

City of Afton

**Park Committee Meeting
Wednesday, July 27, 2016
6:00 PM**

Agenda

- 1. Call to Order**
- 2. Roll Call**
- 3. Approval of Agenda**
- 4. Business**
 - A. Town Square Park Restroom
 1. Obtain more detailed plans to enable reliable bids
 - B. Steamboat Park trail improvements, canoe/kayak landing/storage
 - C. Update on Friends of the St. Croix grant application to help fund levee trail bridge over Kelle's Creek
 - D. Review of the Parks and Open Spaces Plan section of the Comprehensive Plan
- 5. Adjournment**

PARKS AND OPEN SPACES PLAN

Residents value the rural atmosphere of Afton. Five-acre minimum lot sizes outside of the Old Village with houses that do not dominate the views of the countryside, large non-buildable areas of the City, and a large amount of farmland create an open feel to the landscape. *Open spaces, in and of themselves, are valuable to the residents of the City as preserves of nature and sanctuaries for flora and fauna.*

The preservation of open spaces, including land with steep slopes, woodlands, wetlands, scenic or environmentally sensitive areas, and agricultural land provides many benefits, including the protection of natural resources, the provision of wildlife habitat, and the preservation of the natural, rural countryside character of Afton. The preservation of these open spaces is of key importance to the City. The City will seek to accomplish this preservation through a number of means, including:

1. Parkland dedication;
2. Parkland acquisition;
3. Open space dedication incentives in land development regulations; and
4. Encouraging and supporting the long term continuation of agricultural uses.

Existing Parks and Open Space

The City of Afton, and Afton's natural, open, rural character, greatly benefit from the substantial amount of open space that has been preserved by other public and quasi-public organizations. These open space amenities include a State Park, Regional Parks and the Belwin Conservancy. In addition, the St. Croix River is a magnificent open space amenity, providing scenic and tranquil vistas, and a major recreational resource. Another significant element of Afton's open space is its scattered rural development, including large lots and large expanses of agricultural land. Rather than developing new parks, the focus of the City has been to protect and preserve the existing natural resources and open space amenities.

The City does not have a substantial amount of City-owned open space and developed parks. The City of Afton has one park for active recreation, Town Square Park, and another for passive recreation, Steamboat Park, along the St. Croix River. Both parks are located in the Old Village.

Steamboat Park lies mostly in the floodplain and is approximately thirty (30) acres in size. It serves as a sanctuary for many birds and various kinds of wildlife. It is one of the few locations on the lower St. Croix River that is not readily accessible for large boat traffic. Recreation is limited to passive recreation, such as picnicking, walking, swimming, bird and wildlife viewing.

Town Square Park is a more active site. The park provides space for basketball, baseball, picnicking, music concerts, skating and group activities. There is playground equipment, a band shell, and a picnic shelter in the park, as well as primitive restroom facilities. Town Square Park is the focal point of such annual events as the Fourth of July Parade, May Fair, Antique Car Rallies, and Art in the Park.

Over the course of many years, the City has acquired a number of other parcels throughout the city of Afton with the potential to develop into local parks. These public lands were acquired in conjunction with the approval of major subdivisions over the course of several decades and remain undeveloped. In all, there are 53.44 acres of designated park land available for public use.

Community and regional parks (Afton State Park, Lucy Winton Bell Athletic Fields, Lake Elmo Regional Park Reserve, St. Croix Bluffs Regional Park, and Cottage Grove Ravine Regional Park) also provide a variety of different types of recreation to Afton residents.

Two biking/hiking trails pass through the City. One trail follows St. Croix Trail South and extends from the northern edge of the Old Village to Interstate 94. The other, Afton Bluffs Regional Trail, is designated along County Road 18 running east and west, and is not separated from the roadway.

The planned St. Croix Valley Regional Trail will parallel the St. Croix River, and will connect Point Douglas County Park, Carpenter Nature Center, St. Croix Bluffs Regional Park, Afton State Park and the proposed Afton Bluffs Regional Trail. The St. Croix Valley Regional Trail will be aligned parallel and in close proximity to the St. Croix River.

The City seeks to protect a number of significant natural features within its boundaries. These include Trout Brook, Valley Creek and its North Branch, Bissell's Mounds and Kelle's Coulee. Bissell's Mounds in particular are unique to Washington County and are a recognized landmark in the City. Other natural features that are determined to be either unique or geologically sensitive will be preserved as the property around them is developed.

Afton State Park is located south of Afton and a portion of the park (787 acres) is located within the City's boundaries. The park was authorized by legislation in 1969 and was opened to the public in 1982. The terrain of the park is defined by a glacial moraine cut by deep ravines running into the St. Croix River. To Afton's residents, the state park offers many recreational amenities, including: backpack camping, swimming, hiking, fishing, cross country skiing, a prairie landscape, bird watching, and animal sighting. Some of the animals the park offers a home to include hawks, bluebirds, meadowlarks, deer, fox, badgers, turkeys, thirteen-lined ground squirrels, and gray and fox squirrels. Afton State Park is also home to an array of natural vegetation. It contains a combination of oak savannah and woodlands. Park wildflowers include woodland ephemerals in the spring, butterfly weed and puccoons in the summer, and sunflowers and blazing star in the fall.

Belwin Conservancy also holds considerable land within Afton under a conservation easement by the Minnesota Land Trust. This land is designated quasi-public. The Belwin land provides a substantial open space amenity for adjacent land uses, and makes a major contribution to the protection of natural resources, and to the City's rural countryside character.

Parks and Open Space Goals, Policies and Strategies

The City of Afton establishes the following parks and open space goals:

1. Preserve adequate amounts of open space to maintain a rural atmosphere (from Afton's 2000 Park Plan).
2. Obtain and maintain designated open spaces to provide for wildlife habitat and migration.
3. Reconnect Afton's historical linkages to the St. Croix River.
4. Provide expanded access to the City docks to all residents.
5. Provide safe areas to ride bicycles within the City.
6. Provide safe areas to ride horses within the City.
7. Provide pedestrian friendly means of enjoying Afton's scenic views, wildlife, and connections to the St. Croix River.
8. Preserve locally important water resources, natural and scenic features.
9. Periodically identify the recreational needs of Afton citizens and evaluate ways to meet them.
10. Consider using the Afton Bluffs Regional Trail to create an east-west connection from Afton's Old Village to the City of Woodbury.

The City of Afton establishes the following parks and open space policies:

1. Preserve open spaces and natural resources for passive use and create non-motorized trails through direct purchase, subdivision, scenic and/or conservation easements and other means to include the seeking of grants and the use of matching funds when they are available, but not the use of eminent domain.
2. Maintain central community places.
3. Maintain safe environments for children to play and for the community to gather.
4. Maintain designated open spaces to provide for wildlife habitat and migration.
5. Work cooperatively with Washington County, the Belwin Conservancy, the Science Museum of Minnesota, and other quasi-public and private entities to preserve sensitive lands and open space.
6. Develop a park plan to provide for the five small parcels obtained by the City through park dedication.

The City of Afton establishes the following parks and open space strategies:

1. Develop signage and pedestrian-friendly connections to the St. Croix River.
2. Protect Steamboat Park as a nature preserve and passive use area.
