lots to be developed that are dominated by mature native oak woodlands. The woodlands have been mapped by the Council and Minnesota Department of Natural Resources in their Natural Resources Inventory/Assessment program as supporting native red and white oak and sugar maple communities of "moderate" assessed quality. Large portions of lots 10 through 14 along the northern site boundary – in some cases, more than half of each lot's platted area, and smaller portions of lots 15 and 16, consist of these mature woodlands. We recommend these woodland areas be specifically protected from impacts by future land owners within the development, either by redrawing of proposed lot lines to include (more or all of) the wooded areas within the proposed development's conservation easement area, or by affording them a similar level of protection as provided by the conservation easement from future impacts in some fashion.

While we understand the importance of and mechanism by which the stream channel areas within the proposed 100-acre open space conservation easement area will be protected, we do not have a similarly clear understanding of precisely what protection mechanisms will be utilized with the 60-foot buffers to protect natural resource woodland stands behind those buffers that will be located on privately held land.

This concludes the Council's review of the EAW. The Council will not take formal action on the EAW. If you have any questions or need further information, please contact Corrin Wendell, Principal Reviewer, at 651-602-1832.

Sincerely,

Patrick Boylan for:

PLANNING REPORT

TO:	Afton Planning Commission
FROM:	Bob Kirmis
DATE:	May 22, 2017
SUBJECT:	Afton - Afton Creek Preserve Sketch Plan
CASE NO:	280.02 - 17.02

BACKGROUND

Joe Bush, on behalf of J.P Bush Homes, has submitted a sketch plan for a preservation and land conservation development (PLCD) entitled "Afton Creek Preserve." The subject site overlays 219 acres of land located north of 60th Street South (along the City's southern boundary) and west of Trading Post Trail South.

The subdivision calls for the creation of 20 single family residential lots all of which measure 5 acres in size and are mainly located on the eastern half of the site. Of the 219 acres which comprise the subject site, 110 acres are proposed to lie within a conservation easement (intended to protect a trout stream and protect open space).

The subject site overlays seven individual parcels of land. With the exception of a 5-acre parcel located in the extreme southeast corner of the site (14220 60th Street), all parcels which comprise the subject site are zoned A, Agricultural. Conservation subdivisions (PLCD's) are allowed within Agricultural zoning districts as a conditional use. The 5-acre parcel in the southeast corner is zoned RR, Rural Residential.

That portion of the site which overlays the trout stream and adjacent flowage lie within the City's Shoreland Management Area, the boundaries of which measure 1,000 feet from each side of stream banks.

Also, to be noted is that the trout stream, as well as flowage which lies along stream, lies within the City's Conservancy Overlay District, the intent of which is to manage areas with unique natural and biological characteristics.

The purpose of the sketch plan review procedure is to inform applicants of the City's procedural requirements for subdivision and applicable zoning and subdivision standards and convey the extent to which proposed subdivisions conform with such regulations. In this regard, no formal action on the submitted sketch plan will be taken. Informal feedback on the submitted sketch plan is intended to precede the preparation of a formal preliminary plat application.

Exhibit D: Concept Plan Alternative (prepared by Natural Resources and Groundwater Committee)

ISSUES

Environmental Assessment Worksheet (EAW). According to both Minnesota Statutes (Rules 4410.4300 Subpart 36) and the Afton City Code, an Environmental Assessment Worksheet (EAW) must be prepared for projects which result in the permanent conversion of 80 or more acres of agricultural, native prairie, forest, or naturally vegetated land to a more intensive developed land use. Thus, the proposed subdivision has prompted the preparation of an EAW.

The purpose of the EAW process is to disclose information about potential environmental impacts of a project. Information disclosed in the EAW process is intended to determine whether a more detailed Environmental Impact Statement (EIS) is needed and to indicate how the project can be modified to lessen its environmental impacts. To be specifically noted is the EAW process is not intended to represent project approval.

The completed EAW has been sent to various agencies as identified on the Environmental Quality Board's distribution list for review and comment. The 30-day comment period for the EAW ends on May 24, 2017. Thus, comments will be received prior to the June 6, 2017 Planning Commission meeting. Such comments should be taken into account by the applicant as part of the development (refinement) of various plans to be provided with forthcoming preliminary and final plat applications.

Based on information provided in the EAW, the preparation of an Environmental Impact Statement (EIS) is not expected. To be noted however, is that comments and recommendations received on the EAW related to the mitigation of potential environmental impacts should be taken into account by the applicant in the preparation of detailed subdivision plans. Received comments can be made conditions of forthcoming subdivision approval by the City.

Processing. Following sketch plan review, the following approvals are minimally necessary to accommodate the project:

1. Subdivision (preliminary plat and final plat)
2. Conditional use permit for PLCD development

Issues associated with the possible rezoning of the 5-acre parcel (14220 60th Street) from RR, Rural Residential to A, Agricultural in conjunction with the forthcoming subdivision application shall be discussed in a later section of this report.

Purpose of PLCD. According to the City Code (section 12-2373), preservation and land conservation developments (PLCD), are intended to:

A. *Permit subdivisions in the Agricultural Zoning District which require the construction of a new public street.*

B. *Encourage a more creative and efficient development of land and its improvements through the preservation of agricultural land, natural features and amenities than is possible under the more restrictive application of zoning requirements, while at the same time, meeting the standards and purposes of the comprehensive plan and preserving the health, safety, and welfare of the citizens of the City.*

C. *Preserve open space, to preserve the natural resources of the site and to preserve wildlife habitat and corridors.*

D. *Facilitate the economical provision of streets and public utilities.*

E. *Allow the transfer of development rights (density) within a subdivision in order to preserve agricultural land, open space, natural features and amenities.*

While it appears that the proposed subdivision fulfills the preceding objectives, such finding should be made by City Officials as part of formal action on the forthcoming subdivision and conditional use permit applications.

Comprehensive Plan. According to the City's 2008 Land Use Plan, the majority of the 219-acre subject site is guided for "Agricultural" use. Such land use designation directs a maximum density of one dwelling unit per 10 acres of land.

The Land Use Plan also directs "Rural Residential" use of the five-acre parcel located in the extreme southeast corner of the site. Such land use designation imposes a minimum 5-acre lot size requirement with a minimum of 2.5 acres of contiguous buildable area.

Zoning. Reflective of its designation within the Comprehensive Plan, the majority of land within the subject site is zoned A, Agricultural. Within A, Agricultural Districts,

conservation subdivisions (PLCD's) are allowed by conditional use permit.

As indicated, the existing 5-acre parcel located in the southeast corner of the site (14220 60th Street) is zoned RR, Rural Residential. While minimum lot area standards in the A, Agricultural District for PLCD subdivisions are the same as those imposed within the RR, Rural Residential District (5 acres), it should be recognized that the zoning of the existing RR parcel is tied to its current legal description. The submitted sketch plan calls for the reconfiguration of the RR parcel such that it includes public right-of-way as well as the conveyance of a portion of the lot to abutting Lot 20 to the north. Without a rezoning action, proposed Lots 3 and 20 would have two zoning designations (A and RR). This is typically an undesirable condition.

To ensure that all proposed lots within the subdivision are afforded the same property rights (via zoning), consideration should be given to the rezoning of the 14220 60th Street parcel from RR, Rural Residential to A, Agricultural as part of the formal application for subdivision.

While the City's Land Use Plan (map) designates the parcel in question for "Rural Residential" use, it is believed the following findings can be made in support zoning change without the need for the processing a Land Use Plan amendment.

1. The guided density of the 5-acre "area" in question is consistent with that proposed via the PLCD and no change to the existing use is proposed.

2. The 5-acre parcel is clearly part of the proposed PLDC and its land area has been used in the calculation of allowed development density.

3. PLCD's are not listed as a permitted use in the RR zoning district.

4. The parcel in question lies between lands guided "Rural Residential" and "Agricultural" uses. The original intent related to the separation of these uses would not change as a result of the rezoning.

5. The land use categories depicted on the Land Use Plan map correspond to individual parcels. The configuration of the parcel in question will change slightly as a result of the proposed subdivision. Without the zoning change, Lots 3 and 20 will hold two zoning designations and be inconsistent with the balance of the lots within the subdivision.

This issue, and specifically the need for such action and Land Use Plan impacts, should be subject to further comment and recommendation by the City Attorney.

Streets

Access. As shown on Exhibit B, access to the majority of the lots (18) within the subdivision is proposed via two cul-de-sacs which intersect 60th Street at a single

point near Trading Post Trail. The acceptability of the street intersection location should be subject to comment and recommendation by the City Engineer.

To be noted is that some concerns exist related to the proximity of the access to steep slopes in the immediate area. As a condition of subdivision approval, an assurance should be made that slopes in excess of 18 percent will not be disturbed. This issue should be subject to further comment and recommendation by the City Engineer.

Aside from the 18 lots proposed to be accessed via the 60th Street cul-de-sac, two additional lots in the extreme southwest corner of the site are proposed to be provided direct driveway access via 60th Street.

Cul-de-Sac Length. As mentioned, 18 lots within the subdivision are proposed to be accessed via two cul-de-sacs. The 60th Street roadway access technically splits into two cul-de-sacs. The longest of the two cul-de-sacs measures approximately 3,400 feet in length which significantly exceeds the maximum cul-de-sac requirement of 1,320 feet imposed in the City's Subdivision Ordinance.

While the Ordinance states that cul-de-sac lengths within PLCD subdivisions may exceed the referenced cul-de-sac length requirement (provided that the preservation of the rural character and natural resources will result), immediate feedback on the acceptability of the proposed cul-de-sac length is requested of City Officials.

In the opinion of Planning Staff, there are both pros and cons associated with the cul-de-sac as currently proposed. These are summarized below:

Pros:

1. Flexibility from the referenced cul-de sac length requirement of the Ordinance is allowed in PLCD subdivisions provided preservation of natural resources will result. Remedy to the excessive cul-de-sac length would likely be the creation of a street connection to Odell Avenue. Such street connection could have negative impacts upon natural resources in the area.

2. Numerous cul-de-sacs presently exist within the City which exceed the maximum 1,320-foot length requirement of the Subdivision Ordinance. Thus, the proposed condition does not differ from that previously allowed by the City.

3. A second access to the subdivision via Odell Avenue may introduce negative traffic impacts on residents located east of the subject site along Trading Post Trail and Odell Avenue.

4. A second access to Odell Avenue would result in increased street

In addition, a minimum width and depth requirement of 300 feet is imposed. All proposed lots meet minimum area, width and depth requirements of the A, Agricultural District and Shoreland Management District.

To be noted is that the applicant will be required to demonstrate that each proposed single family lot will have a buildable area of at least 2.5 acres. The Zoning Ordinance defines "buildable area" as land having a slope of 13 percent or less and having enough suitable soil for the installation of two on-site sewage treatment systems. The Ordinance also notes that "buildable area" may include required building setbacks.

In regard to the proposed lot configuration, it is important to note that the Natural Resources and Groundwater Committee has suggested that the subdivision design be modified to better preserve environmentally sensitive lands (steep slopes and the trout stream). Specifically, the Committee has recommended that the open space area be expanded to include the following areas:

- The northern one-half of Lots 13 and 14
- The western one-half of Lot 4
- The western one-third of Lot 3

The Natural Resources and Groundwater Committee has also prepared an alternative concept plan which incorporates the preceding recommendations (attached as Exhibit C). The alternative concept plan calls for the elimination of two lots within the subdivision.

The recommendations of the Natural Resources and Groundwater Committee should be taken into account as part of the forthcoming formal application for subdivision.

Jennifer Sorensen, East Metro Hydrologist for the Department of Natural Resources (DNR), has indicated the comments from the DNR will also include increased protection of the stream and the areas from which the stream is spring-fed, which include Lots 3 and 4.

Setbacks. Within the A, Agricultural District and the Shoreland Management District, the following minimum setbacks apply:

Side Yard:	50 feet
Front Yard:	105 feet (from roadway centerline)
Rear Yard:	50 feet
From OHWL of Trout Stream:	200 feet

It appears that all proposed lots illustrate an ability to meet the aforementioned setbacks (via illustrated building pads).

Use of Open Space. As part of formal subdivision processing, the intended use of the designated open space should be conveyed by the applicant. Of specific interest are

any intended recreational purposes and the future construction of facilities intended to accompany such uses.

According to the PLCD requirements of the Ordinance (Section 12-2383), buildings, structures and improvements located upon the undeveloped parcel must be designed in a manner which conserve and enhance the amenities of the parcel in regard to its topography and its unimproved condition.

Also to be noted is that Section 12-2381 of the Ordinance stipulates that construction of recreational facilities shown on the PLCD development plan must proceed at the same time as the construction of the dwelling units.

Homeowner's Association Requirements. Section 12-2382 of the Ordinance states that, if a homeowner's association is to be created, its various requirements (ownership requirements, bylaws, etc.) must be submitted as part of the PLCD for City review.

The applicant has provided a copy of proposed covenants, restrictions and conditions which would apply to property owners within the subdivision. Requirements include, but are not limited to, the following:

- Association duties
- Assessments
- Architectural controls
- Use of common properties
- Prohibited uses
- Water maintenance/management

Homeowner's association-related issues should be subject to further comment by the City Attorney.

Wetlands. According to the EAW, wetlands comprise 13 acres of the 219-acre subject site. Such wetlands lie along the trout stream and **presently** lie within the proposed conservation easements. In this regard, the proposed lot layout is not expected to impact any existing wetlands.

Wetland-related issues should be subject to further comment and recommendation by the City Engineer.

Easements. As a condition of subdivision approval, a conservation easement must be established over the designated open space. Such easement must run with the land in perpetuity to the following:

- The City of Afton
- All owners of the lots within the PLCD
- Landowners within Afton which abut the PLCD
- Minnesota Land Trust

In addition to the referenced conservation easement, easements for drainage, utilities and scenic preservation should be provided over individual lots as may be recommended by the City Engineer.

Septic Systems. As part of the forthcoming preliminary plat submission, primary and secondary septic sites must be illustrated in compliance with City specifications as provided in Section 12-413 of the Zoning Ordinance.

Permits for individual sewage treatment systems will be issued by the Washington County Department of Public Health. In this regard, review of proposed septic designs and final septic permits must be received from Washington County prior to building permit approval.

Park Dedication. According to Section 12-1270 of the Subdivision Ordinance, subdividers must dedicate to the City a reasonable portion of the land being subdivided for park purposes or in lieu thereof, a cash equivalent. The form of dedication, land or cash, (or any combination) must be decided by the City and dedicated or paid prior to City signing the final plat.

To be noted is that the Natural Resources and Groundwater Committee has recommended that the southwest corner of the subject site, south of the trout stream, be dedicated as City parkland.

Prior to preliminary plat consideration by the Planning Commission, the submitted sketch plan must be subject to review and recommendation by the City's Park Committee.

The City's 2012 Park Plan does not illustrate any future parks or trails within the subject site. With this in mind, a calculation of a possible cash contribution (as opposed to land dedication) is considered worthwhile. According to the Ordinance, a cash park dedication fee, in lieu of land dedication, shall be equivalent to 7.5 percent of the predevelopment value of the land to be subdivided, subject to a minimum fee of $5,000 per dwelling unit and a maximum fee of $10,000 per dwelling unit.

Preliminary Plat Data Requirements. As part of preliminary plat processing, informational requirements as provided in Section 12-1328 of the Subdivision Ordinance must be satisfied. Required information includes, but is not limited to, the following:

- Existing Conditions (site survey)
- Preliminary Plat
- Grading and Drainage Plan
- Erosion/Sediment Control Plan

Additional Comments. In addition to the comments provided above, any comments received from the following must also be considered as part of the sketch plan

evaluation and in the preparation of the preliminary plat:

- City Engineer
- City Attorney
- Natural Resources and groundwater Committee
- Park Committee
- Washington Soil and Water Conservation District
- Watershed District
- Natural gas, electric and cable communications utilities
- Fire District
- School District
- Other agencies not identified above but included on the EAW distribution list.

This material is scheduled to be discussed at the forthcoming June 5, 2017 Planning Commission meeting.

AFTON PARKS, RECREATION AND OPEN SPACE PLAN

1. 2012 SUMMARY:

In preparation for this update to Afton's Park Plan, the Park Committee met monthly for one year to review the existing plan and to tour each of the listed parks. In discussions, it became clear that, historically, the city had accepted marginal land from developers in lieu of paying the park dedication fee. Due to this fact, the committee feels that most parcels the city owns are not suitable for development as parks, either active or passive, and as a whole do not meet the intention of the Park Dedication requirement. The exceptions to these findings are noted below. For this reason the committee recommends the city very carefully consider accepting land donations in the future, and have a clear and defined use for any land received in lieu of park dedication funds. Areas of the city where land donations would be encouraged are the western edge of the city along Manning Avenue and the southwest area of the city. Currently no city parkland is located in either of these areas. Per the 2008 Comprehensive Plan, a priority for the acceptance of land in lieu of Park Dedication funds should be to obtain designated open spaces to provide for wildlife corridors, as well as to protect locally important water resources and scenic and natural features.

The committee attempted to view city property as it related to planned trail expansion by other government agencies or potential trail construction by the city and found little ability to map out a way to use many of these parcels as part of a larger trail system. The committee did identify three additional trail routes to those already part of the trail plan. These trail routes would be off road trails and serve to connect with existing and planned trails or access to locally significant natural resources. Adding these routes would allow Afton residents access to an expansive system of trails throughout the city and neighboring communities. These routes would be located along Manning Avenue, Hudson Road/Industrial Boulevard, 50th Street and Old Putnam Road.

The Park Committee recommends the city use available Park Dedication funds to mark the city's existing parks with signage as "Afton City Park Land," noting that the parcel is "permanently protected as open space" and marking the corners of each parcel to indicate where the public space ends and private property begins. These signs should also include a map of the parcel to assist any residents who enter the park to remain within the park

boundary. One sign is recommended at the following locations: Steamboat Park, Meadow Ridge Park, Aftonwood Park and Rinta Park. Two signs are recommended for Remus Park. This process could begin immediately. The committee believes most residents are unaware that the city owns these park areas, therefore it recommends making an announcement in the city newsletter that park locations have been marked.

The Park Committee also felt that the city should consider marking historical sites within the city. Although not included as part of the Park Plan the committee felt that some of these sites are of regional significance and should be noted as an addendum to this plan. An effort should be made to coordinate with the Afton Historical Society to create the appropriate text for the signage of these historic sites and the city should work with private landowners to gauge their interest in participating and having their buildings or land included in this effort. For sites within existing city parks this process could start immediately.

In all areas, and as resources permit, the city should work to reduce the negative impact of invasive species, most notably buckthorn in our parks. Although not a named park in this plan, special attention should be paid to the public land on which Mount Hope Cemetery is located, as the presence of buckthorn there is seriously threatening the survival of that historic site.

Of the parcels noted in this plan, three stood out as having potential to meet the intent of the park dedication process in providing residents with public open spaces; they are:

1. Meadow Ridge - This park is the second largest park in the city at 10.4 acres. The committee recommends development of this park to include off street parking, adding walking trails and benches.

2. Remus - This park is restricted to passive uses until 2026. The committee felt the city could work with the neighborhood to see if adding park benches along the current trail would be desirable.

3. Rinta - This park is the location for a community garden initiative begun in the fall of 2012 with first planting scheduled for the spring of 2013.

2. INTRODUCTION AND PURPOSE:

This plan has been prepared by the Afton Parks Committee and incorporates the goals and policies of past plans, the 2008 Afton Comprehensive Plan, the Washington County 2005 Master Plan for the St. Croix Valley Trail, the Green Corridor Project, and the Metropolitan Council 2030 Regional Parks Policy. The preservation of appropriate recreational and scenic areas, natural resources, wildlife habitat and unique landforms is a vital responsibility for all sectors of government. This obligation becomes increasingly apparent as the Twin Cities Metropolitan Area expands outwards and reduces open space.

Recreational needs are not limited to any age group. Recreational needs and desires are constantly changing. New interests create a demand for new facilities that will satisfy the needs of the community. The challenge is to provide a system, which satisfies a broad range of both passive and active recreational needs for all age participants.

Open space is defined as public land owned by the city and/or private land leased by the city for use by the general public. Open space can be used as a buffer between uses, a connector of recreational facilities or simply a natural area, which is preserved for its resources, landforms, wildlife habitat or aesthetic value. Open space can be a visual entity as well as a physical entity. Such an area need not be a vast expanse of land to be considered open space. A narrow strip of land, in some cases, can afford the visual effect of openness, while acting as a physical connector. Scenic roadways, trails and bicycle paths, although not extremely wide, can supply visual open space and act as linkage between recreational areas, thus providing the active aspect of recreation, while at the same time providing the passive form - open space.

Afton's approach toward building a parks, recreation and open space system is to evaluate open space for its recreational and scenic values, natural resources, wildlife habitat and unique landforms, and to coordinate acquisition and development. The plan is intended to chart a course and provide a framework for developing and maintaining the Afton Park system. The Plan will also serve as a guide for city commissioners, the City Council and the citizens of Afton. Afton will coordinate its planning efforts with other governmental units, foundations, agencies and individuals that plan or provide recreational or open space affecting Afton.

3. DEFINITIONS:

A. Belwin Conservancy - Foundation for Nature Conservancy and Land Preservation and a Minnesota non-profit organization.

B. Community Park - Serves community-wide active and passive recreation needs as well as preserving unique landscapes and open space. Active uses include ball fields, courts, informal play space, skating, play equipment etc. Passive use includes trails, picnicking, and nature study gardens.

C. Conservancy Park - Park that has unusual topography, flood plain, shore line, fragile soils, wetland, unique soil or rock formations, ravines. Serves limited passive use, trails, plant and animal viewing, interpretation, areas, canoe landings, swimming areas, picnicking.

D. Neighborhood Park - Serves active, passive and social uses for those living within 1/2 mile of the park (neighborhood walking distance). Active park uses are informal and include, for example, pick-up baseball, soccer, and playing catch.

E. Open Space Park - Open space can be thought of as a divider of uses, a connector to active or passive recreation or simply a natural area that is preserved for its aesthetic, natural or scenic value. It also may be parkland the city has acquired in the past and elected not to develop.

F. Recreation - Any form of play, amusement or diversion used for refreshment of body and mind.

G. SCVAP - St. Croix Valley Athletic Partnership. SCVAP is a volunteer athletic association and a Minnesota non-profit corporation.

H. State Park - Land owned by the State for nature-oriented recreation.

I. Trail – Trails may have a variety of topping materials including pavement, gravel, woodchips, dirt or grass. Serves non-motorized travel, walking, bicycling, horseback riding, roller-blading, roller-skiing, jogging.

9. FUTURE CONSERVANCY PARK

The 2008 Afton Comprehensive Plan highlights several areas for preservation and protection. These areas are creeks, coulees and mounds.

Bissel Mounds is good candidate to start the process to establish a conservancy park. Bissel Mounds are several large hills found in the northwest section of Afton. The Mounds are all held in private ownership. The mounds (erosional outliers) are unique to Washington County and are a recognized landmark to the city. Due to the unusual formation of the mounds and topography there is an interest in preserving and protecting the mounds. One avenue to preservation is to obtain the property and designate it as a Conservancy Park. Any facilities or activities would be passive.

The reality of this park is totally dependent upon availability of the property and an acceptable purchase price. The owners have met with the Afton City Administrator and were interested in subdividing the property, but because of the Mounds a Minor Subdivision was not feasible.

SIZE: 5 to 10 acres

EXPECTED COMPLETION: If the City decides to purchase any of this property it should do so within 5 years, before land prices are unaffordable. The City may want to consider acquiring Conservation Easements over the Mounds as an alternative. They would preserve the Mounds and the vista at a much-reduced cost.

COST: $120,000 (projected cost estimate based on land prices)

AFTON CREEK PRESERVE HOA FUNDS

11. SUMMARY OF RECOMMENDATIONS:

A. ~~Use available Park Dedication funds~~ to mark these public lands with signage as "Afton City Park Land", noting that the parcel is "permanently protected as open space" and marking the corners or each parcel to indicate where the public space ends and private property begins. These signs should also include a map of the parcel to assist any residents who enter the park to remain within the park boundary.

B. Consider adding historical sites within the city as part of the Park Plan. The City should encourage property owners to participate in having their historical structures or land included.

C. Coordinate with the Afton Historical Society to create the appropriate text for the signage of historic sites in Afton.

D. Work to reduce the negative impact of invasive species, most notably Buckthorn.

E. Identify and recommend preservation of open space and wildlife habitat; local historic and cultural features or landmarks; unique, scenic or environmentally sensitive areas.

F. Recommend park land acquisition at an early date, so that appropriate parcels or sites can be obtained to meet long-range needs before developmental pressures render the property too expensive.

G. Recommend parkland acquisition through collection of park dedication fees in subdivisions, appropriations from the General Fund, donations and government grants.

H. Plan parks based on input from residents and a needs assessment to develop goals and priorities for acquisition, development and use of parks, open space and recreational facilities. Information about present and future parks and recreational needs will be collected and evaluated on a regular basis. Because recreational needs and practices change over time, a periodic review and update of the Park Plan including these objectives and recommendations will be needed.

I. Provide a forum for public participation and open discussion of issues to ensure early and continuing public support and participation in park planning.

J. Cooperate with other governmental units, commissions, foundations, and athletic associations, agencies and individuals that plan or provide recreation or open space affecting Afton.

K. Develop parks and recreational facilities with respect to existing conditions, natural features, wildlife habitat and environmentally sensitive areas; and provide a variety of facilities. Wherever practical, parks will include open space areas that preserve and protect wetlands, natural habitat diversity, unique landforms and cultural resources that have

recreational potential, scenic and environmentally sensitive areas.

L. Provide a safe, convenient and coordinated system of trails for non-motorized use throughout the city.

M. Develop non-motorized trails according to public safety concerns and to be environmentally sensitive. Width, location and surfacing shall be adjusted for the terrain and amount and type of projected trail use, with a preference being for low-maintenance impervious surfaces.

N. Link trails, where possible, to existing or planned regional, state and adjacent community trails and to connect public open space areas. Mark trail routes where they utilize roadways. Seek private, county, state, and federal funds to develop trails along and parallel to city, county, and state roads.

O. Coordinate efforts with the Minnesota Department of Natural Resources to improve fish and wildlife habitat.

P. Coordinate efforts with the Design Review & Historic Preservation Commission to preserve and enhance locally significant cultural and historic resources.

Q. Develop a Master Plan for Town Square Park, Steamboat Park and the new parkland acquired as part of the Flood Mitigation Project to have a unified plan of use and design when Main Street is reconstructed.

12. ADDENDUM: (from the 2008 Afton Comprehensive Plan)

A. Parks and Open Space Goals, Policies and Strategies

The City of Afton establishes the following parks and open space goals:

1. Preserve adequate amounts of open space to maintain a rural atmosphere (from Afton's 2000 Park Plan).
2. Obtain and maintain designated open spaces to provide for wildlife habitat and migration.
3. Reconnect Afton's historical linkages to the St. Croix River.
4. Provide expanded access to the City docks to all residents.
5. Provide safe areas to ride bicycles within the City.
6. Provide safe areas to ride horses within the City.
7. Provide pedestrian friendly means of enjoying Afton's scenic views, wildlife, and connections to the St. Croix River.
8. Preserve locally important water resources, natural and scenic features.
9. Periodically identify the recreational needs of Afton citizens and evaluate ways to meet them.
10. Consider using the Afton Bluffs Regional Trail to create an east-west connection from Afton's Old Village to the City of Woodbury.

The City of Afton establishes the following parks and open space policies:

1. Preserve open spaces and natural resources for passive use and create non-motorized trails through direct purchase, subdivision, scenic and/or conservation easements and other means to include the seeking of grants and the use of matching funds when they are available, but not the use of eminent domain.
2. Maintain central community places.
3. Maintain safe environments for children to play and for the community to gather.
4. Maintain designated open spaces to provide for wildlife habitat and migration.
5. Work cooperatively with Washington County, the Belwin Conservancy, the Science Museum of Minnesota, and other quasi-public and private entities to preserve sensitive lands and open space.
6. Develop a park plan to provide for the five small parcels obtained by the City through park dedication.

The City of Afton establishes the following parks and open space strategies:

1. Develop signage and pedestrian-friendly connections to the St. Croix River.
2. Protect Steamboat Park as a nature preserve and passive use area.

Inspect Minnesota & Midwest Soil Testing

Brian Humpal - President - MPCA Licensed Designer, Inspector, Installer, and Pumper

Lakeland, MN 55043

Subject: Sub-surface sewage treatment system site evaluations Carlson Sub-Division - Part of the southeast quarter of section 32 and part of the southwest quarter of section 33, township 28 north, range 20 west, City of Afton, Washington County, MN

Dear Joe:

Please find the soil testing logs, soil survey data, and a copy of the survey showing the soil test locations relative to the subject property. Four soil borings surrounding an area of approximately 12,000 square feet were performed on each of the twenty proposed lots. Washington County requires each lot to contain at least 10,000 square feet of area with suitable soils for long-term sewage treatment.

It is my opinion that each of the proposed lots will support primary and future sub-surface sewage treatment systems that will meet state and county requirements. Of the twenty lots, one boring on each of the proposed lots two; three (existing house lot), and four indicated less than twelve inches of suitable soil. The additional three borings on each of these lots indicated suitable soils. I feel that a significant amount of adjacent area with suitable soils exists and the bedrock areas could be isolated. Additionally, based on past experience as well as information gathered while performing the testing, I was able to confirm that the downslope areas contained more soil overlying the bedrock. This thicker layer of soil in the downslope areas most likely occurred during the glacial and postglacial periods and was caused by wind moving the fine soil particles and re-depositing this soil in downslope areas; this condition is referred to as loess.

Should the proposed lots or building sites change, based on the soil tests, it is my opinion that nearly all areas on the property within the set-backs will support sub-surface sewage treatment systems. Percolation rates in the upper 12-24 inches, where most systems would be installed, are expected to be less than 45 minutes per inch. After the exact lot configurations have been determined and the location/size of the homes have been determined, a complete system design showing tank sizes, soil treatment system size and location, etc. will be required by the county. Additional soil borings and percolation tests will be required once the exact locations of improvements to the property have been determined.

Areas that may be used for sewage treatment systems must be fenced off prior to construction to prevent access by construction equipment, which may harm the soils, rendering the area(s) unsuitable for a sub-surface sewage treatment system.

Please be advised that the findings herein are based on my interpretation of the site and soils. In no way can I guarantee that Washington County will approve the installation of sub-surface sewage treatment systems on this property. I recommend obtaining a soil review from

Washington County to insure that they will approve the soils for the installation of sub-surface sewage treatment systems on this property; a Washington County soil review application is attached. In addition, no interpretation of the soils relative to the construction of roads, drainage features, building footings, etc. has been given. Nor has any indication been given relative to the future use of this property beyond the suitability of the soils for sub-surface sewage treatment systems. I recommend contacting Washington County and The City of Afton to verify that the proposed property improvements will be acceptable.

Thank you very much for allowing me to do this work. Please contact me should you have any questions.

Sincerely,

Brian Humpal

Planning Commission Memo

Meeting: October 2, 2017

To: Chair Ronningen and members of the Planning Commission

From: Ron Moorse, City Administrator

Date: September 27, 2017

Re: Comprehensive Plan Update

Staff is in the process of incorporating all edits received from the Planning Commission members into the Comprehensive Plan document. When all edits have been incorporated, staff will provide the updated Comprehensive Plan to the Commission members as a Word document and/or as a hardcopy, depending on the preferences of the members.

PLANNING COMMISSION RECOMMENDATION REQUESTED:
Motion to provide direction regarding the next steps in the Comprehensive Plan update process.

City of Afton
3033 St. Croix Trl, P.O. Box 219
Afton, MN 55001

Planning Commission Memo

Meeting: October 2, 2017

To: Chair Ronningen and members of the Planning Commission

From: Ron Moorse, City Administrator

Date: September 22, 2017

Re: Michael and Carolyn Johnson Variance Application at 771 Indian Trail - **Withdrawn**

As requested by the Planning Commission, staff confirmed with the City Attorney that the former house could be replaced by a new house in the same location without a variance if the replacement is begun within one year of the demolition of the former house. Based on this confirmation, the applicants revised the location of the house to match the location of the former house and withdrew their variance application.

PLANNING COMMISSION RECOMMENDATION REQUESTED:
No recommendation is required.

September 19, 2017 City Council Meeting Highlights

- The Council approved Change Order No. 3 for the Pavement Management Project to Park Construction in the amount of $62,120.50.
- The Council approved the extension of the sidewalk on St Croix Trail from 36th Street to 37th Street.
- The Council adopted Resolution 2017-44 issuing a negative declaration regarding the need for an EIS for the proposed Afton Creek Preserve development.
- The Council adopted the 2018 Preliminary Budget and Tax levy.
- The Council set the date and time for the final 2018 Budget and Tax Hearing which will be December 19, 2017 at 7:00 pm.
- The Council approved the purchase of a decibel meter for motor vehicle noise data collection.
- The Council waived the noise ordinance until 11:00 p.m. for a special event at 15106 50th St. S. on October 14, 2017.
- The Council approved payment of Pay Voucher No.5 for the Downtown Village Improvement Project from Geislinger and Sons Inc. in the amount of $694,787.29.
- The Council approved payment of Payment Request No. 6 for the Wastewater Treatment System Project from Ellingson, Inc. in the amount of $80,651.20
- The Council approved payment of Pay Voucher No. 3 for the Pavement Management Project from Park Construction Co in the amount of $848,608.22.
- The Council approved a change order request for the deputy's garage facility to provide floor drains and a rough-in for future restroom in the amount of $2625.00.
- The Council held a closed session regarding the resolution of assessment appeals.

Additional Applicant Exhibits

The applicant's Exhibits D,E, F and G were not included in the hardcopy of the agenda packet provided to Planning Commission members. These exhibits are attached here.

SUBGRADE EXPLORATION

FOR

AFTON PROJECT

Afton, Minnesota

Allied Project No. 17068

August 11, 2017

INTRODUCTION

This report presents the results of subgrade exploration performed by our firm for a proposed large lot residential development. This work was requested by Mr. Charles Plowe of Plowe Engineering, Inc. on July 26, 2017 and authorized by Mr. Joseph Bush of J.P. Bush Homes on July 27, 2017. Our work was performed as described in our proposal for subgrade exploration dated July 26, 2017.

PROJECT INFORMATION

The project site is approximately 200 acres in size and is located in the NW quadrant of the intersection of Trading Post Trail and 60th Street South, Afton, Washington County, Minnesota. A twenty lot residential development, a roadway, and 100 acres of open space are proposed for the project. Our work consisted of soil borings and a geotechnical report for the proposed roadway.

BORING LOCATIONS AND ELEVATIONS

The borings were located as shown on the site plan included in the appendix. The boring locations were marked in the field by Landmark Surveying, Inc. Ground elevations at the boring locations were provided on the site plan.. The elevations listed on the boring logs are in accordance with the ground elevations at each boring location.

FIELD EXPLORATION

Twelve Standard Penetration Test (SPT) borings were put down to a depth of 10 feet. One SPT boring was put down to a depth of 15 feet. Three additional SPT borings were intended to be drilled to either 10 or 15 feet, but auger refusal occurred and they were actually drilled to depths of 9.5 feet, 6.5 feet, and 5.3 feet of depth. The borings were put down in accordance with ASTM 1586-99: "Standard Method for Penetration Test and Split-Barrel Sampling of Soils". Using this procedure, a 2" O.D. split barrel sampler is driven into the soil by a 140-lb weight falling a distance of 30 inches. After an initial set of 6", the number of blows required to drive the sampler an additional 12 inches is known as the standard penetration resistance or N-value. The N-value provides an indication of the relative density of cohesionless (coarse grained) soils or of the consistency of cohesive (fine-grained) soils.

As the samples were obtained in the field, they were visually and manually classified. Representative portions of the samples were then sealed in clean glass soil jars and returned to the laboratory for further examination and verification of the field classification. The recovered soil samples were classified in accordance with the Unified Soil Classification System, ASTM D: 2488-00. A chart illustrating this classification method is included in the appendix to this report. Logs of the test borings indicating the depth and identification of the various strata, measured penetration resistances, soil classifications and the results of water level checks are included in the appendix to this report.

Bag samples were obtained from the 10 feet deep borings from the soil layers just below the topsoil. Four of the borings were intended to be drilled to 15 feet because an approximate cut of 5 feet was shown on the profile: borings 2559, 2560, 2564, and 2566. Bag samples from these borings were obtained at 5-6.5 feet. Gradation tests and plasticity index tests were run on some of the samples in order to make pavement recommendations for the roadway. Not all samples were tested, however, because they were the same as samples that were tested.

SUBSURFACE CONDITIONS

Boring B-2557

Boring B-2557 consisted of 24 inches of topsoil, underlain by silty clay (AASHTO A-6) from at least 2.5 feet to at least 5 feet of depth, clayey sand from at least 5 feet to 6 feet of

depth, medium sand with clay to at least 9 feet of depth, and sandy clay from at least 10 feet to 11.5 feet of depth.

Boring B-2558

Boring B-2558 consisted of 8 inches of topsoil, underlain by silty sand with gravel (AASHTO A-2-4) to 7.5 feet of depth, fine sand to at least 9 feet of depth, medium sand with clay from at least 10 feet to 10.25 feet of depth, and clayey sand to 11.5 feet of depth.

Boring B-2559

Boring B-2559 consisted of 6 inches of topsoil, underlain by slightly organic sandy silt to at least 2 feet of depth, silt (loess) to 5 feet of depth, silt with sandstone pieces to 7.5 feet of depth, silty sand with sandstone pieces to at least 9 feet of depth, and fine to medium sand and sandstone pieces from at least 9.5 feet to 11 feet of depth.

Boring B-2560

Boring B-2560 consisted of 5 inches of topsoil, underlain by silt (loess) to 5 feet of depth, silt with sandstone pieces (AASHTO A-4) to 7.5 feet of depth, sandy silt with sandstone pieces to at least 11.5 feet of depth, silty sand with sandstone pieces from at least 12.5 feet to 15 feet of depth, and silty sand with sandstone pieces to 16.5 feet of depth.

Boring B-2561

Boring B-2561 consisted of 6 inches of topsoil, underlain by moist clay to 2.7 feet of depth, fine sand with silt to 5.25 feet of depth, moist sandy silt (AASHTO A-4) to 8 feet of depth, silt to 10 feet of depth, and sandy silt with some sandstone pieces to 11.5 feet of depth.

Boring B-2562

Boring B-2562 consisted of 8 inches of topsoil, underlain by 10 inches of moist clay to 1.5 feet of depth, sandy silt to 2.5 feet of depth, and silty fine sand to 6.5 feet of depth. Auger refusal occurred at 5.3 feet of depth.

Boring B-2563

Boring B-2563 consisted of 16 inches of topsoil, underlain by clay (AASHTO A-6) to at least 2.5 feet of depth, silty sandy clay with some gravel to 4 feet of depth, clay/silt (AASHTO A-4) to 6 feet of depth, silt with some gravel from at least 7.5 feet to 9 feet of depth, and silty sandy clay from at least 10 feet to 11.5 feet of depth.

Boring B-2564

Boring B-2564 consisted of 10 inches of topsoil, underlain by moist clay to at least 2 feet of depth, silt with sandstone pieces from at least 2.5 feet to at least 4 feet of depth, and silty

sand with sandstone pieces from at least 5 feet to 6.5 feet of depth, and auger refusal at 6.5 feet of depth.

Boring B-2565

Boring B-2565 consisted of 4 inches of topsoil, underlain by silty clay to at least 2 feet of depth, sandy silt (loess) from at least 2.5 feet to 5 feet of depth, sandy silt with sandstone pieces to 7.5 feet of depth, sandy silt to 10 feet of depth, and sandy silt with sandstone pieces to 10.9 feet of depth.

Boring B-2566

Boring B-2566 consisted of 10 inches of topsoil, underlain by moist silt to at least 2 feet of depth, sandy silt (loess) to 7.5 feet of depth, sandy silt with sandstone pieces to 10 feet of depth, and sandy silt with some sandstone pieces to 11.5 feet of depth.

Boring B-2567

Boring B-2567 consisted of 14 inches of topsoil, underlain by sandy clay to at least 2 feet of depth, sandy silt from at least 2.5 feet to 2.83 feet of depth, sandy silt with sandstone pieces to at least 4 feet of depth, sandy silt from at least 5 feet to 5.5 feet of depth, sandy silt with sandstone pieces to at least 6.5 feet of depth, silt from at least 7.5 feet to at least 9 feet of depth, sandy silt from at least 10 feet to 10.33 feet of depth, and sandy silt with sandstone pieces to 11.5 feet of depth.

Boring B-2568

Boring B-2568 consisted of 6 inches of topsoil, underlain by slightly organic silt to at least 2 feet of depth, moist silt from at least 2.5 feet to at least 6.5 feet of depth, silty sand from at least 7.5 feet to 10 feet of depth, and silty sand with some sandstone pieces to 11.5 feet of depth.

Boring B-2569

Boring B-2569 consisted of at least 2 feet of topsoil, underlain by clayey sandy silt (AASHTO A-4) from at least 2.5 feet to 5 feet of depth, moist silty sandy clay with some sandstone pieces to 8.4 feet of depth, silty clay to at least 9 feet of depth, and silt with some sandstone pieces from 10 feet to 11.5 feet of depth.

Boring B-2570

Boring B-2570 consisted of 8 inches of topsoil, underlain by slightly organic clay to at least 2 feet of depth, silt (loess) from at least 2.5 feet to 5 feet of depth, silt with some sandstone

pieces to 7.5 feet of depth, silty sand with some sandstone pieces to 10 feet of depth, and silty sand and sandstone pieces to 10.9 feet of depth.

Boring B-2571

Boring B-2571 consisted of 10 inches of topsoil, underlain by clay to at least 2 feet of depth, clayey sand from at least 2.5 feet to 2.75 feet of depth, silt (loess) to 10.75 feet of depth, and silty sand and sandstone pieces to 11.5 feet of depth.

Boring B-2572

Boring B-2572 consisted of 8 inches of topsoil, underlain by slightly organic clay to 2 feet of depth, silt (loess) from at least 2.5 feet to 7.5 feet of depth, silt with some sandstone pieces to 10.6 feet of depth, and silt with sandstone pieces to 11.5 feet of depth.

N-values ranged from 5 to 72, indicating that the soils ranged from medium to very dense in consistency.

Groundwater was not encountered in the borings. Groundwater conditions may vary both seasonally and annually based on precipitation amounts, patterns, and both surface and subsurface drainage in the local area.

Included in the appendix to this report are logs of the test borings, which describe the conditions, encountered at each drilling location. The depth of the individual strata of soil may vary at and between the drilling locations due to unsampled intervals, the occurrence of transitions between soil layers and the natural variability of the subsurface conditions.

CONCLUSIONS AND RECOMMENDATIONS

Organic topsoil, peat, organic soils, and any soft soil layers, which may be encountered, should not be relied upon for support of the proposed roadway or controlled fills that will support the roadway. These materials should be removed and replaced below the proposed roadway A qualified soil technician should examine the excavated areas before suitable fill material is placed. ITCO Allied Engineering can provide this service during construction.

The non-root infested and inorganic on-site soils would generally be suitable for reuse as controlled and compacted fill material. The topsoil or other materials, which would not be suitable for use as

controlled fill, may be able to be used as surface fill in the lawn and landscaping areas. Additional recommendations are presented in the following sections:

1. EXCAVATION

In general, grubbing and stripping operations should remove all significantly organic or root infested soils from the areas to be worked. Frozen material, soft consistency clays or otherwise unsuitable soil and debris should be removed. Where undocumented fill or otherwise unsuitable soils are exposed in the base of excavations, which will support slabs, pavements or footings, these materials should also be removed. Frozen soils resulting from frost penetration may turn soft upon thawing and would need to be removed.

For the support of fill sequences, slabs, or footings it will be important to remove unsuitable soils prior to the placement of the controlled and compacted fill to make grade for concrete foundations and slabs. Once the organic topsoil layers and otherwise unsuitable materials have been removed, the completed excavations should be observed by an experienced soil engineer or technician and the conditions judged to be suitable prior to the placement of controlled and compacted fill to make grade for concrete footings or slabs. The following areas should be observed at the time of construction and unsuitable soil removed and replaced as necessary to obtain suitable soil and adequate compaction of the soil for the proposed roadway or other facilities.

Soil Boring	Soil depth associated with soils requiring modification
B-2557	Remove topsoil to 24"
B-2558	Remove topsoil to 8"
B-2559	Remove to roadway subgrade
B-2560	Remove to roadway subgrade
B-2561	Remove topsoil to at least 6"*
B-2562	Remove topsoil to at least 8"*
B-2563	Remove topsoil to at least 14"*
B-2564	Remove to roadway subgrade
B-2565	Remove topsoil to at least 4"*

B-2566	Remove to roadway subgrade
B-2567	Remove topsoil to at least 14"*
B-2568	Remove topsoil to at least 6"*
B-2569	Remove topsoil to at least 24"
B-2570	Remove topsoil to at least 8"*
B-2571	Remove topsoil to at least 10"*
B-2572	Remove topsoil to at least 8"*

*The layers immediately below the topsoil in these borings are dark clays and are likely "Horizon B" layers, which can be variable as far as organic content. A decision will need to be made as to whether or not to remove these layers or to use them for roadway subgrade.

2. FILL PLACEMENT

In the event that unsuitable soils are encountered and need to be replaced, the fill material should be mineral soil, preferably granular, and free of debris, boulders and organic material. The non-organic on-site soils would be suitable for reuse as controlled fill material provided that they are dry enough to meet compaction requirements. It may be difficult to dry wet soils sufficiently and it may be necessary to replace some of this material with off site material.

Fill should be placed and compacted in a manner that will allow complete compaction of the entire fill layer to a minimum of 95% of the Standard Proctor Density according to ASTM D: 698 in the building pad area. Required compaction should be increased to 98% for the top 4 feet of fill below final grade and below all footings. For roadway construction, the top 3 feet of roadway subgrade should be compacted to 100%. A minimum of one representative field density test should be performed for each two feet of fill placed at a time in a given work area. Density tests in mass fill areas should be performed at a rate judged sufficient to represent the fill sequence as a whole. Where sand fills are to be compacted, smooth "drum" type vibratory equipment would be preferred, however, a sheepsfoot roller with short wide pads may provide adequate compaction.

Fill areas should be properly oversized to provide for adequate distribution of the imposed loads. The fill supporting structural elements should extend at least one foot horizontally beyond the structure, slab or edge of the footing. Fill surfaces should extend downward and outward on a 1:1

slope to competent soil. If the fill slope is unconfined by other soils, the downward and outward slope should be flattened and stabilized. Also, no unremedied excavations should be carried out within the fill oversize areas.

3. PAVEMENT

The results of our work indicate that conditions are suitable for the construction of flexible bituminous pavements if the design of the roadway sections and preparation of the subgrades take into account the nature of the subsurface soils present. The material types most influencing the pavement design would be the soil layers located just below the layers that will be removed. The classifications of these layers are as follows:

AASHTO Classification	USC Classification	Boring Nos.
A-2-4	Silty Sand, SM	2558, 2559
A-4	Silt, ML & Silty Sand, SM	2560, 2564, 2566, 2568, 2569
A-6	Silty Sandy Clay, CL	2557, 2561*, 2562*, 2563*, 2565*, 2567*, 2568*, 2570*, 2571*, 2572*

*If the layer immediately below the topsoil ends up being removed, then the soil layer below the removed layer would dictate the pavement section. These would be A-4 soils.

The AASHTO A-2-4 material would likely provide a soil factor of 75 or an R-value of 30. Using MnDOT's soil factor design method and a light traffic 7-ton design (less than 400 Average Daily Traffic) with a soil factor of 75 would require a Granular Equivalent (G.E) of 9.38 inches. A pavement section consisting of a 1½-inch wear course (MnDOT 2360), a 2-inch base course (MnDOT 2360), and 6 inches of class 5 aggregate (MnDOT 3138) would provide a G.E. that would exceed the required value. For a 9-ton design, using a soil factor of 75, the minimum G.E. is 13.9 inches for a light traffic roadway (less than 150 Heavy Commercial Average Annual Daily Traffic). A pavement section consisting of a 1½-inch wear course (MnDOT 2360), a 2-inch base course (MnDOT 2360), and 7 inches of class 5 aggregate (MnDOT 3138) would provide a G.E. that would exceed the required value

The AASHTO A-4 material would likely provide a soil factor of 130 or an R-value of 20. Using MnDOT's soil factor design method and a light traffic 7-ton design (less than 400 Average Daily

Traffic) with a soil factor of 130 would require a Granular Equivalent (G.E) of 14 inches. A pavement section consisting of a 1½-inch wear course (MnDOT 2360), a 2-inch base course (MnDOT 2360), and 7 inches of class 5 aggregate (MnDOT 3138) would provide a G.E. that would exceed the required value. For a 9-ton design, using a soil factor of 130, the minimum G.E. is 22 inches for a light traffic roadway (less than 150 Heavy Commercial Average Annual Daily Traffic). A pavement section consisting of a 1½-inch wear course (MnDOT 2360), a 2-inch base course (MnDOT 2360), and 15 inches of class 5 aggregate (MnDOT 3138) would provide a G.E. that would exceed the required value. AASHTO A-4 soils are frost susceptible and silts can wick up moisture from lower layers. Several local communities require a 2 feet sand layer be placed on top of the silt, then at least 6 inches of class 5 and the asphalt layers previously described. The City of Afton should be contacted to determine their requirements. If they do not require a two feet sand layer this should still be considered.

The AASHTO A-6 material would likely provide a soil factor of 100 or an R-value of 12. Using MnDOT's soil factor design method and a light traffic 7-ton design (less than 400 Average Daily Traffic) with a soil factor of 100 would require a Granular Equivalent (G.E) of 11.5 inches. A pavement section consisting of a 1½-inch wear course (MnDOT 2360), a 2-inch base course (MnDOT 2360), and 6 inches of class 5 aggregate (MnDOT 3138) would provide a G.E. that would exceed the required value. For a 9-ton design, using a soil factor of 100, the minimum G.E. is 17.5 inches for a light traffic roadway (less than 150 Heavy Commercial Average Annual Daily Traffic). A pavement section consisting of a 1½-inch wear course (MnDOT 2360), a 2-inch base course (MnDOT 2360), and 10.5 inches of class 5 aggregate (MnDOT 3138) would provide a G.E. that would exceed the required value

In using the soil factor method for pavement design, it is essential that the subgrade be constructed of uniform soil across the pavement section and compacted at a moisture content and to a density in accordance with MN/DOT spec. 2105 and be capable of passing test rolling, in accordance with MN/DOT Spec. 2111. The completed subgrade should be observed and judged suitable by an experienced individual prior to the placement of the aggregate base or paving. Compaction of the upper 3 feet of the subgrade to a minimum of 100% of the standard proctor density within appropriate moisture limits, (65 to 102% of optimum), should provide the necessary stability required for proof rolling.

4. FINAL SITE TOPOGRAPHY

The final soil surfaces should be graded to provide adequate drainage away from structures and pavements in order to minimize deleterious effects associated with water infiltration. The areas adjacent to footing walls should be adequately compacted (not loosely placed) and provided with drainage outlets to avoid this zone acting as a "sump" and creating nuisance water conditions.

Compliance with the building code provision for positive surface drainage away from the structure should also aid in reducing the quantity of infiltration into the backfill zones adjacent to foundation walls.

STANDARD OF CARE

The recommendations contained in this report are professional opinions. These opinions were arrived at in accordance with generally accepted engineering practices currently in use at this time, location and for projects of this type. Other than this, no warranty is implied or intended. Soil samples recovered from the test borings will be retained in our offices for a period of thirty days from the date of this report. After that time they will be discarded unless prior written instructions to the contrary are received.

I hereby certify that this report and/or specification has been prepared by me or under my direct supervision and that I am a duly registered Professional Engineer under the laws of the State of Minnesota. If you have any further questions or we can be of any further assistance, please do not hesitate to phone or write.

Spack CONSULTING
ENGINEERING TRAFFIC FORWARD

Technical Memorandum

To: Joe Bush, JP Bush Custom Homes
From: Bryant Ficek, P.E., P.T.O.E.
Date: July 26, 2017
Re: Technical Memorandum - Afton Homes Sight Distance Review

JP Bush has proposed a 20-lot residential home development in Afton, Minnesota on the north side of Trading Post Trail. A previous memorandum by Spack Consulting, dated June 2, 2017, discussed the proposed access to the development, specifically, sight distance issues and improvement options. The necessary sight distances discussed in this previous memorandum were based upon a 30-mph vehicle speed and an available sight distance of 260 feet roughly measured off a site drawing. The purpose of this memorandum is to complete field measurements for the westbound approach to the proposed access to better determine the necessary sight distance requirements based upon actual conditions on-site.

Conclusions and Recommendations

Field data was collected to determine actual vehicle speeds and sight distance for the proposed driveway location. Based on this data, the following was concluded:

- The 85th percentile vehicle speed was measured at 25 mph on Trading Post Trail just west of the curve and east of the proposed driveway.
- Drivers implicitly account for the roadway factors in this area, pavement, grades, roadway width, etc. in choosing their vehicle speeds regardless of posted, statutory, or assumed speed limits.
- At 25-mph, the necessary intersection sight distance based on Minnesota Department of Transportation (MnDOT) policy is 275 feet for left turn movements and 240 feet for right turn movements.
- The sight distance for the proposed driveway location is 280 to 290 feet as measured in the field.
- Measuring on the design plan for the proposed driveway, the sight distance is at least 275 feet, satisfying the requirement for a 25-mph vehicle.

Based on these measurements of actual vehicle speeds and sight distance, the proposed driveway satisfies the requirement for sight distance and is expected to have safe intersection movements. Safety could be further improved by paving Trading Post Trail from the existing paved section west through the proposed driveway location, which is the intended plan of the development.

Field Work

Sight distance requirements are provided by the American Association of State Highway and Transportation Officials' (AASHTO) *A Policy on Geometric Design of Highways and Streets*. In this AASHTO manual, sight distance requirements are provided in terms of a time gap in the major road traffic and are related to the speed of approaching vehicles. For approaching vehicles at any speed, a vehicle stopped at an intersection requires a minimum time gap of 7.5 seconds in either direction to complete a left turn movement. In other words, an average driver needs to see an approaching vehicle at least 7.5 seconds away to know if they have sufficient time to complete a left turn. In order to complete a right turn movement, the time gap is reduced by one second to 6.5 seconds. MnDOT adopted these measurements and distances as official policy in 2013.

To translate this time factor into a distance, the AASHTO formula is:

Intersection Sight Distance = 1.47 * Major Street Vehicle Speed (mph) * time gap

As mentioned, the previous work assumed a 30-mph vehicle speed. Field work therefore focused on measurements to determine the actual speed of the vehicles on Trading Post Trail, including:

- the radius of the roadway curve to determine the corresponding vehicle speed.
- the actual vehicle speeds of approaching vehicles.

A field survey completed for the development including Trading Post Trail and its curve to the east of the proposed driveway. Every roadway curve is associated with a design speed based upon the length of the curve radius. The survey indicated the Trading Post Trail curve to the east of the proposed site access has a centerline radius of 125 feet. Using chapter 3 of the MnDOT Road Design Manual, the corresponding design speed of the roadway curve is between 20- and 25-mph depending upon the exact factors assumed, such as urban or rural and side friction factor.

Road tube counters were installed on Trading Post Trail, west side of the roadway curve. These tube counters captured vehicle counts and speeds over the course of one week, which included weekdays and weekend days. The road tube counter collected the vehicle speeds of over 700 vehicles during the course of the week. Using data for the westbound vehicles only, the 85th percentile speed (speed at which 85 percent of the vehicles are traveling at or below) was calculated at 25.0 mph. The 85th percentile speed is an important value as MnDOT generally uses the 85th percentile speed as its determinant in posting regulatory speed limits.

Sight Distance Impacts

The two measurements confirm that, regardless of posted, statutory, or assumed speed limit, vehicles are travelling around the Trading Post Trail curve at a lower rate of speed. This field result speed should therefore be considered in determining sight distance. Using 25 mph as the approaching vehicle speed, the necessary sight distance is approximately 275 feet for a left turn movement (needing 7.5 seconds) and approximately 240 feet for a right turn movement (needing 6.5 seconds).

The available sight distance to the east from the proposed driveway access was then measured in the field. Standing at the location of a vehicle on the proposed driveway and measuring distance to when a vehicle could be seen approaching from the east provided a sight distance of between 280 and 290 feet depending upon the exact height of eye and height of object. This distance is above the necessary sight distance based upon a 25-mph vehicle speed.

The minimum distance of 275 feet was further confirmed through the computer design work. The attached drawing shows the required sight distance for the proposed driveway based upon the measured 25-mph vehicle speeds. Thus, the proposed driveway has sufficient sight distance for intersection movements.

Other Factors

Other factors that could impact the travel speeds, and thus the sight distance requirements, such as grades, roadway width, and other characteristics are already accounted for in the field measurements. Drivers implicitly account for these factors and drive their vehicle accordingly.

However, the gravel section on Trading Post Trail could be an issue if mainline drivers would be forced to slow or stop due to another driver miscalculating the appropriate gap in traffic for their turn. Due to the relatively low traffic on Trading Post Trail, less than 150 vehicles per day, the opportunities for conflicts between vehicles exiting the proposed development and mainline vehicles are minimal. Upon further discussion with the development, the intent is to pave this section from the existing paved road by the Trading Post Trail curve west through the proposed driveway location. Paving the road will eliminate this potential risk.

Sent: Thursday, May 25, 2017 3:50 PM
To: Joe Bush
Subject: Call

Joe:

I received your voicemail, and will respond here. We are in the midst of intensive grant proposal week, with 8 of them due by next Wednesday. I have one done.

I ran your questions past Ann Thies, our Stewardship Director, and will provide our joint thoughts.

1. Trails in open space west of development. Mowed trails should not be a problem as long as they are not too wide and there are not too many of them. We can work with you to define what that system looks like and where it is placed.

2: Overlook. This is probably also OK. Is the parking lot still part of the plan? You mentioned that this might be for bicyclists. As long as we keep the footprint small (not too obtrusive), the amenity is a good idea for general public use. Again, we can discuss details.

We should discuss at some point the costs associated with the Land Trust managing this easement over time so that you are aware of that and can have that fully integrated into discussions. You mentioned the planting of flowers in the open space area - is this intended to be native prairie or savanna - what is the plan?

Thanks again. Please feel free to touch base if I have not addressed all of your questions. Thursday next week would be ideal! :-)

Wayne

RE: Afton Creek Preserve

Dear Mr. Bush:

Thank you for the opportunity to work with you during the design stage of the proposed Afton Creek Preserve to craft open space that both meets the requirements set forth by the City of Afton and maximizes the benefits to wildlife and offers protection to Trout Brook. Over time, this open space will become an important asset to the residents of the community.

As you know, the Minnesota Land Trust works with municipalities to position proposed developments to elevate the ecological attributes of open space. As such, our recommendations are firmly grounded in this perspective. To that end, it is the Land Trust's opinion that the current open space design for the proposed Afton Creek Preserve best offers protection to Trout Brook and creates open space in the manner that will afford greatest habitat value to wildlife. Our previous recommendations at the time were:

- Make protection of Trout Brook the focus of the open space.
- Acquire additional land along (south of) Trout Brook and reconfigure the initial layout of lots to provide for greater protection of the brook and efficacy in monitoring the easement. This additional land would, in turn, provide for greater flexibility in the design to further enhance open space values.
- Retain, as designed, a large block of open space on the west edge of the property to provide maximum wildlife benefits.
- Eliminate development of the north portion of the proposed easement area to protect the integrity of the intermittent stream valley that feeds Trout Brook from the north.

We believe that the current proposed design of Afton Creek Preserve fully meets our recommendations and best positions the project ecologically. Access along the west edge of the property, crossing Trout Brook, and crossing the block of open space north of the brook would have significant ecological impacts to the brook and wildlife habitat on the property.

That said, we acknowledge that the City must consider a variety of factors when determining if and under what circumstances a proposed development should move forward. Whatever the outcome of this project, the Minnesota Land Trust will work with the City to best position such projects ecologically as it considers them going forward.

Sincerely,

Wayne R. Ostlie
Director of Land Protection
