2025 GARDEN PLOT GUIDELINES

General Information:

Spring will be here soon, time for gardeners to get their hands dirty. The Rinta Community Garden has 25 plots available to residents of the Lower St. Croix Valley. Plots are approximately 900 square feet.

There is no charge for using a plot. Gardeners are asked not to use pesticides and to use organic fertilizers. There is no well water at the site, but 2 rain barrels collecting runoff from a small shed will hold 250 gallons of water for irrigation when necessary. The installation of a high fence has thwarted hungry deer.

Gardening Guidelines:

Community gardeners must use organic methods of growing their plants, use mulch to control runoff, and eliminate weeds in the plots. No restrictions will be put on what is grown on the plot with the exception that there will be no commercial production. Gardeners with excess produce should plan to donate their produce to local food shelves. Plots shall be well maintained, and fencing and other hardscape should be harmonious with the site. Gardeners are asked to use their best judgment when choosing materials. If materials are deemed inappropriate, the gardener will be asked to remove it, improve its appearance or replace it with something more attractive.
